WRB TECHNOLOGY

Weather-resistant Beech

The StyleNations collection is always *evolving*
and *growing* to stay at the forefront of
design and technology.

Temperature

WRB Technology keeps furniture safe from deformation in 41°F - 149°F temperature range.

Precipitation

WRB Technology isolates the inner structure of wood from water, even if the external coating is wet or exposed to rain.

Sunlight

Exposure to sun and UV radiation doesn't change the color of furniture protected by WRB Technology.

Air humidity

WRB ideally protects the wood structure against absorbing the moisture and prevents the wood as well as the coating from bulges.

STYLENATIONS

STOCKED IN MIAMI

High-quality polypropylene, the main raw material of the Miami range, is non-toxic, antistatic, highly resistant to weather conditions, breakage and scratches.

It is not a porous material therefore it can be cleaned with disinfectant or soap diluted in a little water.
