Acoustical Product additions 2020

Hear yourself think[®]

In an office, proper room acoustics is a key factor to work performance and employee well-being. In a classroom, acoustically impaired settings lead to decreased attention and reduced cognitive ability. In a restaurant or auditorium, acoustically uncomfortable spaces can spoil the best occasion. It is difficult to imagine any well-designed interior space used for communication and social interaction that does not take acoustic performance into account.

The Unika Vaev Acoustical Collection provides multiple functional and aesthetical acoustical ceiling, wall, floor and movable standing screen solutions that effect sound absorption, sound diffusion and sound isolation in a wide range of interior spaces.

Our purpose is to minimize noise distraction while maintaining the benefits that human interaction brings to work and social environments. In short, we wish you to “Hear Yourself Think”.

Acoustic Panel Prints by Unika Vaev Design Studio

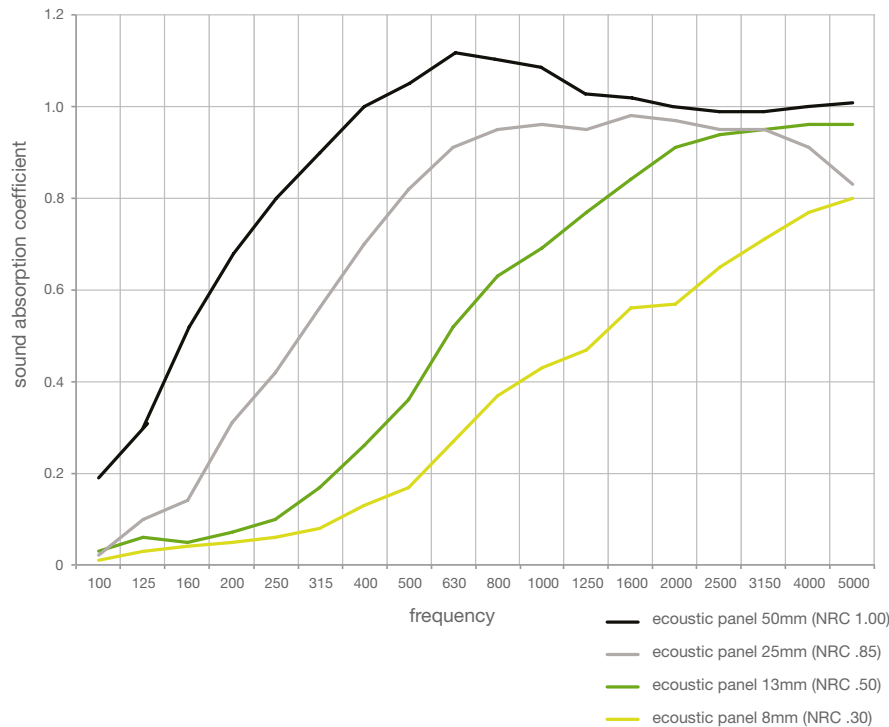

Bring in a piece of art, a logo or a message, to create a better soundscape for any space with Unika Vaev Design Studio's Digital Print Program. The program employs state of the art, high-resolution digital printing upon our Solid Color Core absorbing panels. Select any high-resolution photography or create your own custom graphics or signage to create a beautiful sound absorbing impactful design. If you choose to go for an image art piece, check out Unika Vaev's large library of images on our website, or provide your own. Maximum print size on one panel is 48" x 96". Larger expanses can be achieved through Unika Vaev's Custom Design Studio. NRC rating .40. Environmental compliant with Oeko-Tex, Prop 65, Declare label, HHI and HPD.

ecoustic® Loop Print by Instyle

Ecoustic® Loop is an acoustic panel print designed by Tom Skeehan. This felt faced, hand silk-screen print, is designed to reduce and control reverberated noise in building interiors such as open plan workspaces, bars, restaurants, theatres, convention centers and public spaces. The Loop print is available in six colorways.

The Ecoustic® Panel achieves an NRC rating of between .30 – 1.0 depending on the panel thickness, and the Ecoustic® Screen has a NRC of 0.5. The Ecoustic® Loop composition is 100% PET (up to 65% recycled content) and is certified by HPD and Global Greentag. Also environmental compliant with HHI and EPD.

ecooustic® V Panel & Tiles by Instyle

Ecooustic® V is a collection of acoustic panels and tiles with an elegant aesthetic and acoustic performance. The collection is available in nine timeless designs, three solid color core thicknesses, six sizes, and a variety of colors for ultimate design flexibility.

The panels can be installed both vertically and horizontally. NRC rating between .30 – .95. Designed for the environment, the Ecooustic® SC panels are low VOC, Oeko-Tex certified and recyclable. Also environmental compliant with Prop 65, HHI, Declare label, Global Greentag and EPD.

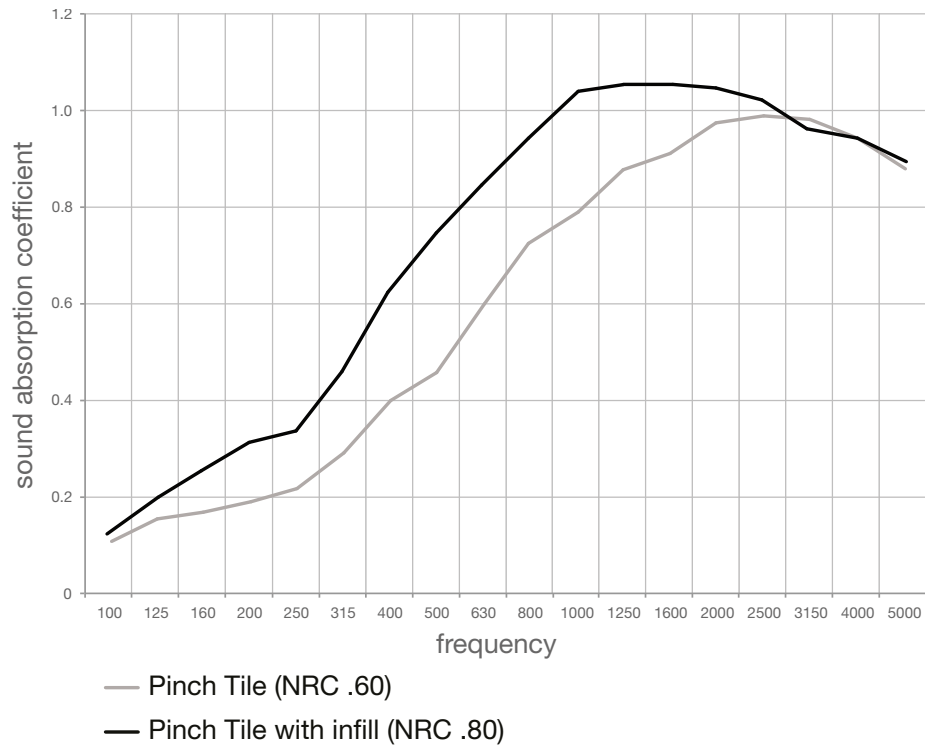

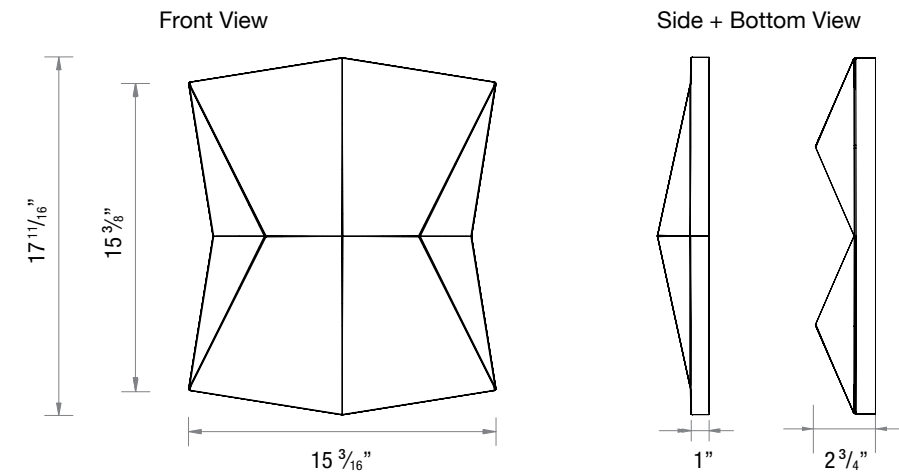

ecoustic® Pinch Tile by Instyle

The Pinch Tile design is inspired by geometric abstraction, the crisp topography of Pinch creates form and shadow depths evoking the sculptural influences of Expressionism, Cubism and the Bauhaus. The interwoven arrangement of Pinch tiles and irregular perimeter provides a dynamic visual arrangement. Available in 34 colorways.

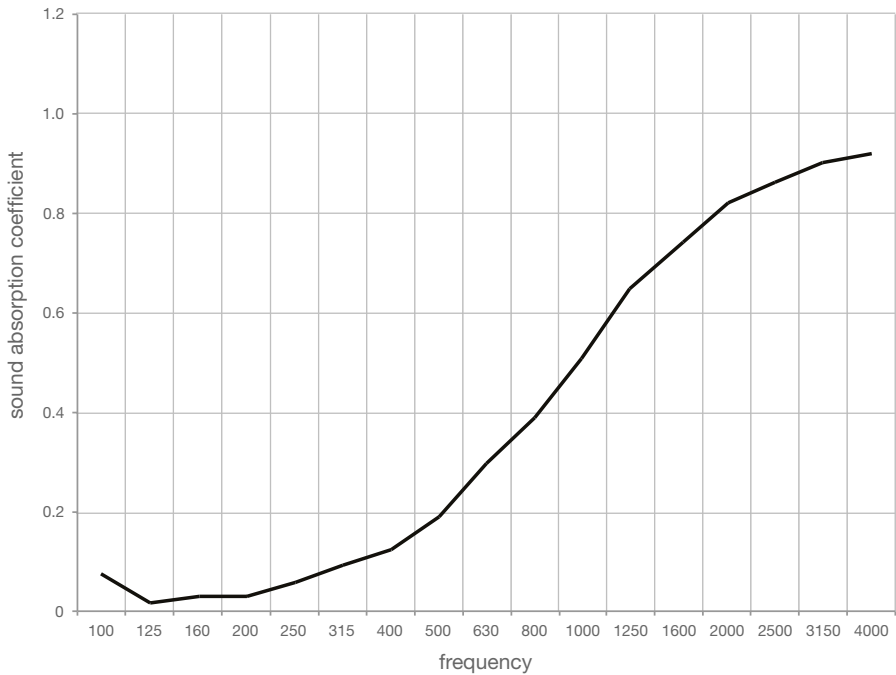

Ecoustic® Pinch achieves .60 NRC, and .80 NRC with included Ecoustic® infill. Produced with 100% PET with up to 23% recycled material and the tiles are low VOC. This tile is certification by Mindful Materials, Declare label, Global Greentag, HHI, EPD and HPD.

Design Studio Tile Collection by Design Studio

The Unika Vaev Design Studio Tile Collection of self-adhesive tiles are now available in four new shapes; Brick, Hexagon, Triangle and Waves. These tiles will tease your geometric temptations with unlimited installation options. The tile collection is designed with the 12mm thick Solid Color Core in eleven color-ways. Custom felt tiles are also available with an option of 34 color-ways of felt. The tiles can be applied on almost any wall substrate and installation is quick and easy. The tiles can be recycled, emit no VOC's and comply with California section 01350. The tiles are environmental compliant with Mindful Materials, HHI and HPD. NRC rating .40.

Acoustic Fins by Unika Vaev Design Studio

Acoustic Fins (baffles) are available in three shapes: Angle, Curve and Rectangle. The fins attach to a ceiling grid with the use of the TClip™ with easy installment without any need of tools - you will just need a ladder. Anyone with a ladder can easily install the Acoustic Fins. Simply insert the TClip™ into the grid on each side of the tile in the existing ceiling options. There is no need to take the existing ceiling tiles out of the grid! The Acoustic Fins work both with 9/16" and 15/16" grid profiles. The fins are available in four sizes - 4" x 24", 6" x 24", 6" x 48" and 8" x 48", and the fins are made of .47" thick solid acoustic core. The Acoustic Fin material has a NRC of .40. The NRC of any baffle system depends on how many baffles are placed on the ceiling, the distance between the baffles, the size of the baffles and the shapes of the baffles. The Acoustic Fins are packed in boxes of 24, and are available in 11 colors. Environmental compliant with Oeko-Tex, Declare label, Mindful Materials, HPD and has low VOC.

Acoustic LED Tiles by Unika Vaev Design Studio

The Lineal LED Ceiling Tile collection maximizes the benefit of LED lighting within an elegant, acoustic inverted coffered ceiling tile. Designed to enhance traditional lighted ceiling tiles, the placement of the LED light patterns within each is designed to create excellent task lighting for work clusters or any area requiring a more conducive work environment. Lineal is available in three designs; Lines, Logical and Random.

The Spot Drop Ceiling Tile collection provides decorative lighting solutions that are both dramatic and pragmatic. The collection includes several designs of a focus and flood version of acoustic lights. The Spot Focus tiles are designed to provide focused lighting in areas such as conference rooms where direct downlighting may be required while allowing the peripheral areas to be darker to support video-based activities. The Spot Flood tiles provides lighting for broader areas. Both Focus and Flood are available in four designs. Custom light patterns are available upon request.

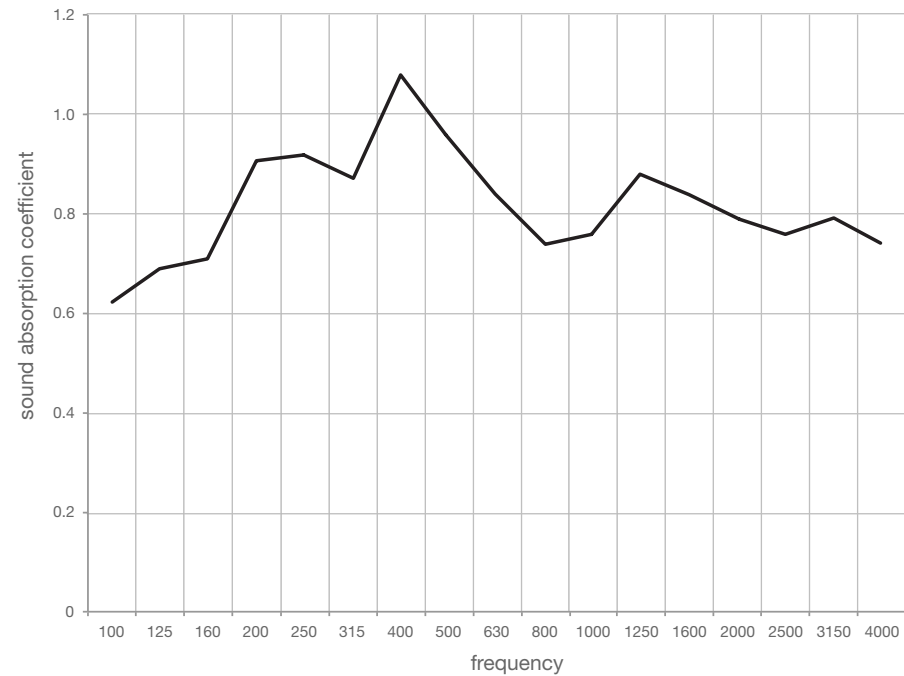

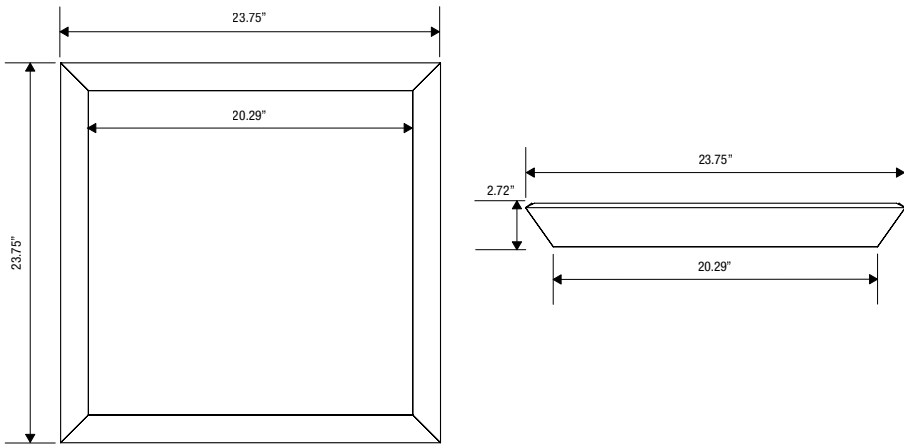

The Spot Drop Ceiling Tile and Lineal LED Ceiling Tile collection is available in eleven color-ways produced with Solid Color PET. The tiles are 24” square. The tiles can be recycled, emit no VOC’s and comply with California section 01350. All lighting is UL approved. Also environmental compliant with Mindful Materials, HHI and HPD. NRC rating .85 with an 8” air gap.

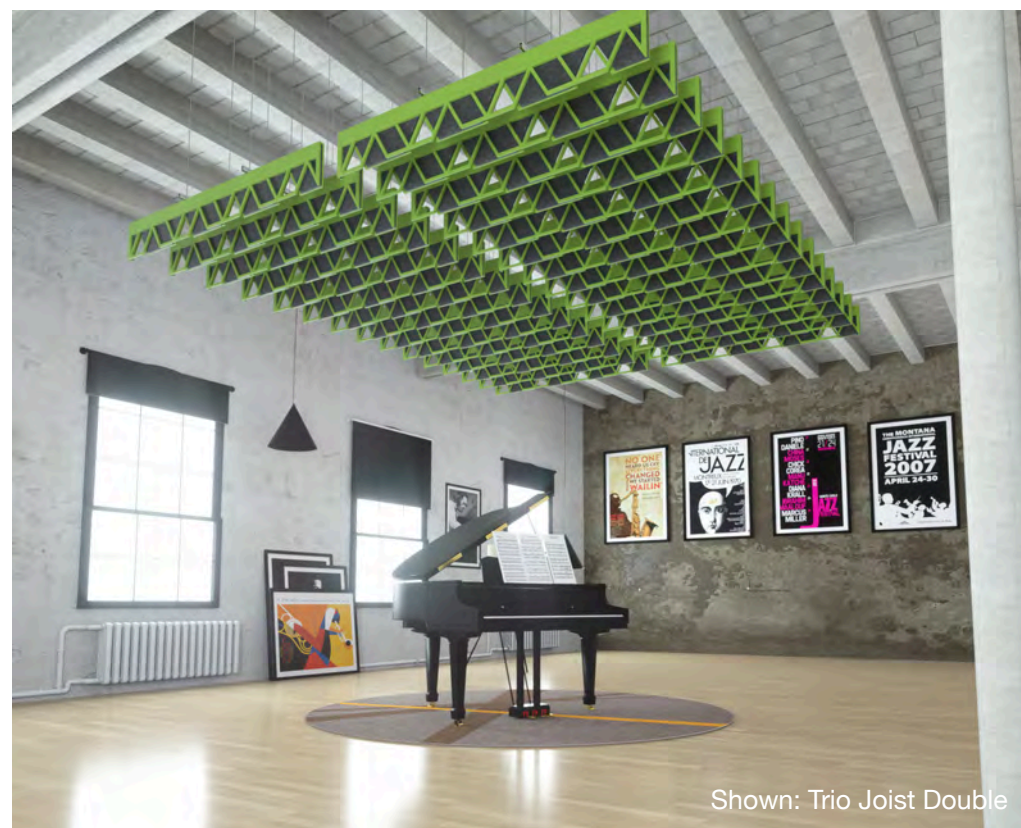

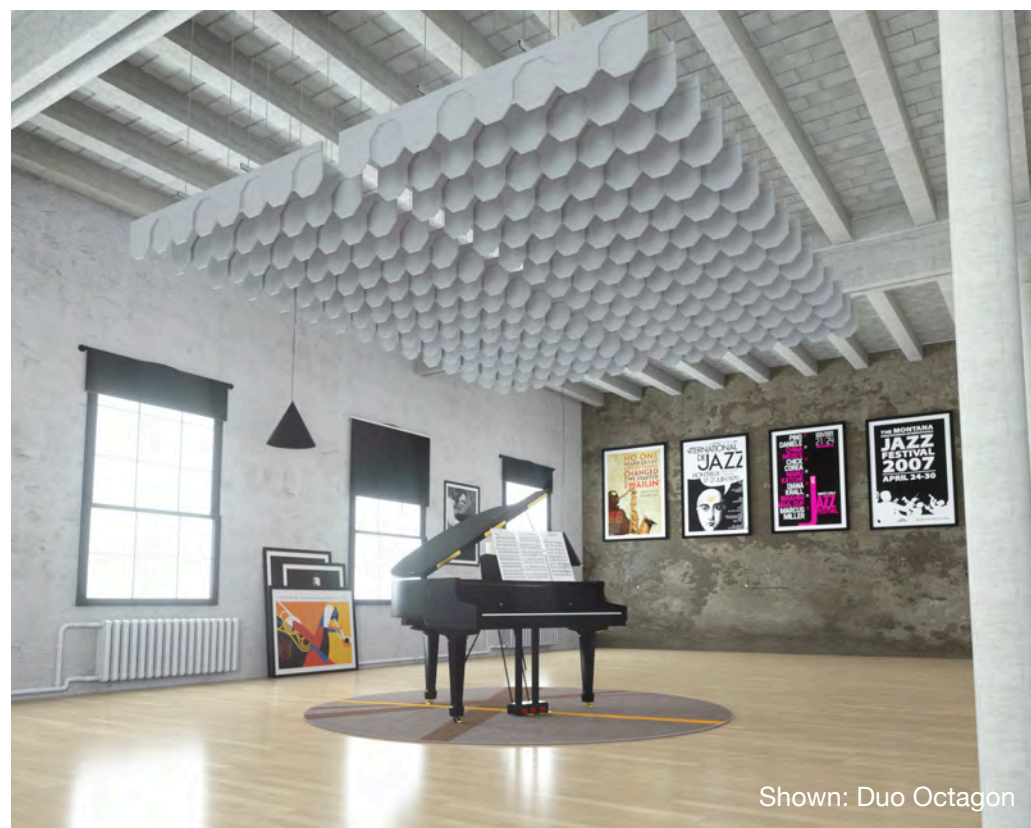

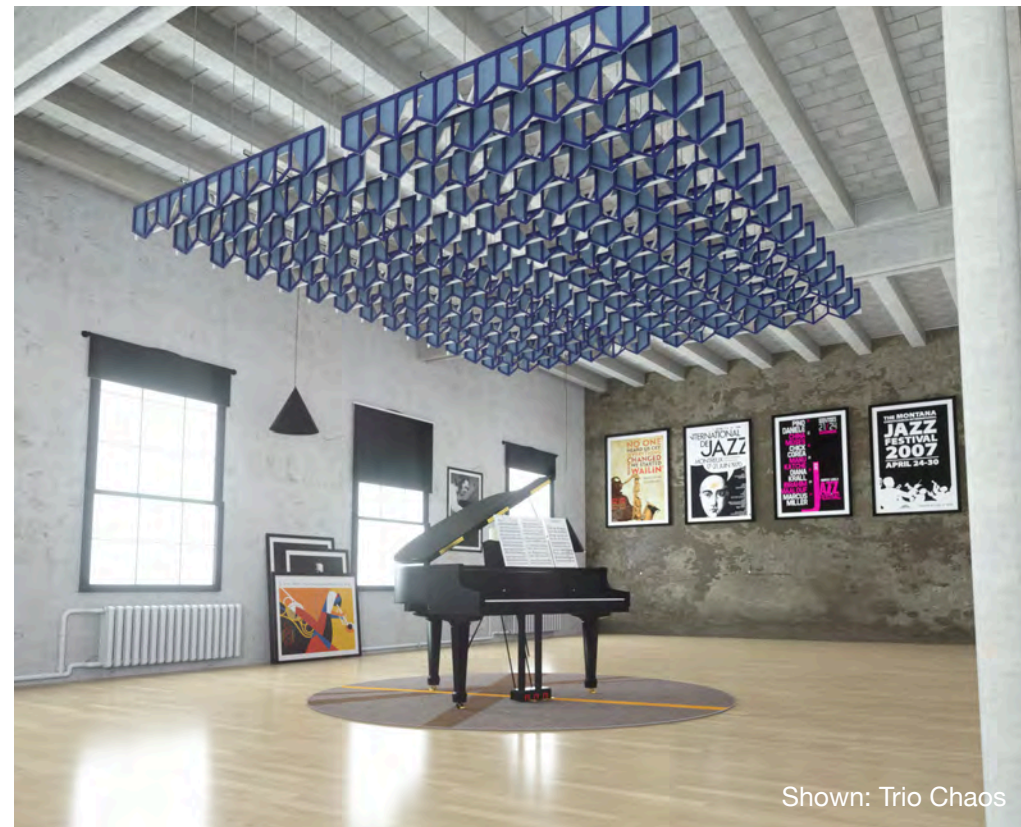

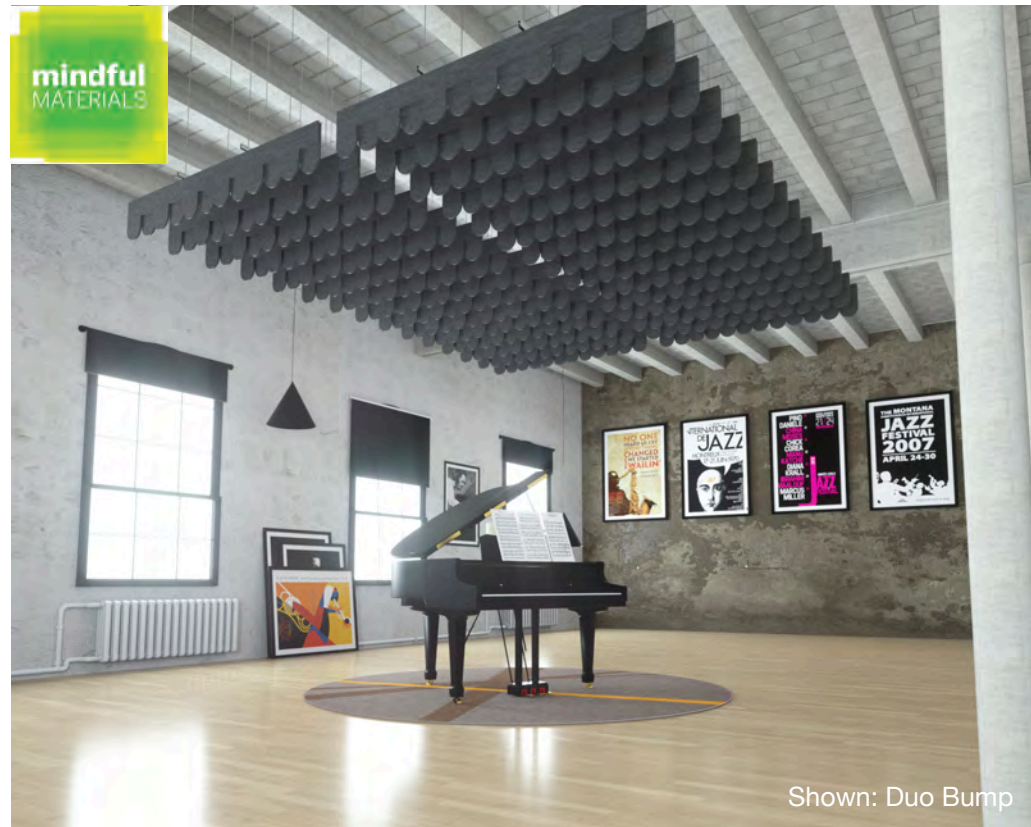

Coffered Ceiling Tiles by Unika Vaev Design Studio

The Coffered Ceiling Tiles Collection has been designed to provide an elegant sound absorbing solution. The square 24" x 24" tiles are available in three depth options and 11 color-ways of Solid Color Core. The tiles can be installed as a traditional coffered tile or can be reversed to hang below the ceiling to create dramatic visual elements. These tiles can be combined with Unika Vaev's LED inverted coffered ceiling tiles to create beautiful upgrades within any drop ceiling. The tiles can be recycled, emit no VOC's and comply with California section 01350. The ceiling tiles are also approved and published with Mindful Materials, HHI and HPD. NRC rating .85 with an 8" air gap. The medium extruded tile is shown in the drawing below.

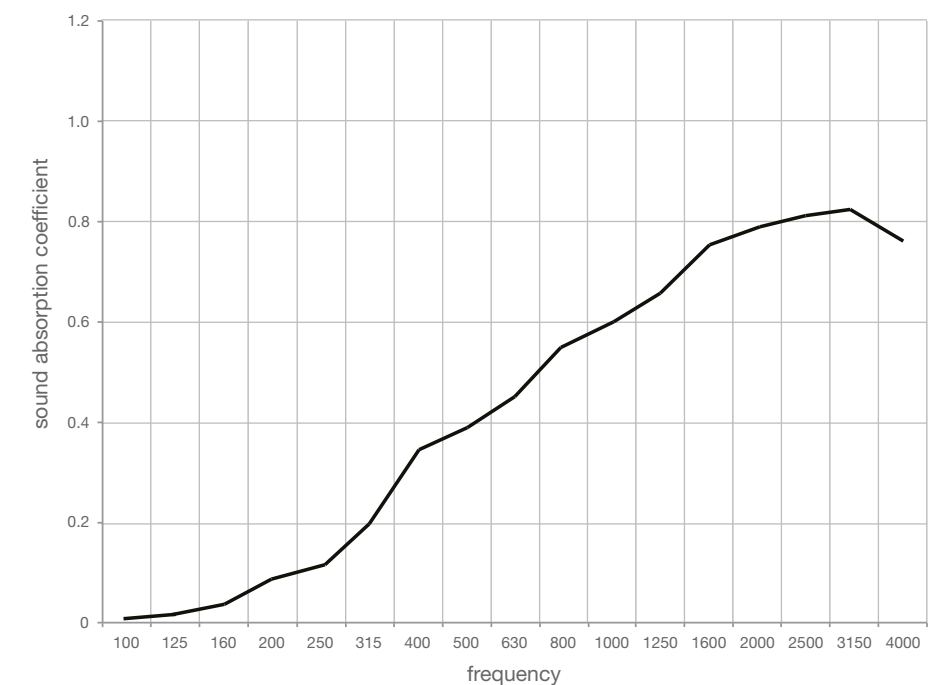

Duo & Trio Baffles by Unika Vaev Design Studio

The design intent of Duo and Trio is based upon the idea that a ceiling can serve as a palette without sacrificing its core intent. Through the use of opposing lines, inspirational patterns emerge.

Duo's two layer, single color design is based upon a negative/positive pattern which results in a three-dimensional effect. Produced using two layers of Solid Color Core Panels, Duo is available in eight patterns and eleven color-ways.

Trio's unique, three-layered design results in stunning color combinations among five patterns. The use of opposing patterns creates a multi-dimensional affect that highlights any ceiling. Trio can be specified using one or two colors to enhance the design. Allow Trio to serve as the palette for your ceiling canvas! Trio is available in five patterns and eleven color-ways of Solid Color Core.

Trio and Duo can be installed beneath an existing drop ceiling grid using Unika Vaev's proprietary T-Clip™ system or installed using Unika Vaev's proprietary grid system for open plan ceiling decks. The baffles are 54" wide, 12" high in 12mm thick Solid Color Core. The baffles can be recycled, emit no VOC's and comply with California section 01350. The baffles are also approved and published with Mindful Materials. Also Environmental compliant with Oeko-Tex, Prop 65, Declare label, HHI and HPD. NRC rating .75 with 8" spacing between the baffles.

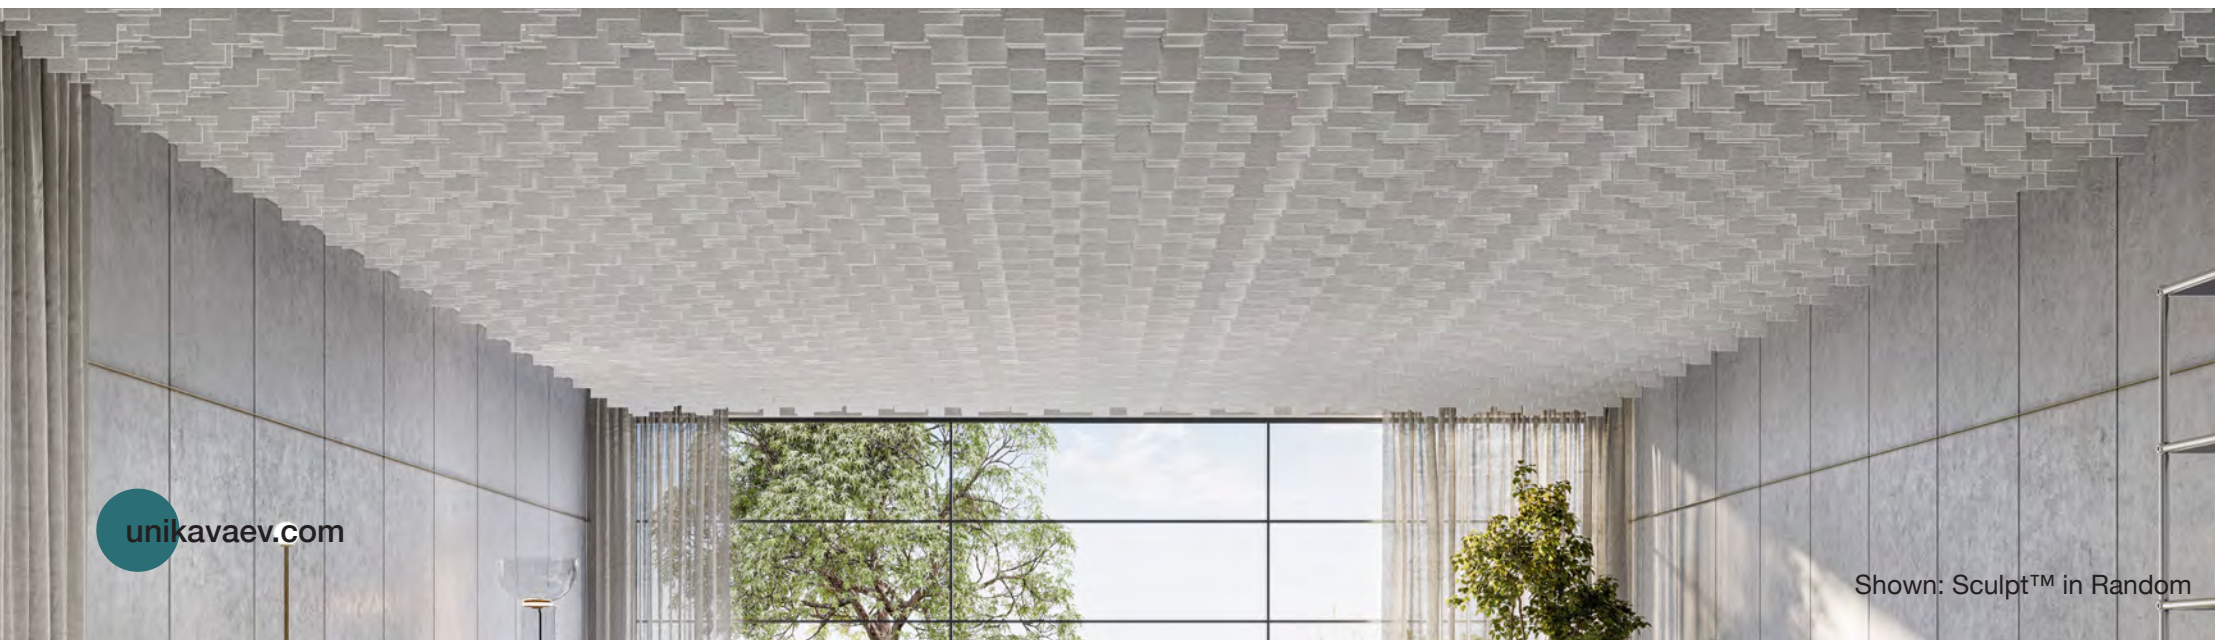

Shown: Sculpt™ in AddSubtract

Shown: Sculpt™ in Fort

Shown: Sculpt™ in Random

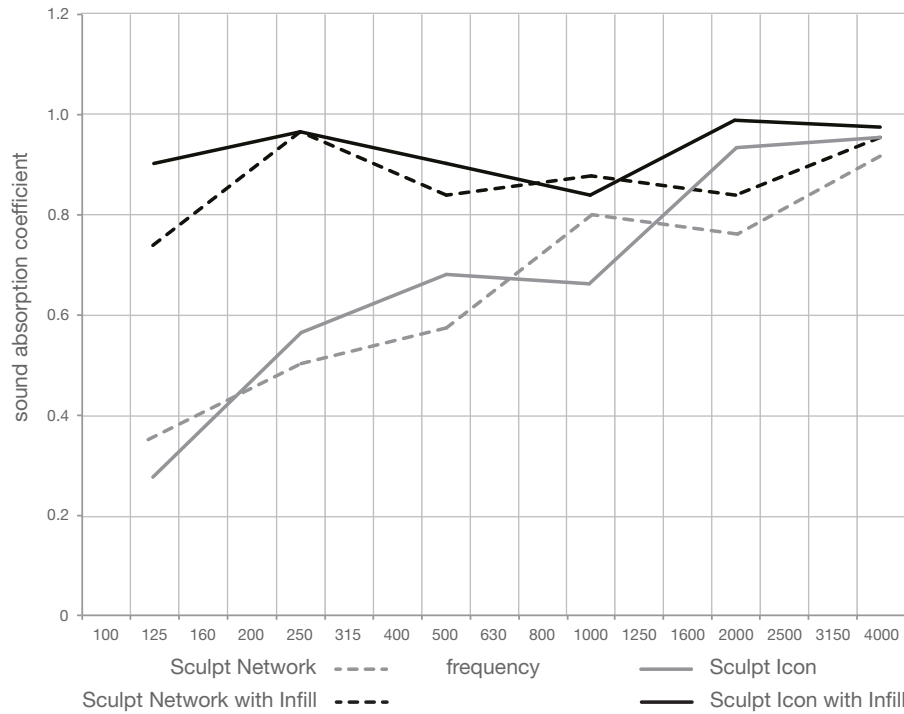

ecoustic® Sculpt™ by Instyle

Three new refreshing designs; AddSubtract, Fort and Random compliment the Ecooustic Sculpt™ Collection. The collection is now available in 15 different design profiles. The tiles are designed for easy installation in standard or slimline drop ceiling grid systems. Sculpt™ adds character and elevates design to any interior space. Available in 15 colorways. The tiles are ecooustic™ SC PET panels that achieve a NRC rating between .65-.75 for all Sculpt™ profiles. The Sculpt collection is certified to comply with Oeko-Tex, Prop 65, Mindful Materials, HPD, HHI, Global Greentag, Declare label, and is certified low VOC.

The Sculpt™ AddSubtract design evolved from creating a positive form from a negative extraction. The individual profiles are similar to an architectural battlement that are found in the shielding walls and towers of medieval castles. The profile utilizes equally spaced intervals so when installed as a collection of four tiles they create a square formation moving in and out. The tiles are ideally suited for a large ceiling installment to capture the form of the design.

Sculpt™ Fort is a stepped and inclining profile similar to an architectural fortress. When installed as a collection - of two to eight tiles - the Forte profiles create diamond formations which begin to move in and out. The tiles are suited for a small and large ceiling installment.

The Sculpt™ Random profile design creates acoustic absorption within the profile shape and also in the absorptive PET composition of the tile. Each tile profile can be positioned randomly which results in a wide variety of ceiling patterns.

Safe Signage by Unika Vaev Design Studio

Workplace safety is very important. The COVID-19 virus has disrupted the day-to-day business routines across the country. Our Open For [Safe] Business™ Signage package helps protect and remind your employees and customers to observe safe practices to keep us healthy and protected. The signs are fast and easy to install without any tools needed using Unika Vaev’s patent-pending T-Clip™ that are attached to each sign. The signs can be installed in any 2’ drop ceiling grid and are easy to move around existing sprinklers and lights. The signs are sold in a box kit of 20 signs with seven different messages that will offer direction to your employees in today’s changing office requirements. Open For [Safe] Business™ Signage was designed with the environment in mind. Each sign is produced with 100% fire tested, low VOC, color-fast, recycled polyester. The signs are lightweight, approximately 24" x 24", 1/2" thick, and printed on both sides. Custom signs are available through Unika Vaev’s Design Studio. Environmental compliant with Prop 65, Mindful Materials, Declare label, HHI and HPD.

Sky Acoustic Collection by Unika Vaev Design Studio

The Sky Acoustic Collection celebrates the more whimsical elements of design. Paying homage to the beautiful things that we enjoy seeing outdoors in the sky, Unika Vaev's collection of sound absorbing Sky products are easily hung from any ceiling. Available in three designs, and eleven color-ways, these products are sure to delight! The Paper Airplanes, Birds and Butterflies are made of 12mm Solid Color Core. The Sky Acoustic products can be recycled, emit no VOC's and comply with California section 01350. The collection is also approved and published with Mindful Materials. Also environmental compliant with Oeko-Tex, Declare label, HHI and HPD. NRC rating .75.

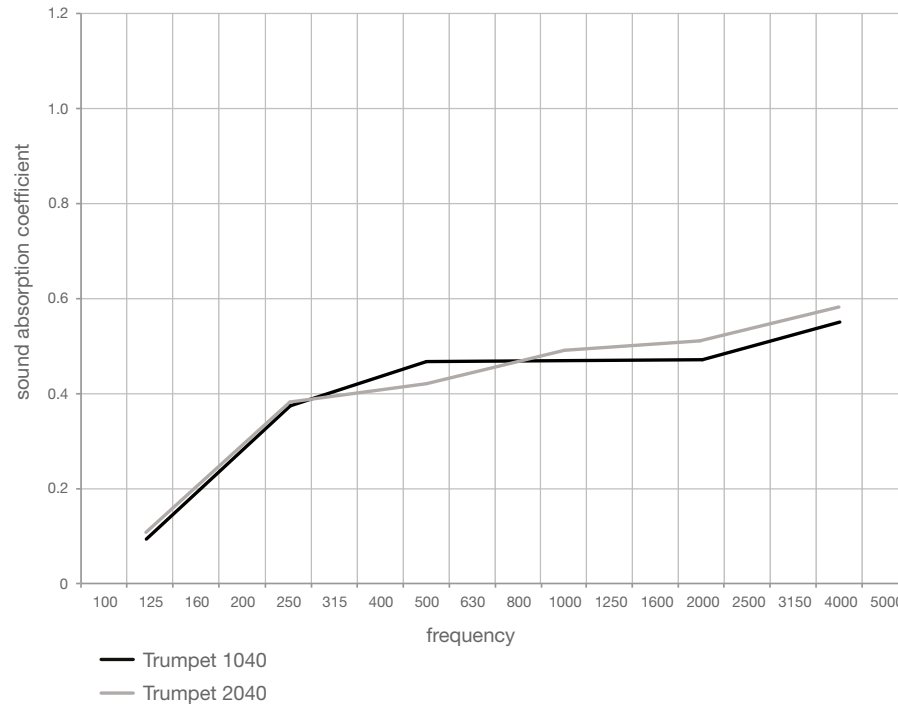

Shown: Birds

Trumpet by Abstracta

Trumpet functions as an inverted trumpet reducing noise while providing soft lighting. Trumpet is remarkably thin, resulting in an aesthetic elegance to any space while contributing to noise reduction. Trumpet was designed for a dining room in an Andorra ski-resort, which, on an average day is filled with 400 energetic kids with ski boots. Trumpet is designed by Cutu Mazuelos and Eva Prego for Stone Designs. Their design is influenced by Japanese and Scandinavian culture. Like many of their designs, Trumpet is characterized by simplicity and a careful attention to detail.

"It is not an acoustic panel with LED lighting. It's a lamp with acoustic properties", states Cutu Mazuelos.

Trumpet has a solid wood body and an acoustic core made from recycled waste fabrics and used PET bottles. Trumpet comes in two standard sizes in a wide selection of fabrics and colors. Custom sizes are also available. NRC rating .40-.45.

Screens

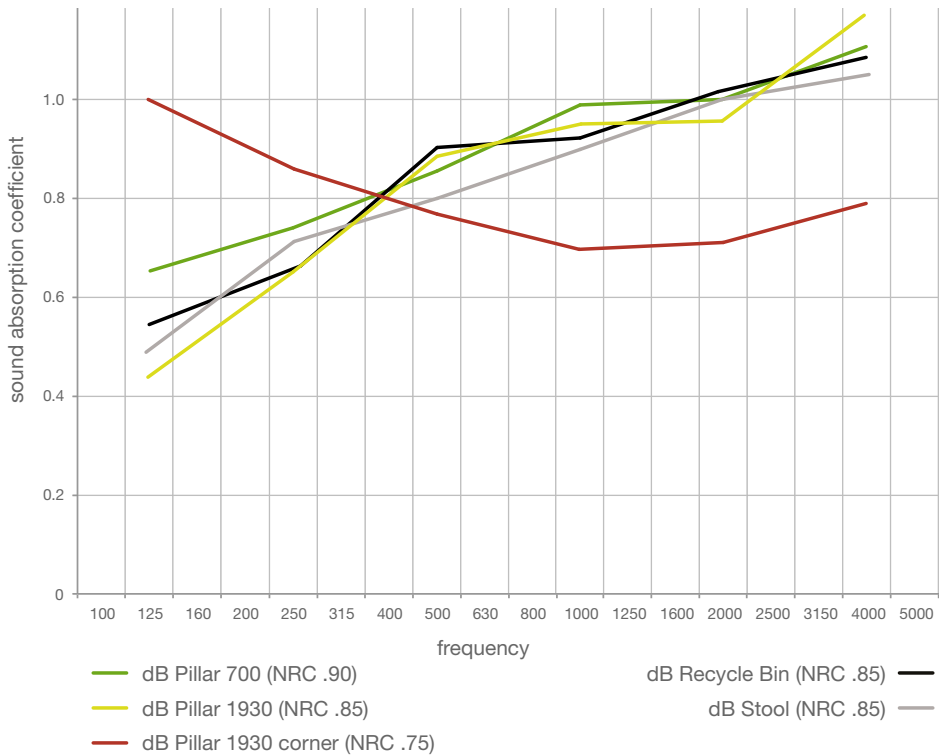

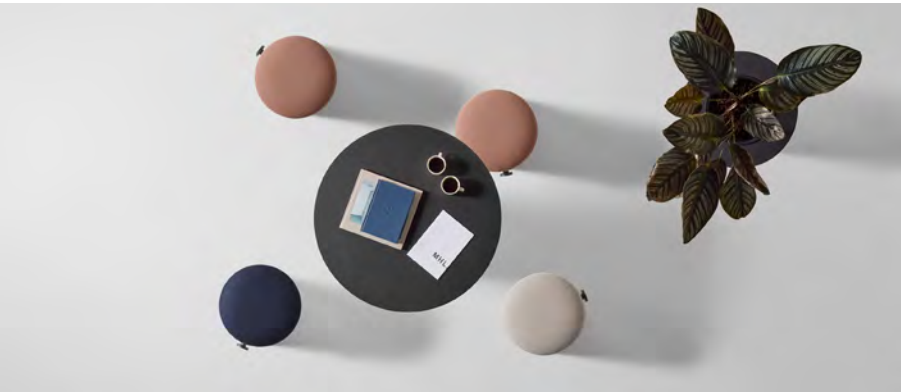

dB Pillar Collection 45

Design Studio Desk
Screen Collection 47

dB Pillar Collection by Abstracta

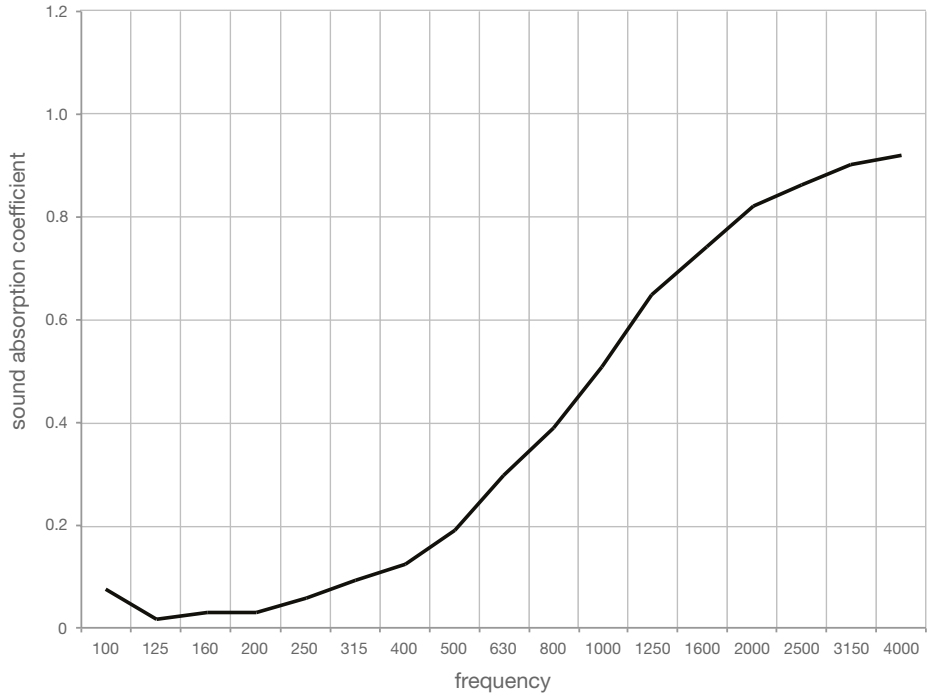

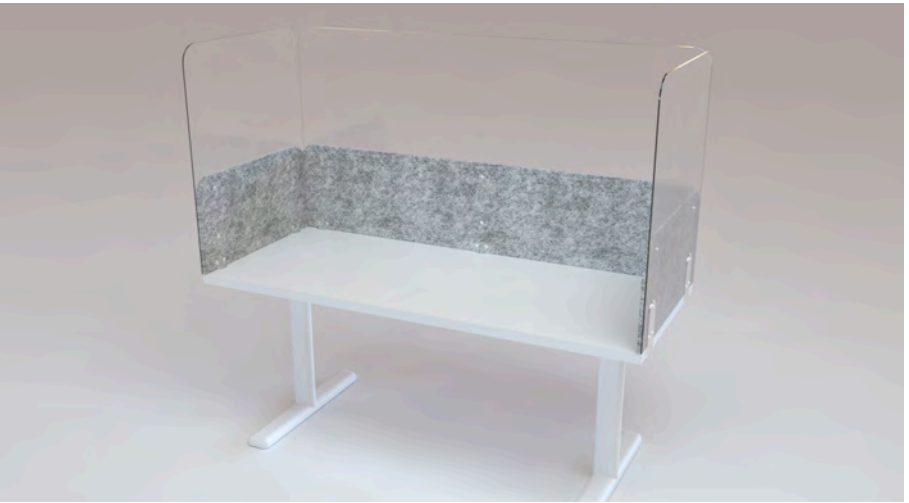

The dB Pillar Collection is a game-changer in the field of acoustic furniture. In combination with the material and the pillar design, the collection employs unique acoustic features that radically reduce the level of low frequency noise. dB Pillar is also unique from an environmental viewpoint, the pillars are filled with textile scraps from Abstracta’s factory. The Swedish designer Thomas Bernstrand explores the potential of an essential element of architecture to add new value and function to a space: The pillar. Since antiquity, the pillar has been used as support for buildings but also as an ornament or a monument. Thomas Bernstrand’s version of the pillar makes a playful reference to the latter. dB Pillar includes tables, stools, and pillars available in various heights and features. The products are available in a wide selection of fabrics and colors all with low VOC. Environmental compliant with Mindful Materials, HHI and EPD. The tables include power outlets for phones and laptops.

Desk Screen Collection by Unika Vaev Design Studio

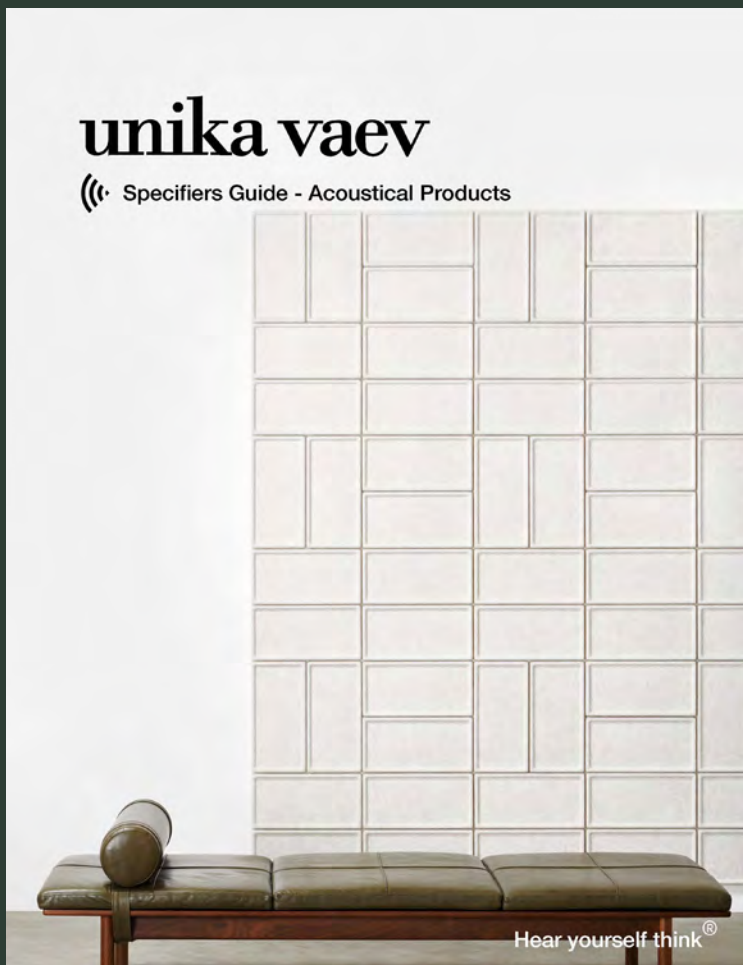

The Unika Vaev Design Studio Desk Screen Collection is designed to provide solutions that address privacy, safety and ease of installation. The collection includes solutions for top of the desk and above/below the worksurface. Additional options include acrylic screens to provide addition social distancing solutions. You can choose between a wide variety of sizes, edge details and mounting hardware options. The collection solves any space planning issues with ease. Custom sizes are available upon request. Available in 11 color-ways. The screens are made of 100% Solid Color Core 12mm panels. The Desk Screens can be recycled, emit no VOC's and comply with California section 01350. The screens are also approved and published with Mindful Materials. Also environmental compliant with Oeko-Tex, Prop 65, Declare label, HHI and HPD. NRC rating .40.
