WOOD PORCELAIN PLANK

Created for long term performance and a warm look. This enhanced wood visual porcelain absorbs under 0.5% water, making it the ideal for high moisture areas, like kitchen and bathrooms. New technology on High definition printing and more realistic designs are features that characterize this popular and durable flooring category.

WATERPROOF PERFORMANCE LAMINATE

It earned its name based on its resistance to spills and outstanding performance in wet areas. A few extra steps on installation will ensure that moisture will not penetrate the surface and compromise its melanized core. WPL aluminum oxide anti-scratch finish makes it ideal for high traffic areas. Realistic wood visual, easy installation, and affordability gives you an undeniable value proposition.

XPL COMPOSITE VINYL

(Xtreme Polymer Layer Core). This waterproof rigid core shows the latest improvements on stability, foot comfort, and performance. It offers a multi-pattern visual, an oversized plank, and commercial performance.

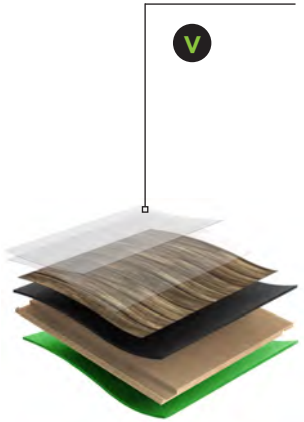

PORCELAIN TILE

Are stronger, purer, and more water-resistant than ordinary ceramics. All this is achieved by using clays with finer particles fired at a higher temperature, which creates a harder, glazed surface. Our porcelain provides a clean, elegant, and durable proposition. Matt, polish, and outdoor finishes give you a good range of home and business uses.

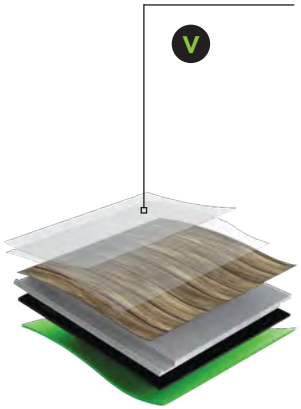

LAMINATED FLOORS

Made by compressing a high-tech photographic paper, HDF (High-Density Fiber), and aluminum oxide, to protect it from discoloration and wear. With over 35 years of industry development, laminate floors offer the best options for floor covering, durability, and beautiful looks at a meager cost with simple maintenance.

XPS COMPOSITE VINYL

(Xtreme Polymer Stone) Is a 100% waterproof layered material. Unlike vinyl floors, XPS is made of Polymers and foam agents, making it a thicker structure, more cushioned, and with better sound absorption properties. Its 22 mil top layer offers 3D printing technology on an oversized format to add realism, durability, and high performance.

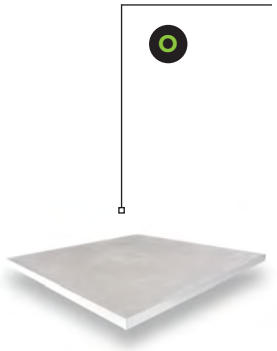

XPR COMPOSITE VINYL

(Xtreme Polymer Rigid-core) is one of the latest flooring structures made with limestone powder, polymers, and stabilizers to create a rigid, stable, and waterproof core. Its thick vinyl top layer is pressed at high temperatures embossing every detail of the patterns it displays, and its extra ceramic bead finish protects it against everyday scratches.

SIDING

Made with the same concept of composite decking, siding decorates and protects the exterior walls of your home. Carrying modern colors and a simple clip system, Parkay siding will give an attractive value and appeal to your outdoor surroundings.

PORCELAIN PAVERS

Made from the highest-grade porcelain, pavers are an alternative to concrete and natural stone that will resist the toughest climate changes. Durable, thicker, non-slippery, and easy to maintain; they will give beauty to your outdoors for years to come.

COMPOSITE DECKING

These exotic wood look composite boards are made through a coextrusion process. Mixing sawdust and polymers, capped with pigmented PVC to simulate the look of real wood. It uses an easy to install clips system to form a structure that does not splinter, rod, or fade. Almost maintenance-free and without the need to be sealed over time, decking is one of the best elements for your dock or outdoor area.

DECK TILE

It is made with the same technology attributes as composite decking. Deck tiles have a rectangular shape and carry an interlocking system that makes it ideal for the “Do it yourself”. In just a couple of hours, you can change the complete visual of your outdoors and still get a non-slip surface that will last for over 25 years.

ARTIFICIAL TURF

Formed with Synthetic fibers over a polyurethane backing, it is produced in the same way carpet is made. Our non-fading artificial turf mimics a real grass lawn thanks to our two-tone fibers. No more need for landscapers or water; Parkay turf will transform your outdoor into a natural paradise with big saving in the long run.

BASES

These are used on the base of the wall to cover the expansion gap between the floors and the wall. These are also used to ease the visual transition between the floor and the walls.

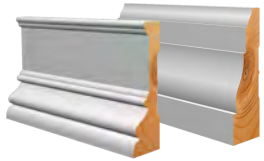

CROWNS

These are used to give an elegant transition between the wall and the ceiling. Crown moldings can also be used for cabinetry finishes and capping walls.

CHAIR RAILS

Originally used to prevent chairs from damaging the walls, it's now used more for decorative purposes. Often used to horizontally separate two different color paints on one wall.

CASINGS

These are used mainly to decorate door frames and windows.

QUARTER ROUND

This 1/4 of a circle is used as an inside corner molding. Usually to cover the gap in between the floor and the existing baseboard.

MTRIM

MOULDING INNOVATION

MTRIM WOOD MOULDING IS MADE OUT OF RADIATA PINE
This versatile specie is one the lightest pines in the world making it easy to manage at the time of installation.

MTRIM IS CHARACTERIZED BY ITS GESSO FINISH
A thick coat of plaster and primer makes our moldings smooth, extra white and ready to be painted.

MTRIM ENVIRONMENTAL CERTIFICATIONS
We produce our light-weight MDF Prefinished mouldings from UL MDF panels manufactured using the eco-friendly standards that earn SCS-approved certification (Scientific Certification Systems) for incorporating recycled materials. M-Trim has also achieved low formaldehyde emissions in 100 percent of its production, with an E-1 and Carb Phase II classification in all its facilities.

WPB
This rising infused polymer is revolutionizing the moulding industry. Its pre-painted luminous whiter finish and waterproof performance make it ideal for high moisture areas than want to maintain the high end look of white baseboards.

TRANSITION MOLDINGS

Info + Specs

T-Molding (TM)
1/2" x 1-3/4" x 94"
Usually for transitions going from one floor to another floor that is at the same level.

Multi-purpose (MP)
1/2" x 1-3/4" x 94"
Usually for transitioning from one floor to another floor that is at a lower level level.

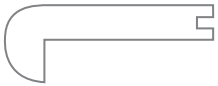

Reducer (RD)
Usually for transitioning from one floor to another floor that is at a lower level or against sliding doors or bath thresholds.

Overlap Stair Nose (SN)
3/4" x 2-1/8" x 94"
Covers the edge of the Stair tread (step) with a small overlap on top of the laminate board.

Slim Overlap Stair Nose (SSN)
1" x 2" x 94"
Covers the edge of the Stair tread (step) with minimum overlaping.

Flush Stair Nose (FSN) 8mm.
3/4" x 2-5/8" x 94"
Commonly used at landing or the top step. Designed to work with 8mm. Parkay floors. It can also be used instead of a full tread.

Flush Stair Nose (FSN)
3/4" x 3-1/8" x 72" Everest 3/4" x 3-1/2" x 72" Europa Soul
3/4" x 3-1/2" x 72" Europa Elements
Covers the edge of the Stair tread (step) without overlapping. Works with engineered hardwood floors.

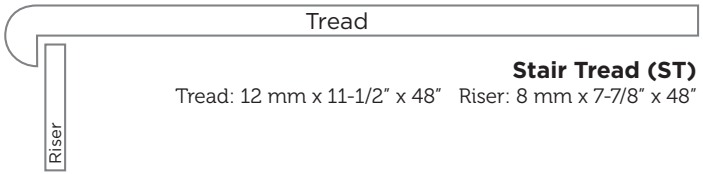

Flush Stair Nose (FSN) 12mm.
1" x 4-1/2" x 94"
Covers the edge of the stair tread (step) without overlapping the board for a more beautiful finish.

Flush Stair Nose Vinyl (FSN)
1" x 3" x 94" XPR/XPS
Covers the edge of the stair tread (step) without overlapping the board for a more beautiful finish.

Flush Stair Nose Square (FSN)
3/4" x 7-3/8" x 54-1/4"
Mercury & Grand Selection
1-1/4" x 7-3/8" x 79-3/4"
Origin Collection

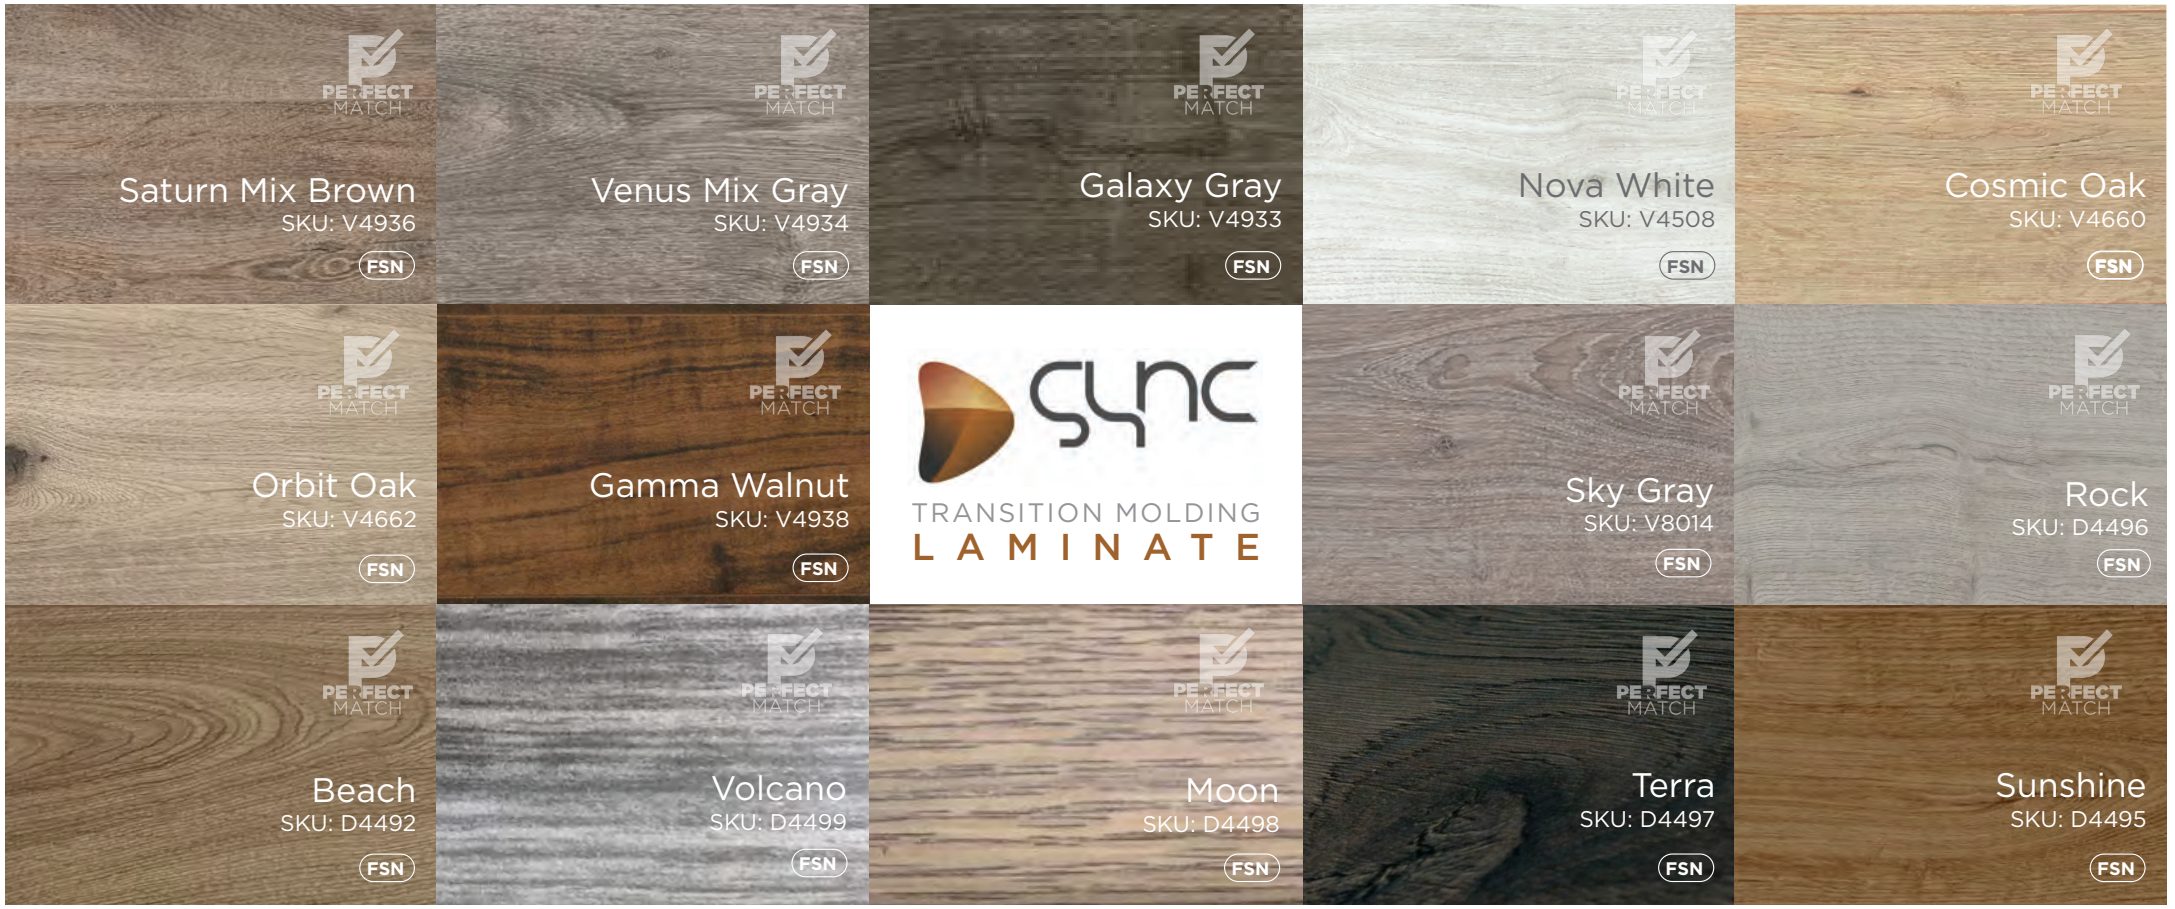

Stair Tread (ST)
Tread: 12 mm x 11-1/2" x 48" Riser: 8 mm x 7-7/8" x 48"

We offer one of the most complete transition moldings options in the industry.
Two main molding categories have been created to be used
with all Parkay Floors and other quality brands in the market.

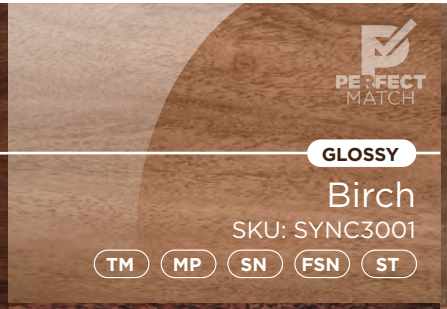

Sync Moldings are part of a color portfolio
that syncronizes with any floor design.

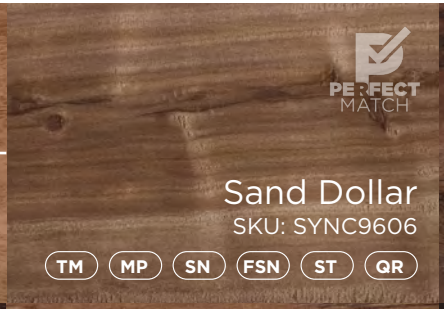

Perfect Match uses the exact design,
pattern and color as the floor.

LOCBOND

A premium wood flooring adhesive with crack suppressant technology and excellent bonding qualities. It is designed to install laminate, engineered, and parquet flooring over concrete substrates.

SUPREME 500

URETHANE WOOD FLOORING ADHESIVE

- Low solvent, low V.O.C, low odor.
- Minimal shrinking and non-slump for superior contact.
- Trowels easily, yet offers good grab.
- High bond strength.
- Superior elasticity for quieter, cushioned walking over installed flooring.
- Application variety: flooring planks may be applied using the wet lay or walk-on method.

MADE IN USA

RAPTOR CUTTERS

Angle gauge for angled cuts

TELESCOPIC LEVER FOR EXTRA POWER

#CP-1076

RAPTOR M13PRO

Easily cuts
Laminate up to 15mm thick
Engineered up to 12mm thick
Vinyl Floor up to 10mm thick
RCB, XPR, XPL and WPL

#CP-1083

EASY CUTTER

Cuts sharp, clean and precise angles of strip wood.
