install

weight	1 1/4'' = 15 lbs/sf
storage	indoor, covered and braced on a-frame
substrate	level + sound - 3/4" ply + steel plate / frame
span	4" unsupported / > 4" fully supported
adhesion	silicon caulk or construction adhesive
edges	eased / finished
seal	pre-sealed with cc hard + 3 coats polishguard
maintain	apply cc conditioner prior to use. wipe up spills + spot clean + cc conditioner

rivi finished terrazzo tabletops are provided pre-finished and sealed. cc conditioner should be applied prior to first use and routinely applied. rivi can be mechanically or adhesive-fixed to a table base. table base should include 3/4" plywood and/or 1/4" steel plate substrate for the top. if using plywood, it is recommended to include some steel ribbing for rigidity. the substrate should extend to within 4"-6" of table edge. due to the inherent nature of concrete and natural aggregates, no two tables are exactly alike, they will exhibit variations in tone, aggregate size and distribution. it is a feature of the material.
