

Building Reclaimed Wood from the Industrial Era

This magnificent antique wood had marks of time to prove the boards have already played a significant part in our country’s rich history. Legacy has somewhat more frequent and slightly larger knots than River-Recovered®. These coveted features occurred because the majority of the clear wood on the outside of the log was cut away to produce the legendary industrial revolution beam.

Grades Available	Grade description	Grain	Knots	Color	Heart	Milled Size*	Length*	Hard-ness	Milling	Kiln Dried	Finishing
 SELECT	Wood Shipped up the Eastern Seaboard and to Hotels and Palaces across Europe Antique Legacy™ Select Heart Pine features an arching grain bordered with up to 75 to 85 percent vertical grain depending on width. Infrequent nail holes average about 15 per 100 square feet. Slight nail staining adds rustic charm that blends perfectly with the reclaimed antique heart wood	Arching grain pattern with pinstripes along the edges of most boards; 75 to 85 vertical grain pattern depending on width; occasional nail or bolt holes	No knots over 1½". All pitch pockets, knots are sound and tight At least 6 growth rings per inch on avg Can be ordered in ‘clear’ grade with only occasional ‘pin knots’; none over ½”; infrequent nail holes	Luminous, vibrant color; copper to burgundy tones	95–100% heart face	¾" x 2½", 3¼", 5¼", 7", 9" 	Flooring: 2'–12' Paneling: 3'–12'	1225 on the Janka scale; com-parable to red oak (1290) & 29% more stable	Precision milling within 3-5 thousandths	Yes to 6-8% moisture content. Test moisture content for jobsite region	Our standard wood floor is unfinished. Prefinishing with a micro bevel can be added. UV oil finish available
 VERTICAL	Elegant Pinstriped Graining Creating Timeless Interiors Antique Legacy™ Vertical Heart Pine tends to have fewer knots than Select because it typically takes a larger beam and some additional sawing to produce it Features infrequent nail holes, average about 15 per 100 square feet. Slight nail staining adds rustic charm that blends perfectly with the reclaimed antique heart wood	Vertical pinstriped grain pattern the length of each board; produced from the quartersawing process; 100% true vertical grain with no growth rings more than 45 degrees perpendicular to the face; occasional nail holes	No knots over 1½". All pitch pockets, knots etc. are sound and tight. Can be ordered in ‘clear’ grade with only occasional ‘pin knots’; none over ½”; infrequent nail holes	Luminous, vibrant color; copper to burgundy tones	98–100% heart face	¾" x 2½", 3¼", 5¼"					
 CHARACTER	More Energy and Charm for Special Interior Design Projects Antique Legacy™ Character Heart Pine is the most rustic looking flooring Goodwin produces and is perfect for getaway cabins and retreats. Goodwin carefully reclaims this antique heart pine wood from vintage warehouse beams. It has frequent nail holes, staining, and some cracking and checking for a distressed appearance	Mixture of arching and pinstripe grains along the edges of most boards with frequent nail and bolt holes, staining and surface checks It has charming character marks valued by many designers today for it's distressed appearance	Varying knot sizes	This special wood has a blend of the same grains and red tones as the River-Recovered® woods, but with some yellow sap streaks	75–90% heart face	¾" x 2½", 3¼", 5¼", 7", 9" 					
 NAILLY	Frequent Nail Pattern Often Indicates Best Face Chosen by the Carpenter Antique Legacy™ Nailly Heart Pine provides a more rustic looking wood that comes from the face of the better vintage warehouse beams. It has frequent character nail holes, often in a pattern, placed there by carpenters long ago	Frequent nail hole pattern and arching grain with pinstripes along the edges of most boards At least 6 growth rings average per inch, lengths 2' to 12', average 5' to 7'	A few knots, none over 1½"	Red tones with splashes of yellow sap streaks	95–100% heart face	¾" x 2½", 3¼", 5¼" 7" & 9" as available 					
 VINTAGE ENGINEERED	Made from the same Recovered Woods as our Legacy Solid Wood Lines. Looks and Lasts Like Solid Wood Precision Engineered wood floors offer discerning home owners and building design professionals new options to install premium Heart Pine flooring in environments where solid wood flooring is impractical or not advisable	Arching grain pattern	A few larger knots than Legacy Select	Luminous, vibrant color, copper to burgundy tones	95–100% heart face	5⁄8" x 5¼" & 7"	Engi-neered Flooring: 20"–8'				
 VERTICAL ENGINEERED		Pinstriped grain pattern with less knots than our Vertical solid grade	A few knots, none over 1½"		98–100% heart face	5⁄8" x 3¼"					

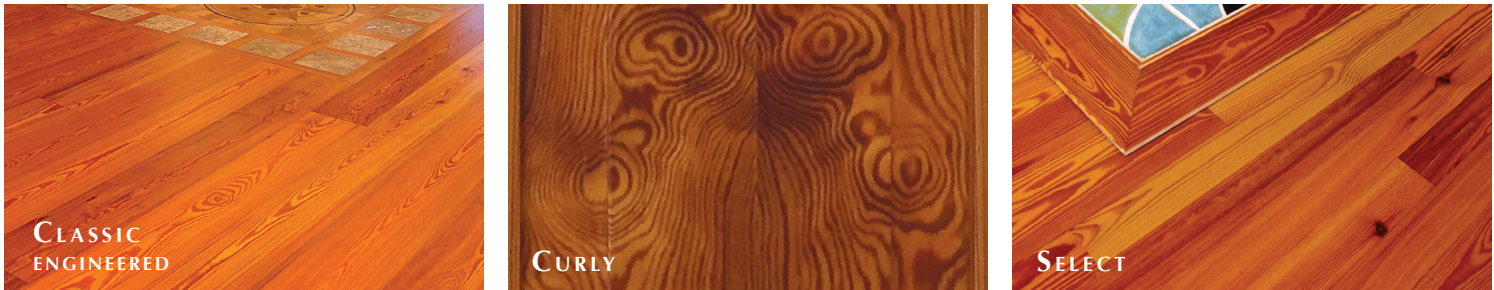

Grades match the last available standard for longleaf pine from 1924.

*Custom grades, widths and lengths available.

100% Heart Wood is the Highest Level of Durability

River-Recovered® Heart Pine is the same quality that was last available to your grandparents. These logs were lost by sawyers along the river banks in the 1700s and 1800s. Preserved by the cool river waters in an oxygen-free sanctuary for centuries, George Goodwin and his team recover the logs from Florida rivers and turn them into our signature flooring.

Grades Available	Grade description	Grain	Knots	Color	Heart	Milled Size*	Length*	Hard-ness	Milling	Kiln Dried	Finishing				
 SELECT	Select Grain Displays Cathedral Arches with Graceful Grain Movement Antique River-Recovered® Select Heart Pine features a cathedral arching grain with a border of vertical pinstripe grain	Arching grain with pinstripes along the edges of most boards	Few knots, none over 1¼"	Luminous, vibrant color, copper to burgundy tones	100% heart face	¾" x 2½", 3¼", 5¼", 7", 9" 	Flooring: 2'–12' Paneling: 3'–12'	1225 on the Janka scale; comparable to red oak (1290) & 29% more stable	Precision milling within 3-5 thousandths	Yes to 6-8% moisture content. Test moisture content for jobsite region	Our standard wood floor is unfinished. Prefinishing with a micro bevel can be added. UV oil finish available				
 SELECT CLEAR		Plain sawn arching, cathedral grain pattern	Rare pin knots, none over ½"												
 CLASSIC ENGINEERED 	Manufactured from the Same Recovered Woods as our Signature Solid Wood Lines Precision Engineered Classic Select – Looks and Lasts <i>Like</i> Solid Wood. Same average length; can be sanded same as our solid wood floors	Arching grain pattern	Less knots than our Select grade		100% heart face	⅝" x 5¼" & 7"	Engineered Flooring: 20"–8'								
 VERTICAL	More Formal, Sometimes Modern Look with Tight Striped Graining Antique River-Recovered® Vertical Heart Pine is known for its elegant pinstriped graining and pristine appearance	Elegant pinstriped graining and pristine appearance; quarter sawn pinstripe, vertical grain pattern	Almost completely clear of pin knots		100% heart face	¾" x 2½", 3¼", 5¼"	Flooring: 2'–12' Paneling: 3'–12'								
 VERTICAL CLEAR		Quarter sawn pinstripe, vertical grain pattern	Rare pin knots												
 VERTICAL ENGINEERED 	Manufactured from the Same Recovered Woods as our Signature Solid Wood Lines Precision Engineered Vertical – Looks and Lasts <i>Like</i> Solid Wood. Same average length; can be sanded same as our solid wood floors	Pinstriped grain pattern	Few knots, none over 1¼"		100% heart face	⅝" x 3¼", 5¼"	Engineered Flooring: 20"–8'								
 MIDNIGHT	Chocolate, Cherry Tones Appearing Older than Most Antique Heart Pine Goodwin's original Antique River-Recovered® Midnight Heart Pine stock came from the mysterious waters of the Savannah River	Mixture of mostly arching grain with some vertical pinstripes	Knots up to 1½"	Rich, varied colors ranging from tans to darker chocolate tones	95% heart face	¾" x 2½", 3¼", 5¼"	Flooring: 2'–12' Paneling: 3'–12'								
 CURLY	Figure Like No Other Burl Wood in the World Antique River-Recovered® Curly Heart Pine is extremely rare. It is an amazing wood that never fails to turn heads. Often found only in the outer board of one out of every 400+/- River-Recovered logs. Also known as rosemary or burly heart pine	Features burled grain; Extremely curly, burled grain	Knots rare	Luminous vibrant color, some lighter tones	Heart content variable	¾" x 2½", 3¼", 5¼", 7" 									
 CHARACTER	Original growth longleaf pine in a character grade offers more natural characteristics for added interest	Blend of arching grain patterns and vertical pinstripes. Graded to include usable machine defects and face checks, cracks and pitch pockets	Variable	Yellow and red tones, heart wood and sap wood; has more color variation than other grades	75 to 100 percent heart, growth rings are variable	¾" x 2½", 3¼", 5¼", 7", 9" 									

Grades match the last available standard for longleaf pine from 1924.

Engineered
WOOD FLOORING

LEGACY™ HEART PINE
VINTAGE ENGINEERED

Looks and Lasts Like Solid Wood

Goodwin Company’s precision engineered (PE) wood flooring is made from the same River-Recovered® and sustainable logs as our solid wood lines. Coated with high-quality, environmentally friendly products, PE wood flooring maintains a stunning finish for years to come.

Facts About Engineered Wood Floors

Goodwin’s PE wood flooring features 100% high quality and/or rare wood on the face. Some lesser quality engineered floors contains smaller pieces not suitable for use in solid flooring. This results in a “chopped up” look. A high quality engineered floor produced using full size boards maintains the same aesthetically pleasing look as a traditional floor.

Features of our Precision Engineered Floors

Goodwin’s PE floors are made from the same recovered and recycled wood as our solid wood lines.

- Each floor features a beautiful finish that wears well (also available unfinished)
- Designed to stay flat with changes in humidity due to more layers above tongue and groove
- Earth friendly reclaimed face, certified ‘green’ back and low formaldehyde glues
- More antique/reclaimed wood beyond the backer for a consistently tight fit
- Lifetime structural warranty on the floor and 20 years on the finish
- Made in the USA, assembled at our plant in Micanopy, Florida
- Long lengths to look like a solid wood floor (mostly eight feet)
- Wear layer can be sanded the same number of times as solid wood

Eternal

COLLECTION

WOOD FLOORING

The wood eternal is commonly over 1,000 years old

Heart Cypress is one of only a few remaining prehistoric species. Logged 150+ years ago and presumed lost, these original-growth Bald Cypress trees commonly lived to be 1,000 to 1,500 years old. They were the true giants of the southeastern swamps, towering over 100 feet.

Grades Available	Grade description	Grain	Knots	Color	Heart	Milled Size*	Length*	Hard-ness	Mill-ing	Kiln Dried	Finish-ing
SELECT	Feathery Grain as Though Water-Colored by the Ancients Antique River-Recovered® Select Heart Cypress features a blend of vertical grain with a charming feathery pattern. Because the tree was at least 500 years old when harvested in the nineteenth century, wider widths are available	Plain sawn feathery, subtle arching, swirling grain with at least 8 growth rings and up to 80 per inch	Few knots, none over 1¼"	Warm honey through cinnamon tan to light chocolate tones	100% heart face	¾" x 2¼", 3¼", 5¼", 7", 9" 	Flooring: 2'–12' Paneling: 3'–12'	690 on the Janka hardness scale, comparable to Douglas Fir	Precision milling within 3-5 thousandths	Yes to 6-8% moisture content. Test moisture content for jobsite region	Our standard wood floor is unfinished. Prefinishing with a micro bevel can be added. UV oil finish available
SELECT CLEAR			Rare pin knots no larger than ½"								
VERTICAL	Suede-Like Vertical Pinstriped Appearance, Uniquely Fine Grained Antique River-Recovered® Vertical Heart Cypress is derived from the famed Bald Cypress tree and provides a delicate straight grain	100% true vertical grain. Quarter sawn vertical, very tight pinstripe grain; with at least 8 growth rings and up to 80 per inch	Few knots, none over 1¼"	The patina of this warm wood evokes hushed whispers of lurid chocolate chestnut tones		¾" x 2½", 3¼", 5¼", 7"					
VERTICAL CLEAR			Knots rare, no pin knots over ½"								
MIDNIGHT	Luscious Light to Dark Chocolate Tones, Colored by the Millennium Our Midnight Heart Cypress is increasingly rare. It originated straight from the shadowy waters of the Savannah River. When General Oglethorpe laid out the port town of Savannah, Georgia in the early 1700s, antique heart pine and heart cypress were perfect for dock pilings. Heart cypress repelled water and insects and withstood the elements to become one of the building materials for the town	Mixture of mostly arching, swirling, feathery grain with some vertical pinstripes. Very dense growth with at least 8 growth rings and up to 80 per inch	Few knots, none over 1¼"	Warm honey through cinnamon tan to light chocolate tones		¾" x 2½", 3¼", 5¼"					
PECKY	Nature's Blend of Grace and Function Antique River-Recovered® Heart Cypress Pecky is caused by fungus creating the textured appearance. While the tree was still living, the wood developed narrow oval-shaped areas that look as if it has been carved out by an ancient woodworker	Irregular elliptical carved appearance. Elliptical holes in the wood created by nature and time. Arching, swirling grain. Very dense growth with at least 8 growth rings and up to 80 per inch	Few knots, none over 1¼"			¾" x 2¼", 3¼", 5¼", 7", 9" 					
CHARACTER	One of Only a Few Remaining Prehistoric Species Antique River-Recovered® Heart Cypress Character grade offers more natural characteristics for added interest. It is uniquely fine grained and is perfect for paneling, ceilings, trim and any place you want subtle ancient beauty	Character is a blend of arching grain patterns and vertical pinstripes with at least 8 growth rings and up to 80 per inch. The grade can have some machine defects, face checks, cracks and some Pecky areas	Knots of any size allowed; may have a few loose knots	Warm honey through cinnamon tan to light chocolate tones. Can be stained for more consistent color	99.9% heart content	¾" x 2¼", 3¼", 5¼", 7", 9" 					

Grades match the last available standard for cypress from 1904.

COLLECTION

HARDWOOD FLOORING

Goodwin connects with foresters and property managers throughout the Americas to provide beautiful wood that has been rescued or sustainably harvested. From old-growth trees felled during storms to wood rescued from properties and backyards, Goodwin is breathing new life into beautiful wood that otherwise would either be destroyed or sold for pennies on the dollar to mills not practicing sustainable or lean manufacturing.

Wood Sample	Wood description	Grain	Knots	Color	Heart	Milled Size*	Length*	Hard-ness	Kiln Dried	Finishing
 WILD BLACK CHERRY SOLID WOOD	Rescued or sustainably harvested from throughout the Americas Wild Black Cherry has more figure and mineral streaking than standard cherry	A blend of arching grain patterns Some mineral streaking and considerable burled or lacy grain	Knots less than 1½"	Wild Black Cherry has deep pink to rich red brown tones	98–100% heart face	¾" x 2¼", 3¼", 5¼", 7", 9" 	Flooring: 2'–12' Paneling: 3'–12'	950 Janka; similar to Teak	Yes to 6-8% moisture content. Test moisture content for jobsite region	Our standard wood floor is unfinished. Prefinishing with a micro bevel can be added. UV oil finish available Can be sanded same as our solid wood floors
 WILD BLACK CHERRY ENGINEERED	Wild Cherry Engineered is the same figured cherry as our solid wood Made from old-growth trees when they come down for development	More figure and mineral streaking	Infrequent, none over 1½"	Rich red brown tones	98–100% heart face	5⁄8" x 5¼"	20"–8' same average length as solid wood flooring	950 Janka; comparable to Teak		
 ANTIQUE LONGLEAF SOLID WOOD	Made from the outer boards of the River-Recovered® Antique Heart Pine logs; the same density, age and source, includes sap wood	A blend of arching grain and vertical grain; more vertical available in narrower widths	Few knots	Light, natural color and has a blend of heartwood and sapwood	30–40% heart face	¾" x 2½", 3¼", 5¼", 7", 9" 	Flooring: 2'–12' Paneling: 3'–12'	890 Janka; similar to Cherry and Teak		
 OLD FLORIDA SOLID WOOD	Rescued from local storm damaged old-growth forests These logs have more frequent and larger knots and less dense grain than heart pine that was cut 100 years ago; features a more casual look	A blend of arching grain patterns	Some knots up to 3"	Luminous lighter red, light brown tones	95% heart face	¾" x 2½", 3¼", 5¼", 7", 9" 	Flooring: 2'–12'	1225 Janka; comparable to Red Oak		
 ANDIROBA MAHOGANY ENGINEERED	Rescued wood from Costa Rica after hurricanes took down trees Species: Andiroba	Clear grade	Very few, none over 1"	A richer brown, more uniform than common species	100% heart face	5⁄8" x 5¼" & 7"	20"–8' same average length as solid wood flooring	1130 Janka; comparable to Antique Heart Pine		
 BLACK WALNUT ENGINEERED	Rescued or sustainably harvested from throughout the Americas	Swirling grain, up to 5% creamy sapwood streaks	Few knots	Consistent brown color	95%+ heart face	5⁄8" x 5¼" & 7"		1010 Janka; comparable to Teak		

Grades match the last available standard for longleaf pine from 1924.
