SOPHISTICATED SOUND MANAGEMENT

WoodLine wall and ceiling panels combine the warmth of wood with excellent acoustical values. WoodLine panels are available in seven different systems and come in a variety of standard and exotic wood species. Perforations can be added to the majority of WoodLine wall and ceiling panels to achieve optimum acoustical results, with NRC ratings as high as 0.90.

ESSENTIAL

TRADITIONAL LAY-IN CEILING PANEL SYSTEM

WoodLine Essential is a traditional lay-in ceiling panel with tegular edge detail, designed for installation in standard 15/16" or 9/16" T-grid systems. Essential ceiling panels are available in genuine wood veneer or laminate on an MDF substrate. Perforations can be added to Essential ceiling panels to achieve optimum acoustical results.

FEATURES

- Traditional lay-in panels
- Face & rear balancing veneers
- Custom sizes available
- Custom edges available for use with non-standard grids

STANDARD DIMENSIONS

- 2' x 2' | 2' x 4' | 1' x 6'

INSTALLATION

- Standard 15/16" or 9/16" T-grid systems

FINISHES

- Wood veneer or laminate on MDF core
- Natural clear lacquer (veneer only)
- Variety of perforation options

FIRE RATING

- Class A fire rating per ASTM E-84
- CARB2 compliant

ACOUSTICS

- NRC rating up to 0.90

PREMIER

SEMI-CONCEALED CEILING PANEL SYSTEM

WoodLine Premier is a semi-concealed lay-in ceiling panel that installs into standard 15/16" T-grid systems, leaving a 3/8" pencil line reveal between panels. Premier ceiling panels are available in genuine wood veneer or laminate on an MDF substrate. Premier ceiling panels offer easy accessibility by utilizing compression spring technology that allows for zero clearance above the grid. Perforations can be added to achieve optimum acoustical results.

FEATURES

- 3/8" Reveal between panels
- Compression spring technology
- Face & rear balancing veneers
- Custom sizes available
- Custom edges available for use with non-standard grids

STANDARD DIMENSIONS

- 2' x 2' | 2' x 4' | 1' x 6'

INSTALLATION

- Standard 15/16" T-grid system

FINISHES

- Wood veneer or laminate on MDF core
- Natural clear lacquer (veneer only)
- Variety of perforation options

FIRE RATING

- Class A fire rating per ASTM E-84
- CARB2 compliant

ACOUSTICS

- NRC rating up to 0.90

EXCLUSIVE

FULLY CONCEALED CEILING PANEL SYSTEM

WoodLine Exclusive is a fully-concealed lay-in ceiling panel that installs on standard Z-bar. A 5/64" bevel on all panel edges creates a visually continuous ceiling. Available in genuine wood veneer or laminate, Exclusive panels can be designed to complement new or existing casework, doors and furniture. Perforations can be added to achieve optimum acoustical results.

FEATURES

- Fully concealed ceiling grid system
- Face & rear balancing veneers
- Custom sizes available
- Custom edges available for use with non-standard grids

STANDARD DIMENSIONS

- 2' x 2' | 2' x 4' | 1' x 6'

INSTALLATION

- Standard Z-bar

FINISHES

- Wood veneer or laminate on MDF core
- Natural clear lacquer (veneer only)
- Variety of perforation options

FIRE RATING

- Class A fire rating per ASTM E-84
- CARB2 compliant

ACOUSTICS

- NRC rating up to 0.90

CLASSIC

STANDARD WALL AND CEILING PANELS

WoodLine Classic wall and ceiling panels are installed using pivot clips into a standard 15/16" T-grid. Panels are available in genuine wood veneer or laminate with two edge details. The reveal edge leaves a 3/8" groove between planks; wood strips are provided to conceal the pivot clip. The flush edge fits together seamlessly, creating a 5/64" bevel between the panels so no wood strip is needed. Perforations can be added to Classic wall and ceiling panels to achieve optimum acoustical results

FEATURES

- Traditional wall & ceiling panel
- Reveal or flush edge
- Concealed mounting hardware
- Face & rear balancing veneers
- Customize to fit any environment

STANDARD DIMENSIONS

- 48" x 96" up to 48" x 120"

INSTALLATION

- Ceiling: Pivot clip attaches to standard T-grid system
- Wall: Furring strips and nail clips

FINISHES

- Wood veneer or laminate on MDF core
- Natural clear lacquer (veneer only)
- Variety of perforation options

FIRE RATING

- Class A fire rating per ASTM E-84
- CARB2 compliant

ACOUSTICS

- NRC rating up to 0.90

PARALLEL

LINEAR WALL AND CEILING PLANKS

WoodLine Parallel wall and ceiling planks feature a continuous linear aesthetic utilizing straight lines. Planks are available in genuine wood veneer or laminate and offered with reveal or flush edge details. The reveal edge includes an acoustical textile providing added acoustical performance. The flush edge leaves a standard 5/64" groove between planks. Perforations can be added to Parallel wall and ceiling planks to achieve optimum acoustical results.

FEATURES

- Linear planks with reveal or flush edge detail
- Face & rear balancing veneers
- Standard or custom sizes & reveals available

STANDARD DIMENSIONS

- Plank Widths: 2.5" up to 12"
- Plank Lengths: up to 120"
- Reveal Widths: 0.125" up to 1.1875"

INSTALLATION

- Ceiling: Pivot clip attaches to standard T-grid system
- Wall: Furring strips and nail clips

FINISHES

- Wood veneer or laminate on MDF core
- Natural clear lacquer (veneer only)
- Variety of perforation options

FIRE RATING

- Class A fire rating per ASTM E-84
- CARB2 compliant

ACOUSTICS

- NRC rating up to 0.90

GROOVE

TONGUE AND GROOVE WALL & CEILING PLANKS

WoodLine Groove wall and ceiling planks allow for a wide range of acoustical performance through various width and spacing configurations. Installation is simple by utilizing a unique tongue and groove system, designed to work in conjunction with a 5/0 nailclip, creating an overall monolithic appearance. Groove panels are available in genuine wood veneer or laminate; perforations can be added to achieve optimum acoustical results.

FEATURES

- Monolithic appearance
- Multiple width & spacing options
- Reveal or flush edge
- Face & rear balancing veneers
- Custom sizes available

STANDARD DIMENSIONS

- 5" x 96" or 11.375" x 96"

INSTALLATION

- Ceiling: Pivot clip attaches to standard T-grid system
- Wall: Furring strips and nail clips

FINISHES

- Wood veneer or laminate on MDF core
- Natural clear lacquer (veneer only)
- Variety of perforation options

FIRE RATING

- Class A fire rating per ASTM E-84
- CARB2 compliant

ACOUSTICS

- NRC rating up to 0.90

SLAT

SLATTED WALL AND CEILING SYSTEM

WoodLine Slat is a traditional linear wall and ceiling system that incorporates various blade sizes and spacing. WoodLine Slat is available in 1' wide by 8' long sections, with arrangements of four to eight blades per section. Sections are installed using an attachment clip suspended from a heavy duty 15/16" T-grid, and work with both backer and dowel assemblies. Available in genuine wood veneer or laminate. Various acoustical materials can be utilized to garner different acoustical results.

BLACK HARDWOOD
BACKER ASSEMBLY

DOWEL ASSEMBLY

FEATURES

- Linear wall and ceiling blade system
- Assembly: black hardwood backers or dowels in fixed aluminum or flexible PVC
- Face & rear balancing veneers
- Custom sizes available

FINISHES

- Wood veneer or laminate on MDF core
- Natural clear lacquer (veneer only)

INSTALLATION

- Ceiling: Attachment clip to standard T-grid system
- Wall: Wood screw into hardwood backer

STANDARD DIMENSIONS

- Section Size: 1' W x 8' L
- Blade Widths:
 - 6-8 blades: 0.625"
 - 5 blades: 0.75"
 - 4 blades: 1"
 - 3 blades: 1.25"
- Blade Heights: 1.75" | 2.125" | 2.5" | 3.125"

FIRE RATING

- Class A fire rating per ASTM E-84
- CARB2 compliant

ACOUSTICS

- NRC rating up to 0.90

STANDARD VENEER OPTIONS

WoodLine wall and ceiling panels are available in genuine wood veneer or laminate on an MDF substrate with face and rear balancing veneers. The applied finish on wood veneer is a natural clear lacquer.

STANDARD PERFORATIONS

Perforations can be added to the majority of WoodLine panels to achieve optimum acoustical results with NRC ratings as high as 0.90. The larger the perforations or the higher the number of holes, the more open-air space within the product, resulting in better acoustical values.
