DESIGNS

ABOUT US

"The details are not the details. They make the design." - Charles Eames

Our Company

Element Designs was founded in 2003 by a group of American and Swiss individuals with a drive for innovation and healthy dose of entrepreneurship. We recognized the contemporary European trends in the casework industry and foresaw the need for a reliable supplier to the product demand that was positioned to arrive in North America. We are a trusted partner and supplier of aluminum, glass and acrylic casework components and surfacing materials to the leading kitchen, office and closet manufacturers in the industry.

Our Products

We began our company by manufacturing aluminum frame glass doors with a selection of design forward frame styles and glass inserts which naturally complemented a variety of residential and commercial interiors. Over the years our product offering has expanded to include high gloss solid surface acrylic doors, backpainted glass products and aluminum frame base systems to meet the demands of our customers and to introduce new products which were well suited for the contemporary trends that were to come. We are proud to say that our products are made in the USA.

Our Passion

We are passionate about contemporary design and believe great design starts with great products. The difference is always in the details. We are driven to bring the best trends in casework and architectural design to the North American market based on European trends, but catered especially for North American preferences. We invest in research and development to create products and solutions to help drive innovative design in our industry.

Our Team

Our employees are our most important asset. Many companies may say it, but we live it every day. With the implementation of an inclusive management style, we count on our employees to provide constant feedback related to products and processes which continuously improve our quality and product offerings. Our dedication to our team has enabled us to build a world class group of team members whose primary focus is to make our customers happy. Our love for what we do translates into the best products and service in the industry.

Our Promise

We promise to always strive to exceed our customers' expectations. We understand the importance of quality products and quick lead times, but we also realize that the true value of being a trusted partner of any manufacturer is to provide an excellent customer experience by listening to our customers' needs and going above and beyond expectations to make sure we provide products and service that always add value to your projects and designs.

KITCHEN

The kitchen is often the heart of the home and therefore a true reflection of personal style and preferences. Element Designs' aluminum, glass and acrylic products add custom design details that are completely customizable to fit any environment. Our products complement a variety of styles including modern, contemporary, transitional, industrial and more. Our wide variety of frame styles, inserts, metal finishes and hardware solutions help create exceptional spaces.

KITCHEN

Element Designs' aluminum, glass and acrylic products can be used in a variety of ways in kitchen designs. Aluminum doors with transparent inserts are an ideal focal point and combine form and function in an aesthetically pleasing way. Our backpainted glass and high gloss solid acrylic products create sleek surfaces for entire kitchens or sections of the room such as islands and base cabinets. Our aluminum frame base systems are a unique structural element that can be easily integrated into islands, cabinet bases and tables.

CLOSET

Image courtesy of Wellborn Cabinet.

Closets continue to grow in popularity and Element Designs' cabinet doors, sliding door systems and backpainted glass solutions can help turn an ordinary space into an extraordinary one. A closet is a space where personal style and individuality can really shine through. The addition of quality aluminum glass doors and panels, high gloss solid acrylic doors and drawer fronts and backpainted glass countertops in a variety of colors, finishes and combinations are always the perfect accessory.

BATHROOM

Image courtesy of M. Laht Homes and Ted Maines Interiors

Element Designs' products add beauty and durability to bathrooms. Environments prone to heat and humidity benefit from the waterproof and warp resistant qualities of anodized aluminum, glass and high gloss solid acrylic. Our cabinet doors, backpainted glass surfaces and aluminum frame base systems add design details while providing functional storage and support solutions.

RESIDENTIAL

Aluminum, glass and acrylic components add contemporary design details to more than just kitchens and bathrooms. Areas which incorporate storage solutions such as living rooms, drop zones, garages and more benefit from the stylish details and durability of our aluminum, glass and acrylic products.

OFFICE

Image courtesy of GEIGER.

Office environments embrace contemporary lines and sleek surfaces. Element Designs' aluminum doors, backpainted glass and glass markerboard products are the perfect way to integrate simple design elements that help define a space while keeping a minimalist feel. Our backpainted glass custom color matching option is an excellent way to incorporate a specific color scheme into functional products with a long life span and ultimate durability.

COMMERCIAL

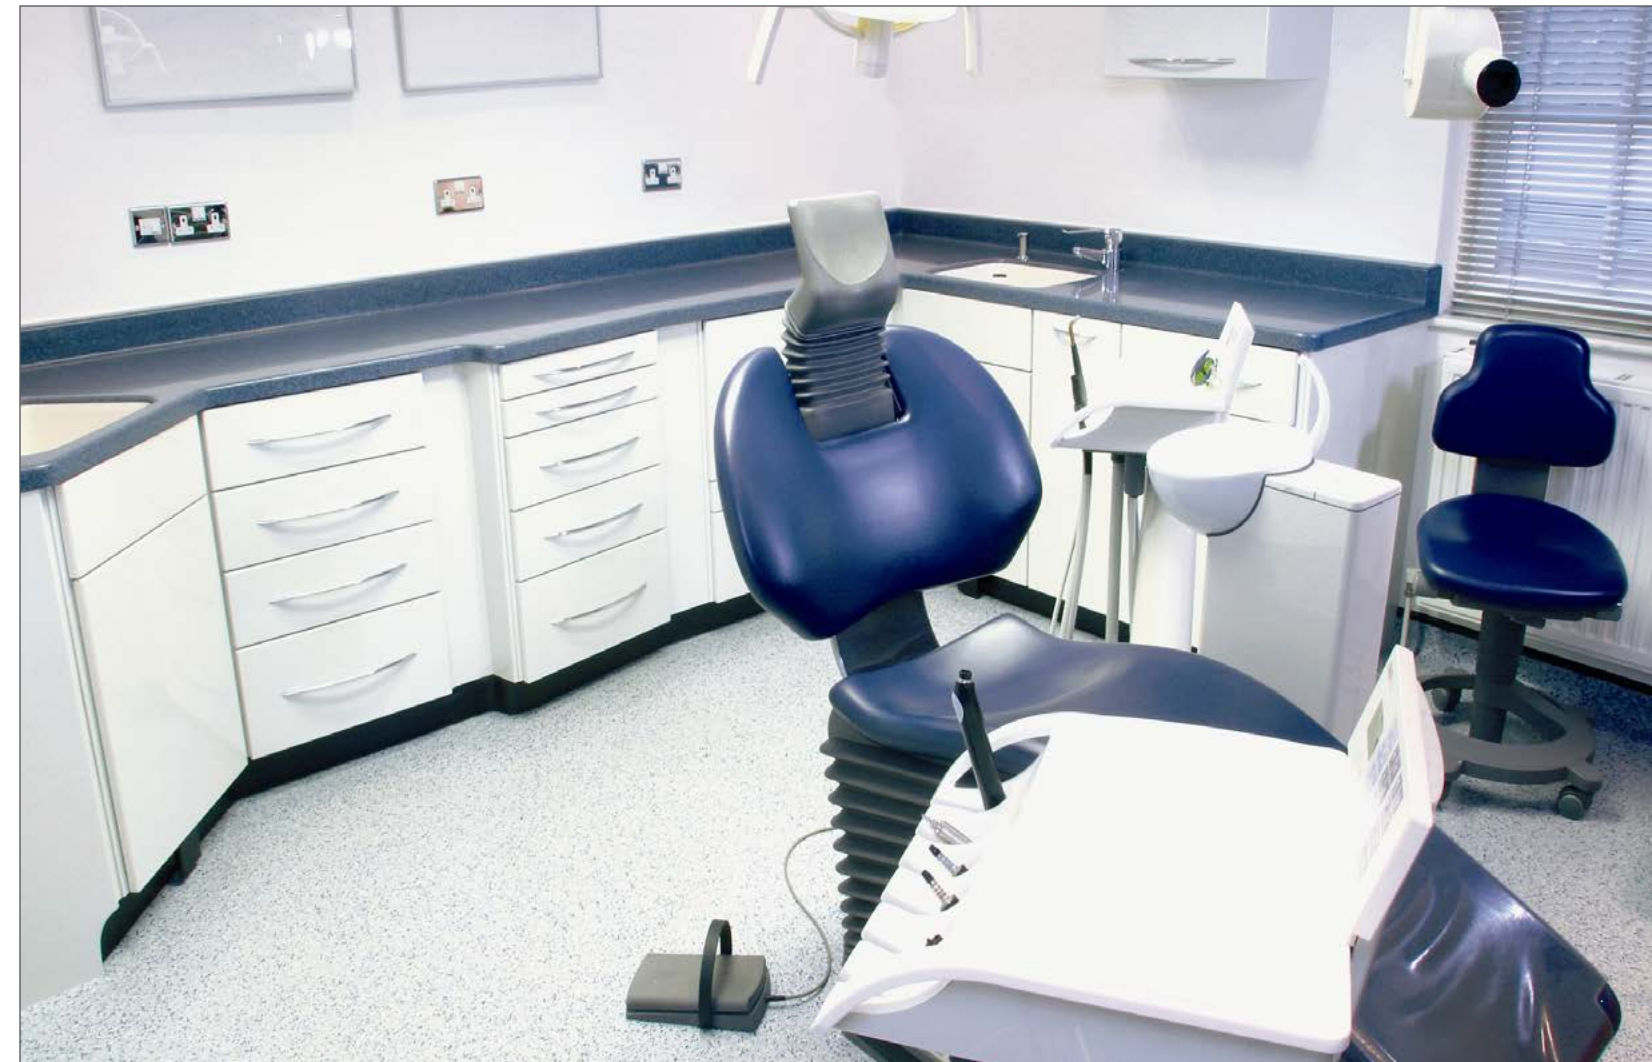

Element Designs' products add style and sophistication to commercial environments while providing durable solutions that withstand constant daily use. High gloss solid acrylic doors and drawer fronts are UV resistant so that the vibrant colors will not fade over time in harsh lighting environments. Our glass doors are an obvious choice for display areas where full visibility is needed but added protection is just as important. Custom color matching and etching capabilities are also available to enhance branded retail interiors where details matter.

COMMERCIAL

Commercial applications often call for designer finishes as well as durability for high traffic areas including conference rooms, healthcare environments and more. Our aluminum, glass and acrylic products are ideal for special applications such as glass markerboards, customized backpainted panels, unique wall sliding systems, cabinet doors and drawer fronts for commercial spaces. The design possibilities are limitless.

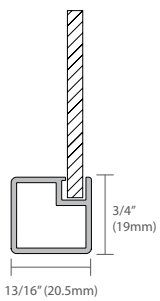

Aluminum Frame Doors

- Fourteen profile options in twelve finishes
 - Over fifty insert options
 - No minimum order quantities
 - Short lead times
- Expedite programs available upon request
- Doors arrive fully assembled and ready to install
 - High quality anodized aluminum
 - Tempered safety glass
 - Unlimited design potential
 - Limited lifetime warranty
 - Made in the USA

Sliding Door Systems

- Sliding door systems for closets, pantries, cabinets and more
- Bottom sliding and top hanging systems for variety of large door applications
- Available as aluminum frame or high gloss solid acrylic sliding doors
- Sliding hardware pre-installed on panels when possible
- Sliding door rails and guides available cut-to-length
- Twelve aluminum frame styles in twelve finishes
- Over fifty insert options
- Divider rail in 3/4" profile available
- Quick lead times
- No minimum orders
- Made in the USA

CD 50 E

- Design Guidelines:
- Floor Sliding System, top guide and bottom track
 - Floor to ceiling and inset casework applications
 - Multiple planes of travel, inset or surface mount track
 - Accommodates doors weighing up to 110 lbs
 - Soft close mechanisms available

DN 80 CF

- Design Guidelines:
- Top Sliding System, top track with floor guides
 - Floor to ceiling, inset casework, & barn door applications
 - Recommended for use with one or two planes of travel
 - Doors weighing up to 176 lbs
 - Soft close mechanisms available

SH 7035

- Design Guidelines:
- Small Sliding System, top and bottom track
 - Multiple planes of travel, inset track only
 - Compatible with narrow frame profiles

CD 30 CX

- Design Guidelines:
- Small to medium Sliding System, top and bottom track
 - Single or by-pass sliding doors, surface mount or inset track.
 - Doors weighing up to 66 lbs

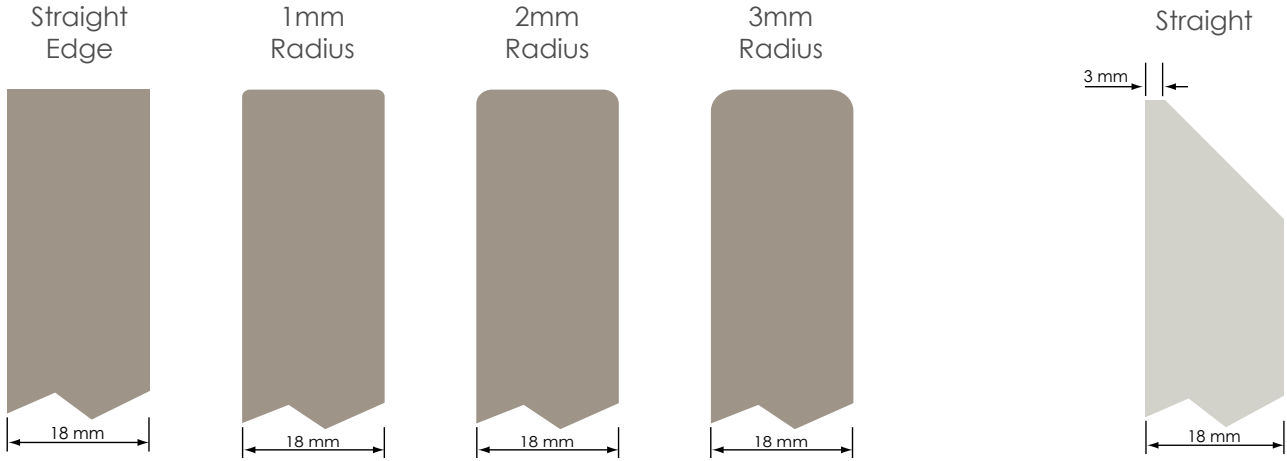

High Gloss Solid Acrylic Doors

- Mirror-like high gloss finish
- Available in a variety of brilliant colors
 - UV and fade resistant
 - Impervious to water
- Ideal for exterior and harsh weather applications
 - Easy to maintain and repairable
 - Environmentally friendly - no VOCs
 - Free of formaldehyde and plasticizers
- Made with recycled material and fully recyclable
 - Doors arrive fully fabricated and ready to install
 - 4mm sheets also available (1m x 3m sheet size)
 - Quick lead times
- No minimum order quantities
 - Proudly made in the USA

Edge Radius Options

- All six surfaces have high gloss finish and are available as finished doors and panels
- Functional and decorative hardware borings will be pre-drilled per specification
- 4mm solid acrylic panels available in full sheets or cut to size pieces for cabinet cladding and appliance applications (*Anthracite, mint and orange only available in 18mm)
- High gloss solid acrylic doors are available with a standard integrated pull option
- Please contact Element Designs for material samples, images may not be exact representations of color.

Backpainted Glass & Markerboards

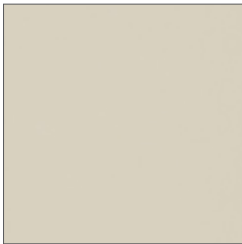

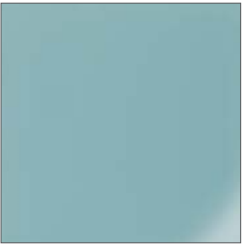

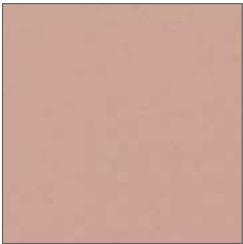

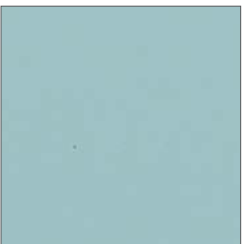

Backpainted Glass

- Custom manufactured to your specifications
- Specially formulated water based paint with low VOC content
 - Furniture quality paint finish with total opacity
- Ten standard colors and 177 non-standard colors
 - Custom colors and metallic colors available
- Low-iron glass in 4mm, 6mm, 10mm & 12mm thickness
 - Available in gloss and matte (acid-etch) finishes
- Edge work options include flat edge polish and seamed edges
 - Tempered glass for safety and strength
 - Custom etching available
 - Proudly made in the USA

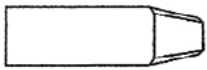

Glass Markerboards

- Magnetic backer option available
- Non-staining and non-porous glass surface
 - Low-iron glass for optimal color clarity
 - Gloss and writable matte finishes
- Durable and safe 4mm or 6mm tempered glass
 - Easy to maintain and scratch resistant
- Easy to install with integrated Z-Clip mounting system
- Magnetic glass can be used as inserts in aluminum frame doors
 - Custom logo and digital image printing available
 - Proudly made in the USA

Colors

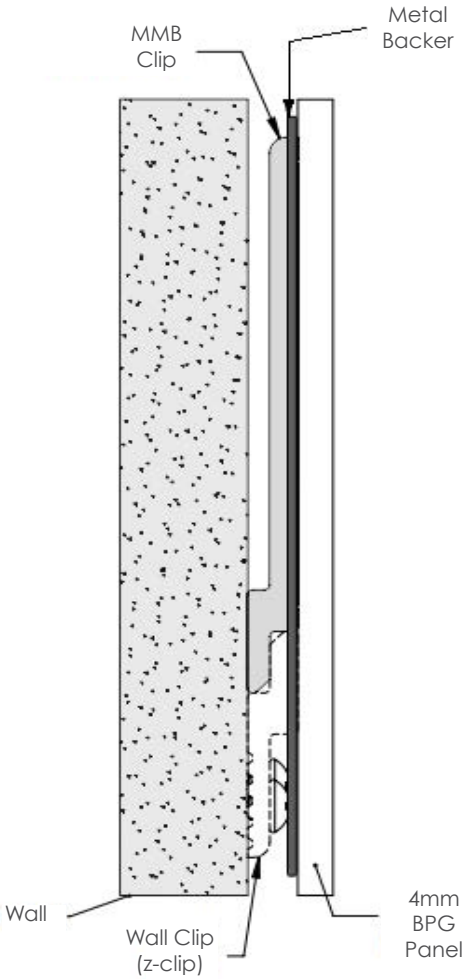

Glass markerboards are available with all of our standard and non-standard colors. Custom color match also available.

Backer Options

Markerboards can be manufactured with magnetic or non-magnetic backer option.

Z-clip mounting system is pre-installed on all boards.

Finishes

Accessories

Magnetic markerboard accessory kit includes eight rare earth magnets, magnetic pen holder and magnetic eraser in white finish.

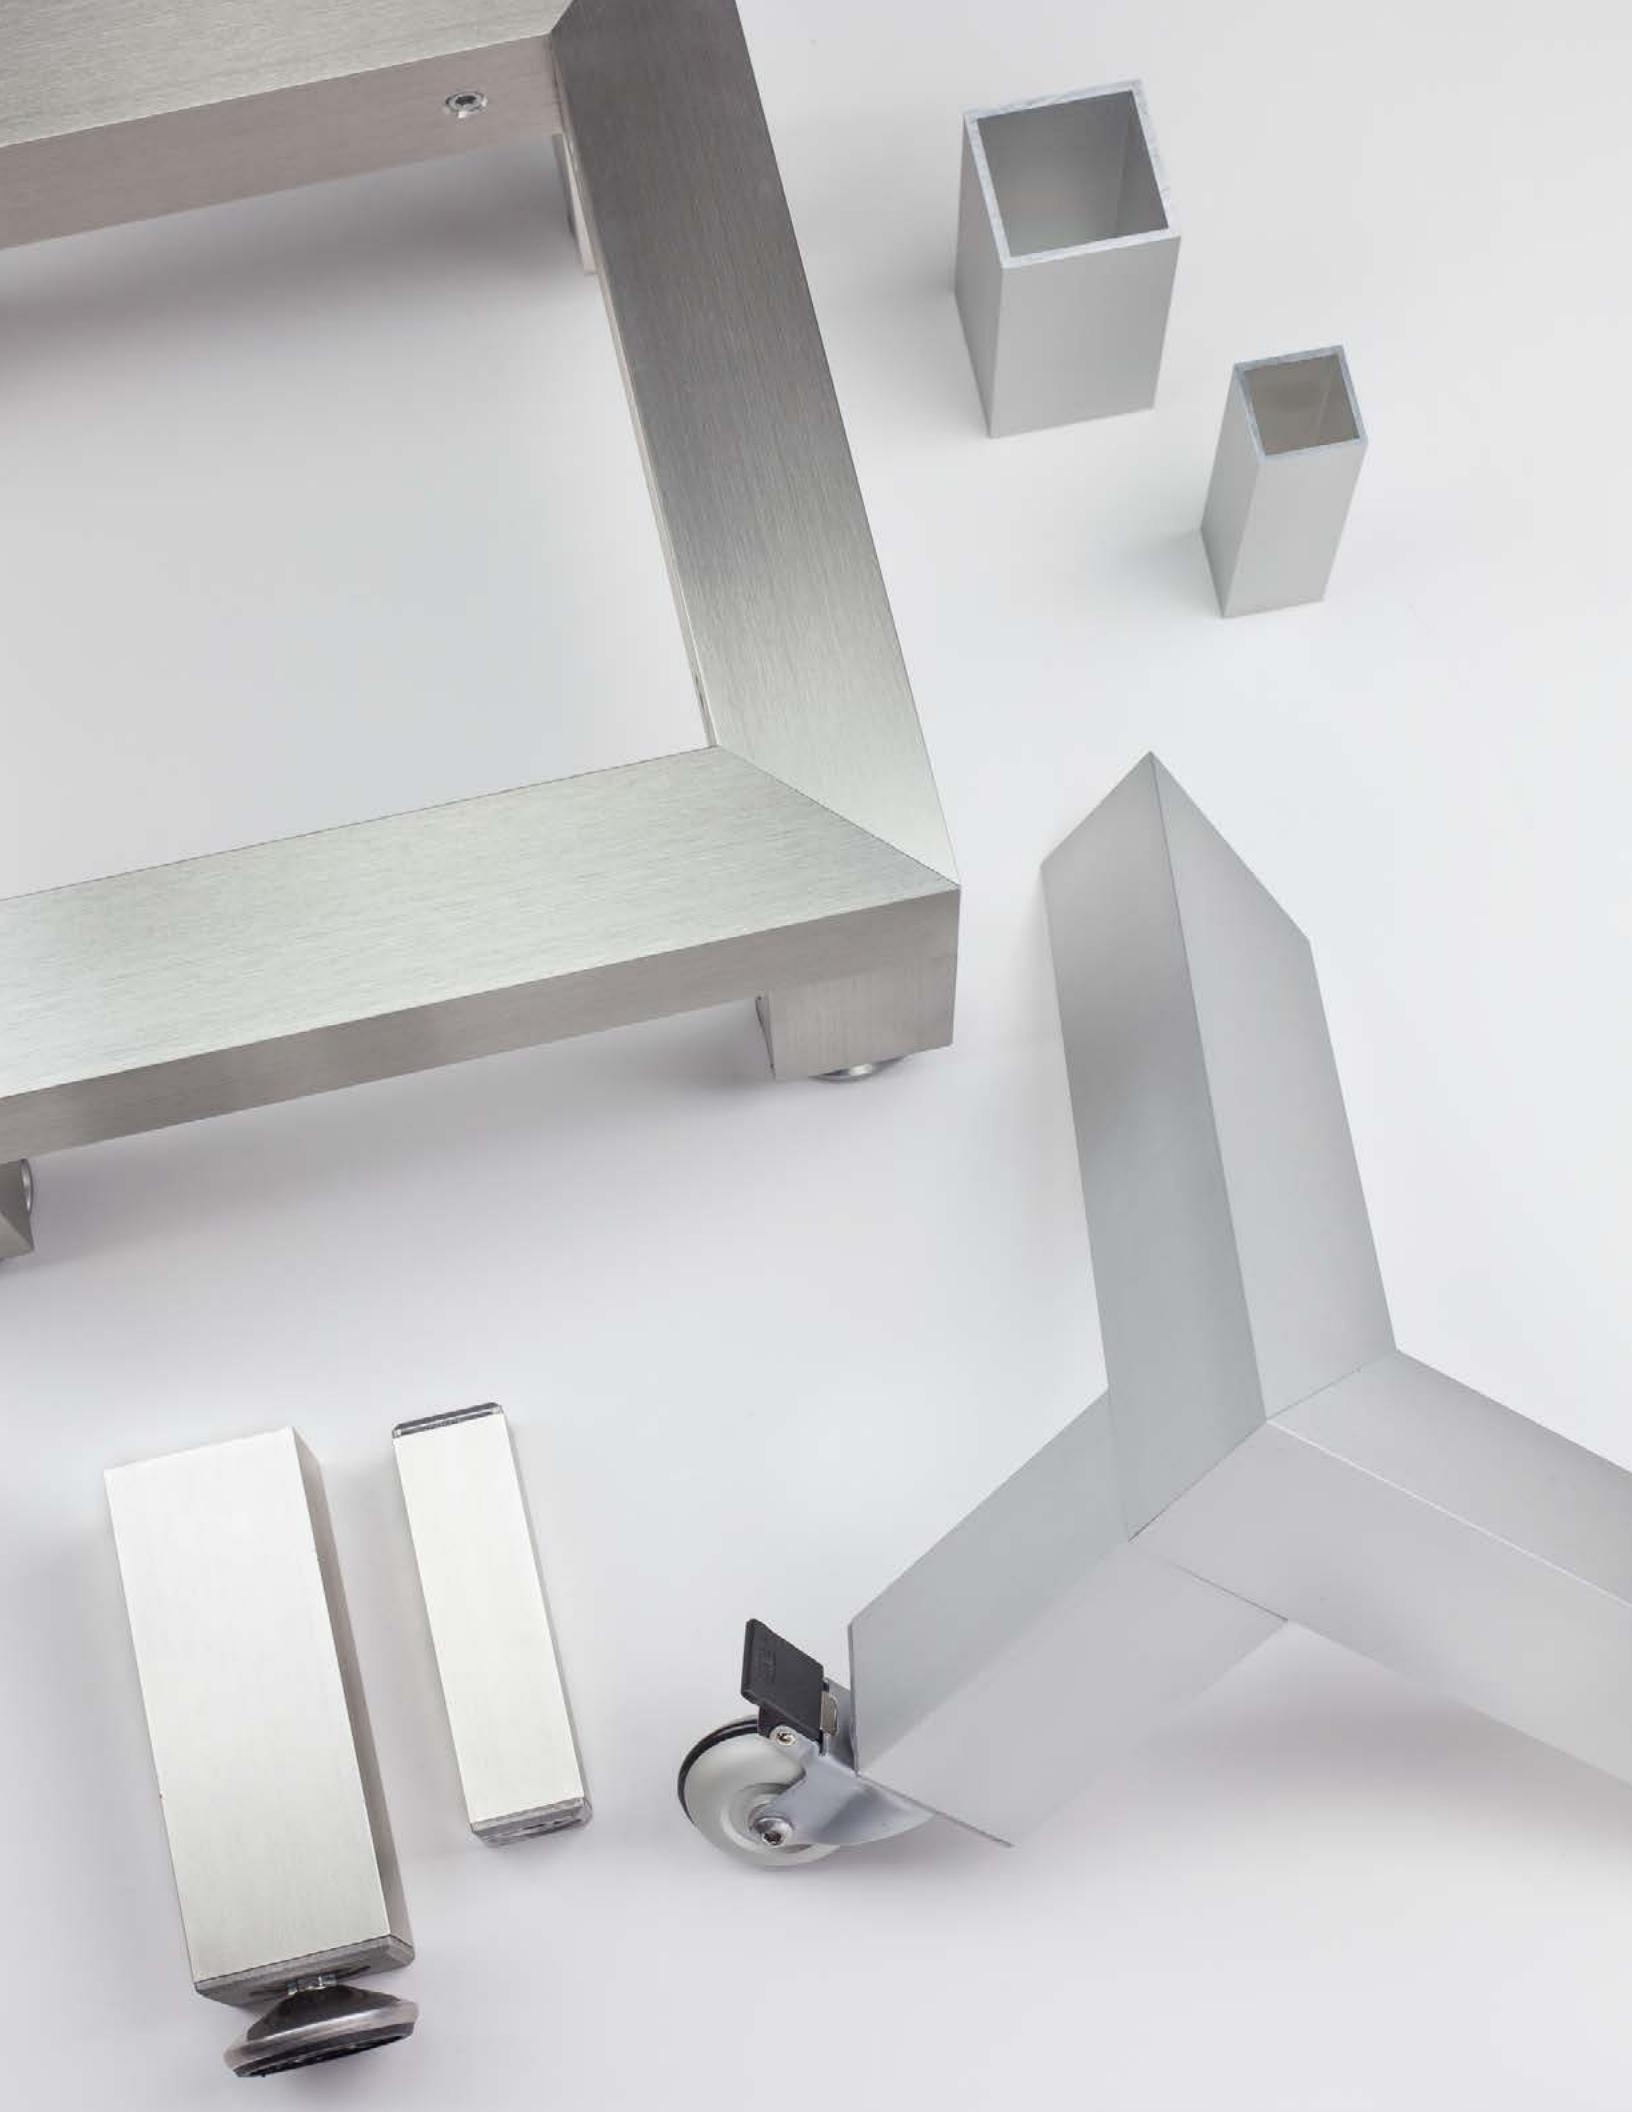

Only rare earth magnets should be used with magnetic markerboards to ensure strong magnetic attraction through the glass.

System Options

AVENTOS HF - Bi-Fold
Two part door front that folds in the center when opening

AVENTOS HL - Lift Up
Single door front that lifts up parallel to the cabinet

AVENTOS HS - Up and Over
Single door front that swings over the top of the cabinet

AVENTOS HK - Stay Lift
Single door front that lifts upward; uses cabinet side lift mechanism

AVENTOS HK-Top - Stay Lift
Single door front that lifts upward; uses easy install cabinet side lift mechanism

AVENTOS HK-S - Stay Lift
Single door front that lifts smaller doors upward; uses cabinet side lift mechanism

AVENTOS HK-XS - Stay Lift
Single door front that lifts upward; uses hinges and cabinet side lift mechanism

Blum AVENTOS lift hardware offers a wide variety of door opening options to suit many design needs. The HK systems lift the door up and open with ease. The HK Top hardware makes installation quick and easy by lining up the lift hardware with the top of the cabinet box, no measuring needed.

Element Designs also provides support for ordering AVENTOS hardware through our online ordering portal, to ensure correct parts are included with each order and doors are drilled correctly depending on your cabinet construction and overlay.

Cam Lock
standard keyed cam lock

Contact Element Designs for additional lock availability.

"Aluminum's inherently sustainable characteristics combined with the extrusion process make extruded aluminum the green building industry's material choice for now and the future."

Reprinted with permission from the Aluminum Extruders Council

Recycled Content All of our glass inserts contain at least 20% post industrial recycled content and the architectural resin uses a high percentage of post industrial material.

Regional Suppliers Our products are manufactured with materials from regional suppliers thus reducing our carbon footprint.

Exceptional Durability Our aluminum products have an extremely long life time and are virtually maintenance free.

No VOCs Our aluminum, glass and acrylic products do not contain VOCs. Because no chemicals or toxins are released from our products, there is zero effect on indoor air quality. Our backpainted glass utilizes water based paint which is low in VOCs and is safe for the environment.

Post Industrial Waste Recycling All of the waste generated during our manufacturing operations (primary materials such as aluminum and glass) is recycled. The aluminum extrusion is taken to a local metal recycling facility. Unusable glass is reused in asphalt production.

Recyclability and Rensability Our aluminum, glass and acrylic materials are completely recyclable. Our aluminum doors can be reused rather than discarded by simply replacing components (new inserts for existing doors).

Reclamation We offer a recycling service for all of our products once their useful life expires. Send your product back to us to be completely and properly recycled.

Packaging Materials Our corrugated edge wrapping, which protects our products in transit, is made of 100% recycled cardboard and our corrugated boxes have a high recycled content.

Company Recycling Both our company and our employees divert waste from our landfills whenever possible. We recycle all cans, glass and plastic bottles, office paper, paper products and cardboard at our manufacturing facility in Charlotte, NC, thus reducing our carbon footprint. We actively promote the importance of environmental responsibility and are proud to sponsor a recycling center for our industrial park.

We would like to thank our customers for use of their images :
