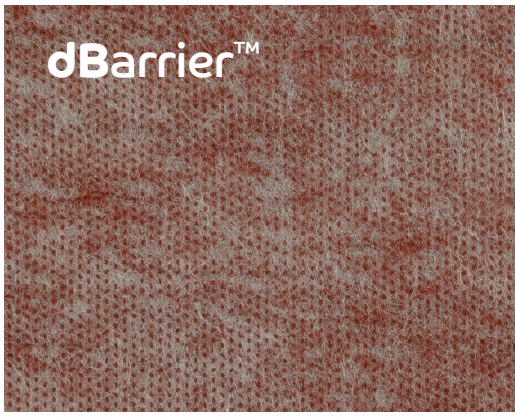
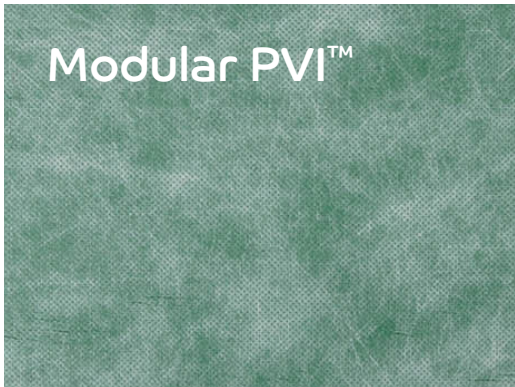
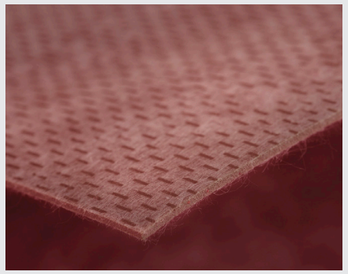
Tred-MOR®
FLOORLINER Series

For Hard Surface and Carpet Tile



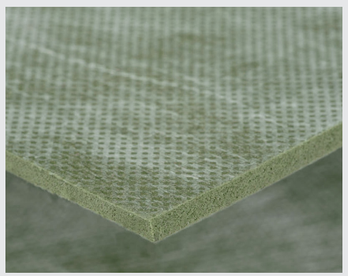


FLOORLINER Series



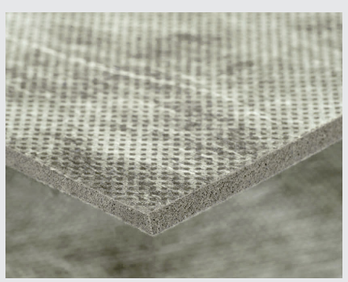
dBarrier™

- For use beneath any hard- (2mm+) or soft-surface flooring
- Suppresses impact sound transfer through the floor to the room below
- Smooths out minor floor irregularities
- Hypoallergenic and CRI Green Label Plus-certified; 100% recyclable
- Installs quickly and easily; no glue, single-glue, or double-glue



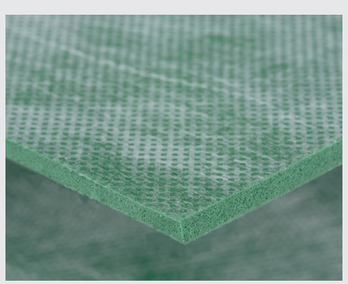
DeciBLOK™

- For use beneath 6.5mm+ rigid core vinyl, engineered floor, or modular tile
- Suppresses impact sound transfer through the floor and reduces room echo
- Inhibits the growth of mold, mildew, and odor-causing bacteria
- Hypoallergenic and CRI Green Label Plus-certified; 100% recyclable
- Installs quickly and easily; no glue, single-glue, or double-glue



Silent Walk™

- For use beneath 6.5mm+ rigid core vinyl, engineered floor, or modular tile
- Superior dampening of impact sounds before transferring through the floor
- Inhibits the growth of mold, mildew, and odor-causing bacteria
- Hypoallergenic and CRI Green Label Plus-certified; 100% recyclable
- Installs quickly and easily; no glue, single-glue, or double-glue



Modular PVI™

- Engineered for use under PVC-backed modular carpet tile or modular composite tile
- Provides passive vibration isolation of sound transfer through floors
- Offers comfort and support to carpet tile while extending carpet life
- Keeps spills from penetrating to subfloor
- Installs quickly and easily; no glue, single-glue, or double-glue

Comfort

Tred-MOR® FloorLiner™ is the flooring industry's premier line of cushion and acoustic systems. Whether it's for carpet tile, LVP/LVT, or solid-core vinyl, this series provides premium options for a better look and feel underfoot.

Each product is made from high-density synthetic rubber, providing superior anti-fatigue comfort. With the FloorLiner series, minor floor irregularities are smoothed out, allowing for an even feel as you walk. Additionally, the high-quality makeup of the underlayment adds superior cushioning and a rich fullness to carpet-tile in areas of increased foot traffic.

Noise

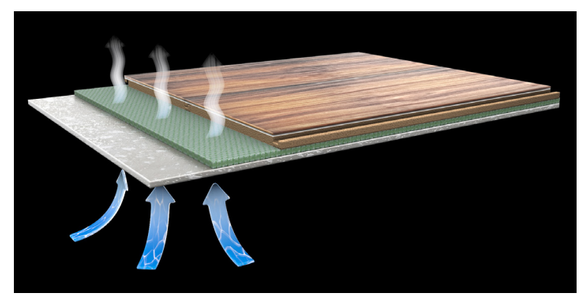
Performance and noise control are essential in high-traffic and heavy-use hospitality and commercial environments. Depending on the floor type, noise can easily be transmitted throughout a room or to an area below by simply taking a step. With Tred-MOR, a sound barrier is created on the subfloor which significantly reduces the transfer of impact noise through to the room below.

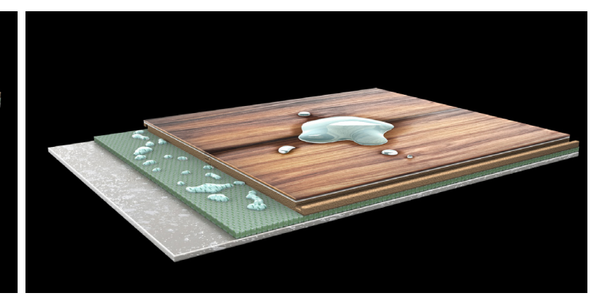
Tred-MOR FloorLiner products are made from 100% virgin synthetic rubber and are among the very best materials for use in reducing sound vibration. Our synthetic rubber utilizes its naturally dissipative properties while maintaining an open cell structure. Since it is a vulcanized rubber, the walls of the cells won't break down and will retain protection from noise for the life of the floor.

Moisture

The Tred-MOR FloorLiner series features products that are breathable moisture barriers. This means they are 100% resistant to liquids soaking through from the top while simultaneously allowing vapor from the slab to permeate up through the floor system and escape into the atmosphere. This ensures there is no buildup of bacteria or mold under the liner.

These products are all protected by our Guardian® antimicrobial treatment. DeciBLOK and Silent Walk include a vapor barrier, but are only intended to guard against minor vapor emission. While this series works to inhibit the growth of mold, mildew, and odor-causing bacteria, it's important to remember that no vapor barrier is capable of stopping 100% of vapor moisture from passing through.





Installation by floor type

	dBarrier™	DeciBLOK™	Silent Walk™	Modular PVI™
	 BV0340	 BV0081	 BV0185	 BV0278
