OUR COMPANY

STYLED IN ITALY

Atlas Concorde, the founding company of Gruppo Concorde, was established in 1969. As an industry leader, Gruppo Concorde continues to advance the industry, crafting innovative ceramics. Throughout history, our company has leveraged strong leadership, commercial stability and world-class expertise in the style, production and distribution of ceramic and porcelain surfaces. Now Atlas Concorde USA proudly carries the same legacy of entrepreneurial spirit and passion for excellence inherited from our founders.

PROUDLY AMERICAN

In 2016, Atlas Concorde USA became a ceramic and porcelain tile brand created to blend the true American heritage and tradition with Italian cutting-edge design and excellence. Our goal is to enhance living spaces with innovative, locally-inspired surfaces and translating them into American works of art.

QUALITY MATTERS

Our priority is to offer premium quality tiles at the continued high standards that made our brand a recognized leader in outstanding ceramic surfaces all over the world.

A TRUSTED NAME

Since the beginning, Atlas Concorde has been synonymous with strength, ethics and reliability. This helped us to earn the confidence and trust of over 2,700 customers in more than 100 countries, which we continue to build upon in the US.

PEOPLE ARE THE DIFFERENCE

We believe that passionate people and strong values are our greatest assets. Every innovation we bring to market is powered by our people. So, in turn, we invest in our team to continue this culture of excellence.

SUSTAINABILITY

A WORLD OF GOOD

Atlas Concorde USA is focused on providing a smarter, more sustainable choice. Composed of natural materials, ceramic and porcelain tile doesn't require the destruction of other resources. Its unmatched durability translates to an exceptional life-cycle value. Ceramic tile provides more energy efficiency for your space, and it's among the few surfaces that can be salvaged in a major building renovation. Tile has the lowest carbon footprint of any flooring choice because the materials used to make it are generally found within 500 miles of manufacturing facilities, dramatically reducing the energy and emissions that come from long-distance shipping.

Atlas Concorde USA is a US Green Building Council member, producing a recyclable product with low environmental impact. GreenGuard, EPD and HPD certifications are available. Our production process achieves 100% waste water and raw waste recycling. Plus 65% of its energy is self-produced.

UNIQUELY YOU

You are one of a kind. You have a distinctive style and vision all your own.

Atlas Concorde USA provides a vast array of ceramic tiles and decors to help you realize **your unique design aesthetic** - or imagine a new one.

The natural motifs that inspire our ceramic are explored in detail and reinterpreted to take the design to the next level. This passion for perfection, coupled with our innovative attitude **creates products that enhance your life**.

As Atlas Concorde USA focuses on your world, we also keep the bigger picture in view. Our porcelain technology is environmentally friendly, waterproof, stain - scratch - fire-resistant, and completely VOC-free. So, build with confidence knowing your vision is **healthy, safe and durable**.

biophilic

Biophilic design represents the intersection of nature and the built environment. This sought-after trend brings the outside world indoors to create a sense of comfort, tranquility and place. Untouched stone, rustic wood and motifs of flora or fauna achieve a look of texture and energy within residential, hospitality or commercial settings.

modern farmhouse

What began as a look featuring an all-white color palette, shiplap walls, and vintage accessories has grown and matured into sophisticated spaces with cozy yet contemporary elements. We're talking about the Modern Farmhouse style. This style captures original Farmhouse aesthetics but adds modern touches. Think of something old with something new - like distressed, wooden beams above a galvanized steel dining table, or a vintage-style metal bed with a geometric rug below. Modern Farmhouse is all about character, so don't be afraid of mixing timeless pieces with trendy pieces.

bohemian

When you think about Bohemian, words like "eclectic," "carefree" and "full of life" come to mind. The same goes for this interior design style. A home with a Bohemian vibe is full of color and culture. Items purchased from travelling all over the world are proudly on display. Jewel tones are treasured. There is an abundance of plush seating or comfy ottomans. And of course, mixing patterns is key. The Bohemian philosophy is "more is more," unlike other interior design styles. Wood, terracotta and concrete are all common surfaces in a Bohemian setting.

contemporary

While traditional is rooted in classic architectural elements like crown molding and symmetry relating to scale and proportion, Contemporary was the architectural style introduced in the 1970s that really deconstructed everything. In contemporary architecture, symmetry is no longer a player and the rooms themselves become like sculpture and the primary focus.

traditional

Still nodding to symmetry and beautiful details like crown molding, today's "new traditional" is focusing on bolder color and fresh takes on classic patterns in textiles, wallpapers and rugs. While it still incorporates a beautiful antique here and there, there are updated replicas in retail and plush upholstery to celebrate this foundational style to which other styles imitate.

transitional

Transitional style strives to mix traditional elements like antiques or upholstery with modern elements like abstract art and accessories. A home feels more curated in transitional style. Creating a transitional space allows you the freedom to integrate many different styles together while only having to pay attention to scale and proportion.

rustic

When it comes to creating a rustic interior whether it's a mountain home, a farmhouse, or a warehouse loft... It's about emphasizing the rough organic qualities. For instance, in a loft you may have exposed brick, where the mountain home may celebrate an overscale fireplace with indigenous stone and a farmhouse may have reclaimed wood walls or ceilings to create a style of simplicity.

ELEGANCE

AND MATERIAL STRENGTH

The Exist Collection recalls the historical and material prestige of the Bourgogne stone recovered from 16th century castles. This material mixes the look of aged cement with the look of a Provencal stone, timeworn with visible signs of craftmanship. An overall look which conveys natural elements influenced by urban details. Exist is suitable for multiple interior design styles and applications.

INDUSTRIAL

STRENGTH STYLE

Atlas Concorde USA makes it easy to achieve an industrial aesthetic, coupled with the simple, durable benefits of ceramic. Forge delivers the worn and weathered artistry of metal recreated with a style that delivers a strong, urban personality. This cutting-edge design fuses colors that suggest steel, iron, aluminum and tin along with patterns reminiscent of stains, scratches and oxidation. The tiles, mosaics and decors appear to be metal plates, bent and slightly hammered.

THE TILE

IN TEXTILE

The inspiration for this unique series is cut from the same cloth as natural linen fabrics applied to chalk panels for a timeworn, textural, concrete look.
Embrace the warmth and comfort of textile paired with the simple maintenance of ceramic.
Newly enriched graphics weave in a metallic-glossy effect with more contrast and luminescence.
Fray now offers all the most sought-after sizes, as well as inspiring new decors with three fresh mosaic patterns.
The collection also now features an extended neutral tones range of color.

NATURAL STYLE

SPRINGS FORTH

Inspired by vein-cut travertine, one of the most popular stones in architecture, Path adds warmth and naturalness to any space. The soft palette of colors and patterns are reminiscent of the natural artistry from underground springs and rivers that form this classic stone. The swirling, shifting surface effects draw attention to Path's reserved, subtle dignity – adding prestige without overwhelming the room.

AUTHENTICALLY

RUSTIC

Traditional at first glance, Ridge is the peak of genuine personality.
A detailed study of stone yielded this rustic translation with inserts of character.
The raw, natural look is the cornerstone of simplicity, comfort, and rock-solid beauty.
The veins and signs of Ridge are enhanced by the Row Mosaic,
which combines different size tiles for a dynamic display.

THE ELEGANCE

OF MARBLE, THE BOLDNESS OF STONE

The Rooted Collection mixes the two most decorative
and rich in graphic materials for interior design.
The marked veins of marbles are combined with the bold appearance of soapstone,
creating a unique look which gives every venue a modern yet urban touch.
The overall aspect is timeworn and scratched, with a wide color palette
which includes dramatic modern shades like white and dark gray
and more traditional ones like ivory and medium gray.
The result is a product rich in details that is suitable for different spaces,
from industrial residential to rustic commercial.

REFINEMENT

AND AUTHENTICITY

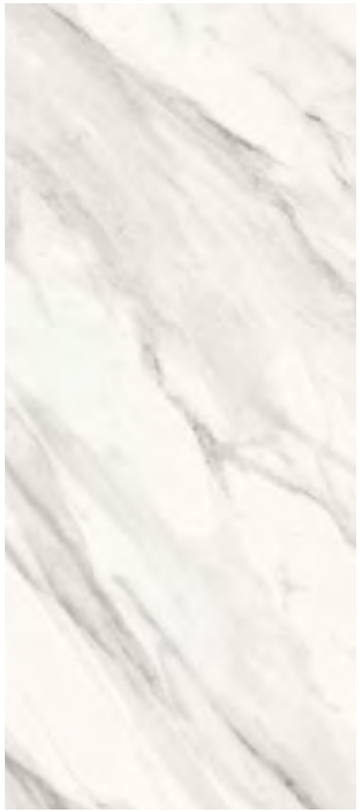

The Trilogy collection mixes a refined selection of the most sought-after white marbles quarried from the most renowned sites in the world: Italy and Greece. Shades represent the common theme between these precious stones which have been carefully selected for their bright white color and gray veins that vary depending on the original material, giving each a unique appeal and enhancing its own identity. Thanks to the reputation and the look of the natural stone, marble-look surfaces can be matched with different types of interior styles, from the most classic and elegant to the modern ones.

V-SHADE, SHADE VARIATION

The V-Shade classification indicates the color shading level of a product, that is to say the chromatic and/or surface variation among tile of the same collection. A strong color shading is typical of ceramic collections that reproduce natural stones and marble. A moderate color shading is typical of ceramic collections for which a homogeneous chromatic surface is an aesthetic feature of contemporary design.

V1 UNIFORM APPEARANCE	Differences among pieces from the same production run are minimal.
V2 SLIGHT VARIATION	Clearly distinguishable differences in texture and/or pattern within similar colors.
V3 MODERATE VARIATION	While the colors and/or texture present on a single piece of tile will be indicative of the colors and/or texture to be expected on the other tile, the amount of colors and/or texture on each piece may vary significantly. It is recommended that the range be viewed before selection.
V4 SUBSTANTIAL VARIATION	Random color and/or texture differences from tile to tile, so that one tile may have totally different colors and/or texture from that on other tile. Thus, the final installation will be unique. It is recommended that the range be viewed before selection.

ref. ANSI A137.1-2008

NOTES
For aesthetic Classes V1 and V2 there should be minimal visible box-to-box variation present between boxes labeled with identical shade values.
Tile with a V3 or V4 aesthetic class may exhibit box-to-box variations. However, these products shall have a continuos natural blend.

LAYING SUGGESTIONS

LAYING SUGGESTIONS

Before starting the installation process, make sure the laying surface is well cured, flat and completely clean.

RECOMMENDED ADHESIVES

The use of an appropriate adhesive is essential for a correct installation. For the installation of ceramic tile You should follow the laying instructions provided by leading adhesives manufacturers. You should choose the most suitable adhesive on the basis of the following factors:

- type of bed;
- type and size of tile;
- use of tiled surface (floor/wall; indoor/outdoor);
- weather conditions at the time of laying;
- waiting time before the ceramic surface can be used.

USE TYPE OF BED	TYPE OF TILE TYPE	RECOMMENDED ADHESIVES EUROPEAN STANDARDS EN 12004
INDOOR WALL TILE		
Cementitious plaster or mortar Plaster (plaster or panels, following application of a suitable PRIMER) Painted walls (only if the paint is firmly anchored)	white body wall tile porcelain stoneware tile	Improved cementitious adhesives resistant to slip and with long open time (Class C2TE – EN 12004)
Cast concrete Plasterboard Waterproofing in bathrooms and showers Existing ceramic tile	white body wall tile porcelain stoneware tile	Improved cementitious adhesives resistant to slip with long open time and deformable (Class C2TE - S1 - EN 12004)
INDOOR FLOORS		
Cementitious screeds Existing cement floors (cement concrete, bush-hammered) Anhydrite screeds (following application of a suitable PRIMER)	porcelain stoneware tile	Improved cementitious adhesives with long open time (Class C2E - EN 12004)
Concrete floors - Heating floors Existing ceramic, terrazzo and natural stone floors Waterproofing in bathrooms	porcelain stoneware tile	Improved cementitious adhesives with long open time and deformable (Class C2E - S1 - EN 12004)
OUTDOOR FLOORS		
Cementitious screeds Concrete floor Layers of waterproofing	porcelain stoneware tile	Improved cementitious adhesives with long open time and highly deformable (Class C2E - S2 - EN 12004)
OUTDOOR WALLS		
Cementitious plaster	porcelain stoneware tile	Improved cementitious adhesives resistant to slip with long open time and highly deformable (Class C2TE - S2 - EN 12004) (*)
Concrete cast in situ or prefabricated	porcelain stoneware tile	Improved cementitious adhesives resistant to slip with long open time and highly deformable (Class C2TE - S2 - EN 12004) (*)

(*) For large size tile laid at a height of more than 10 ft, certain international regulations specify that tile should be laid using a mixed system of adhesive and mechanical fixtures chosen in relation to the weight of the tile, height of the tiling and site conditions.

When laying at low temperatures or if rapid use of the tiled surface must be guaranteed, you are recommended to use rapid setting improved cementitious adhesives (Class C2F – EN 12004).

BACK TO INDEX

CLEANING AND MAINTENANCE

SPREADING THE ADHESIVES AND LAYING THE TILE

Spread the adhesive on the bed using a suitably toothed spatula.
Press down well on the tile to ensure wetting of at least 70% of the total surface.
When laying tile in commercial interiors or outdoors, it is vital to apply the adhesive using the double spreading technique to avoid empty spaces in the ceramic tile-bed interface.

RECOMMENDED GROUTS

It is important to use a grout appropriate for the use to which the ceramic surface will be put.
You should follow the instructions provided by leading grout manufacturers.

USE	RECOMMENDED GROUTS EUROPEAN STANDARDS EN 13888
Residential interiors	Improved cementitious mortars for joints (Class CG2 - EN 13888)
Damp interiors (bathrooms, showers, swimming pools, ...) and outdoors	Improved cementitious mortars for joints with low water absorption (Class CG2 W - EN 13888) obtained with the addition of a suitable liquid additive
Commercial premises	Improved cementitious mortars for joints with high resistance to abrasion (Class CG2 Ar - EN 13888) obtained with the addition of a suitable liquid additive
Premises requiring total hygiene and resistance to chemical agents (kitchen work surfaces, food industry, hospitals, supermarkets, etc).	Epoxy mortars (Class RG - EN 13888).

ELIMINATING EXCESS GROUT

To correctly and easily eliminate excess grout, follow the instructions given by the grout manufacturer. In general, proceed as follows:
Cementitious grouts
When the grout becomes opaque (normally after 10-20 minutes), clean with a hard cellulose sponge using movements on a diagonal to the joints. It is important to respect the drying time to avoid removing the grout from the joints.
Epoxy grouts
When the mixture is still fresh, wet the surface with plenty of water, emulsifying with a Scotch-Brite® pad, paying attention not to empty the joints.
The residual grout liquid can be removed with a hard cellulose sponge (to be replaced when excessively soaked with resin).
It is vital to remove epoxy grout rapidly before it starts hardening as it is extremely difficult to remove subsequently. If the epoxy grout has started to harden, try adding 10% alcohol to the washing water.

FINAL SITE CLEANING

After a few days, eliminate residues with a commercial Scotch-Brite® pad, brush or single brush floor cleaner (for large surfaces).
For walls, use a neutral detergent in hot water.
For floors, use a mild acid wash diluted according to the type of surface (smooth or textured). It is important to protect marble or metal inserts previously with adhesive tape.
Rinse with abundant clean water to eliminate all marks or residues from the joints.
If necessary, repeat the acid wash at a higher concentration, unless there are marble or metal inserts. Do not use diluted commercially-available acids.

CLEANING AND MAINTENANCE[1]

ROUTINE MAINTENANCE

You are recommended to use ordinary neutral detergent diluted in water.
Avoid using acid or alkaline products, waxes and/or impregnants and metal pads (iron or steel sponges).
In the event of heavy dirt or particularly textured surfaces, use an alkaline detergent and rinse after washing.
For large surfaces, the use of a floor washing machine is recommended.

EXTRAORDINARY MAINTENANCE

In the event of dirt resistant to the ordinary cleaning, use a suitable detergent for the particular kind of dirt.

TYPE OF DIRT (resistant to ordinary maintenance)	DETERGENT/SOLVENT
Coal, lime efflorescence, chalk, metal marks, rust, graphite, emulsion paint	Acid detergents*
Coca cola, coffee, wine, beer, ice cream	Alkaline detergents
Resin, silicon or mechanical oils, candle wax, paint	Solvents
Tyre marks, sole marks, sucker marks	Alkaline detergent in an abrasive paste

*** Important: Acid products may corrode marble, granite, natural stone and metal. Avoid using in the presence of decoration or inserts in these materials.**

[1]WARNING

The suggestions and advice given above are the fruit of research, laboratory tests and many years experience.
However, the cleaning characteristics of the materials may vary significantly depending on the laying method, conditions of use, type of surface and environment. Generally speaking, the higher the non-slip characteristics of the tile, the more difficult they are to clean.
The maintenance and cleaning operative should always test each cleaning method empirically in advance (if possible on a piece of the material not laid)
In the case of particularly heavy use (for example, mechanical workshops or environments with a heavy presence of oily residues and tyre marks), incorrect laying or inappropriate cleaning, Atlas Concorde USA declines all responsibility for the effectiveness of cleaning and maintenance operations.
Atlas Concorde USA can under no circumstances be held responsible for events, damage or defects caused by incorrect laying, negligent cleaning and maintenance or the use of materials and adhesives inappropriate for the use.
