

Everlife™

From MSI

CrystaLux Wearlayer

Just a reminder that one of the great features of our Everlife LVT is the CrystaLux™ wearlayer.

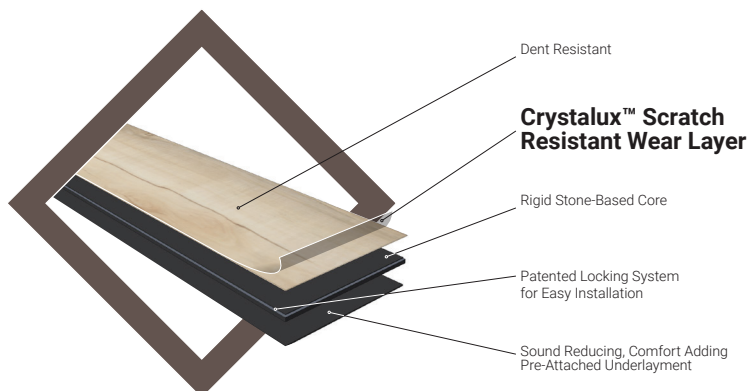

CrystaLux is the name of the wearlayer on each of our Everlife LVT offering.

Wearlayer is the top layer of Everlife LVT, which protects against everyday life—including scratches, spills, pet accidents, and sun damage.

CrystaLux is trademarked and owned by MSI, for exclusive use in Everlife.

Every Everlife product comes with **CrystaLux** wearlayer, and our sales people can feel confident in knowing that **CrystaLux** offers best-in-class wearlayer performance.

Thickness of the **CrystaLux** wear layer is expressed in “mil” unit of measure—not to be confused with millimeter, which is a metric unit of measure for thickness. For example Cyrus has 12mil **CrystaLux** wear layer, and the overall product is 5 millimeters thick.
