

LEED INFORMATION

YOUR ENVIRONMENT AT ITS BEST

Commercial floorcovering solutions made to meet or exceed Material Reuse and Indoor Environmental Quality requirements.

What is LEED?

Developed by the U.S. Green Building Council, the Leadership in Environmental and Energy Design (LEED) rating system encompasses all aspects of building design, rewarding structures that maximize energy efficiency and minimize their impact on the environment through a number of techniques and materials.

How can van Gelder, Inc. help with LEED credits?

We at vG are dedicated to help architects and designers get the most LEED credits possible with our wide variety of floorcovering solutions. Each product lists any potential credits in its technical specifications, taking the guesswork out of the process.

Our experts are available to help find the best commercial flooring solutions for any environment.

Understanding LEED credits:

Credits made possible with our products usually fall into two categories: Materials Reuse (MR) and Indoor Environmental Quality (IEQ) credits.

MR CREDITS:

Credit 4 (1-2 Points): Percentage of Recycled Content
Usually between 10%-20%; calculated by dollar value.

IEQ CREDITS:

Credit 4.1 (1 point): Low-Emitting Adhesives
Indicates low levels of VOCs (Volatile Organic Compounds) are emitted by adhesives or sealants used in installation.

Credit 4.3 (1 point): Low-Emitting Materials
Indicates low levels of VOCs (Volatile Organic Compounds) are emitted by materials in floorcovering. Also indicates CRI Green Label Plus certification.

Credit 5 (1 point): Indoor Chemical & Pollutant Source Control
When installed in a semi-permanent fashion with at least 10 ft. of walk-off area, product can prevent outside pollutants from entering a building.
