

The background of the image is a dark navy blue. Overlaid on this are several large, overlapping, wavy shapes in shades of light blue and medium blue, creating a layered, ocean-like effect. Tucked into the crevices and over the peaks of these waves are several pieces of fabric with a dense, multi-colored plaid or check pattern. The colors in the pattern include red, orange, yellow, green, and blue. The overall composition is abstract and textured.

LITTLE INTRO  
**BIG SPLASH**

ANZERA

# ANZEA

## PARTY BOAT

**ready for a cruise**

- PARTY BOAT combines robust performance with a simple design featuring a clear, crisp color palette.

Passes: IMO Res. A471 (XII), IMO Res. A652 (16), NFPA 701, Cal 117-2013, NFPA 260

100,000 Double Rubs Martindale Content: 100% Trevira® CS Polyester

### **what's cool about Trevira CS**

- Trevira® CS passes the most stringent flame requirements without additional additives. No solvents are involved in the production of Trevira® CS fibers and filaments. No halogens or nitrogenous compounds are used. These fibers are certified to Oeko-Tex Standard 100 at the highest rating.
- Trevira® CS is sustainable. It uses fewer resources than natural fibers during both use and manufacture. The ecological washing process consumes less energy and chemicals with a short washing and drying time. The polyester is non-toxic, does not off-gas and is easily recycled or safely incinerated to create energy.
- Trevira® CS is REACH compliant to ensure the oceans and waters are safe for generations of happy cruising. REACH is the European chemical regulation for the registration, assessment and the limitation of chemical substances. It achieves a high protection level for human health and the environment.
