

Woven Upholstery

Wall Protection

Wolf-Gordon's diverse upholstery textile offering includes constructions to suit every market sector, from value priced polyesters and polyolefins, to solution-dyed nylons, to luxurious wools and mohairs. Indoor/outdoor and flame retardant items round out the selection. All meet or exceed ACT performance standards, and the majority have high quality spill- and stain-resistant finishes.

Flexible wall protection is our newest product category, and we offer two innovative alternatives to cumbersome rigid sheet goods. Both RAMPART™ and P3TEC™ are highly resistant to impact and abrasion, with proprietary topcoats that resist harsh chemicals and stains. And, both offer a beautiful range of patterns, colors, and textures.

Wolf Gordon

For over 50 years, Wolf-Gordon has served the A+D community as *the* comprehensive source for interior surfacing products. Building its reputation on distributing contract wallcoverings, the American design company has diversified its offering to include a wide range of upholstery and drapery textiles, architectural paint finishes, wall protection, and *Wink* clear dry-erase coating. Common qualities of excellent design, dependable performance, and sustainability can be seen across all the company's product lines. In addition to an in-house creative team, Wolf-Gordon partners with licensed designers from outside the specialty of surface design to infuse fresh ideas into its collections.

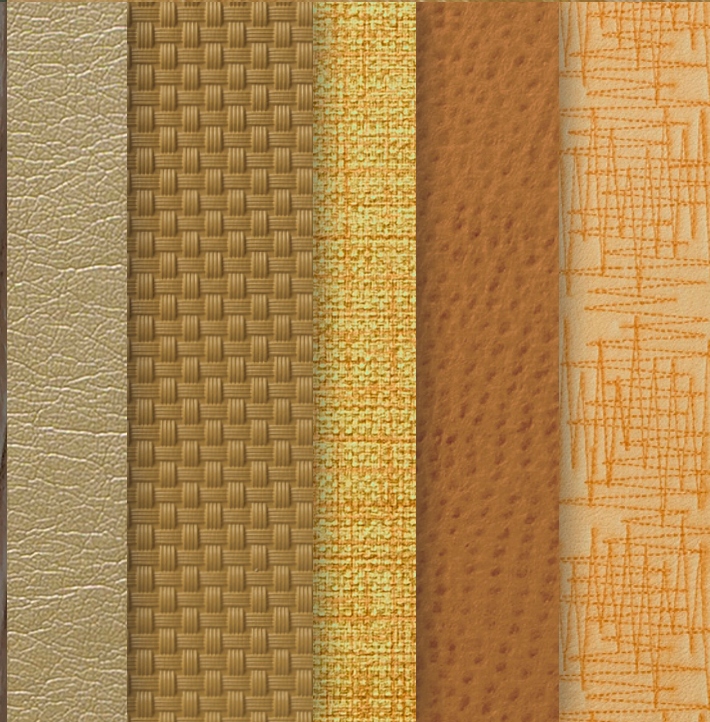

Wallcovering

Wolf-Gordon offers close to 400 different patterns and textures in Type II wallcovering alone. Our diverse collection also includes natural linens and silks; grasscloths, corks, and micas; acoustic wall carpets; as well as PVC-free alternatives. Prefinished wood veneer wallcoverings in over 200 species are also available, with a short lead time.

Performance Upholstery

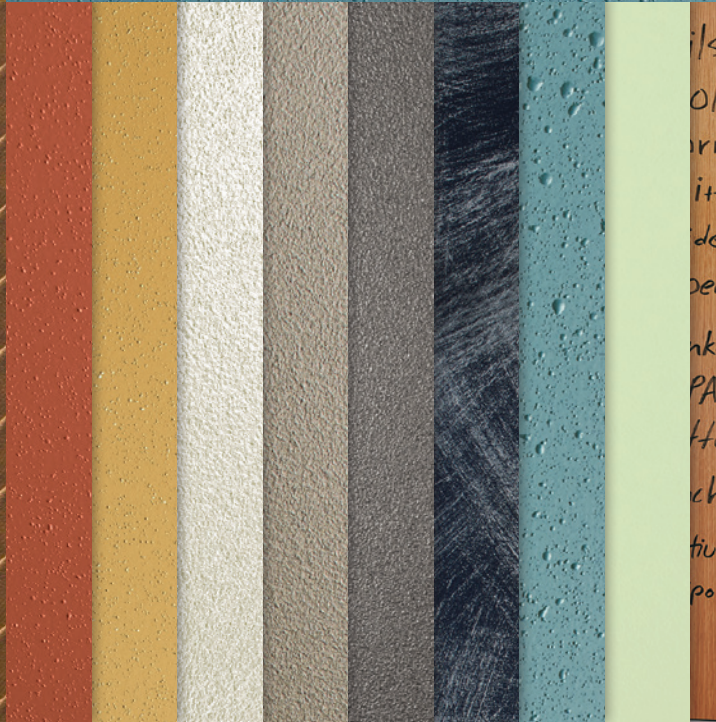

Our high-performing coated upholstery textiles are manufactured to endure abuse in heavily trafficked areas. Meeting all ACT performance guidelines, these spill, stain, and highly abrasion resistant materials are featured in faux leather, embossed, and printed designs, in a broad range of colorways.

Paint and Wink™

To meet the demands of today's commercial interiors, we offer low emitting, scrub resistant, Scuffmaster® architectural finishes. The metallic, pearlescent, textured and artisanal pattern coats, as well as a premium eggshell paint, can be matched to virtually any color with no upcharge.

Wink, Wolf-Gordon's clear waterbased coating can be applied to painted drywall, sealed wood, metal, and even smooth wallcovering to create a durable write-and-erase canvas, in less time than competitive products.

Digital and Customs

Whether you want to develop a concept for an environmental graphic, modify one of our existing patterns, or replicate the look of a specific fabric or other material, WG Customs Lab can help to realize your vision. Our qualified team has the knowledge and skills for determining the best substrate and printing process to meet your aesthetic requirements. Once you share your inspiration, imagery, color preferences, and project parameters, we will present several options to meet your goals.

Our digital capabilities allow for reproducing a photograph, image, or brand element on a variety of substrates, including textured and metallic-finish wallcoverings, acrylic panels and window film, and acoustic materials. A selection of vinyl and woven upholstery and drapery textiles can also be utilized.

In addition to having us create imagery or patterning for your project, you can choose artwork from our Curated Collection, pattern archive, or stock photography resources.
