

**You have a VISION.
We have a way to ACHIEVE it.**

On-Demand

Select from any of our patterns and colorways available in our Shop. Sold in 5 yard increments with a 10 yard min*, and printed just for you. We can turn around your project in a matter of days, depending on yardage and final destination.

Print-Ready

So you have already created your pattern, but now you need a printing partner to make your vision a reality and get it to the job-site on time? We can do that.

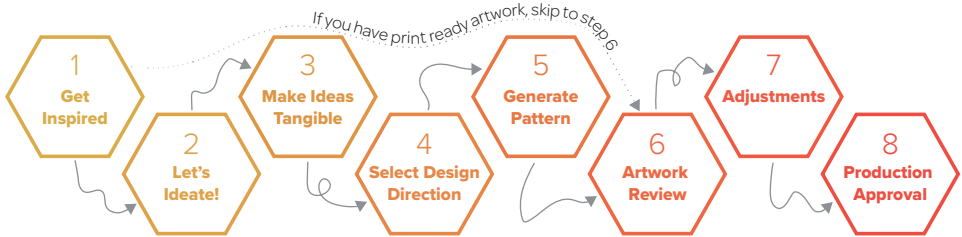

Personalized

Love one of our patterns, but need it in a specific color, scale or ground? We can take an existing pattern and alter the colors, the scale or the ground that it is produced on to make it exactly what you have envisioned.

Custom

Some projects require a custom solution that you may not be able to produce the artwork for yourself, due to time or fee crunches. That is where we come in. Our designers are Interior Designers with graphic design backgrounds, so we do what you do everyday. Think of us like an extension of your team.

HOW WE WORK: THE COLLABORATIVE PROCESS

1 Provide us with:

- your concept
- illustration style
- color palette
- context (space, adjacent finishes)
- measurements/CAD elevation file

2 We set up a call or meeting to go over your inspiration & determine design direction

3 We will take all of the information we have received and put some preliminary design sketches together

4 You select a direction

5 We get to work creating your pattern artwork, applying scale, color, transparency and special effects (if any)

6 We will provide you with an **Art Review**

Package consisting of:

- Strike-Off: a paper strike at 100% scale, minimum 2'-0" x 3'-0" or larger depending on pattern.
- Elevation: scale elevation showing entire pattern in your context
- Vismat: your custom pattern with color, scale, ground and metallic effects (if you have any) for use in renderings

7 If after you have reviewed the Art Review Package you require tweaks to the design, we will make the required revisions before submitting the Production Approval Package.

8 We will provide you with an **Final Approval**

Package consisting of:

- Test Print: 100% scale print on selected ground to be reviewed for all design aspects, color, scale, ground and print quality
- Return signed cutting of test print, along with a signed approval form back to us and we will give you a definitive lead-time/delivery date
