About Dynamic Terrazzo

Dynamic Terrazzo Environments was created for the demanding, nationwide growth, of pre-cast terrazzo components to fulfill a wide variety of projects. Established in 2019, DTE began operations in Dallas, TX, where the magic began, and has since moved their production facility to Carrollton, Texas. A large state of the art facility allows us additional production space and more room for creativity. Currently offering two color collections, The Designer Collection and The Standard Collection. Both offering custom color options, and a variety of precast components, ranging from tiles to slabs and everything pre-cast in between! We offer many standard size options, as well as custom sizing to meet every clients' terrazzo needs.

FEATURED PORTO COVO / DESIGNER SERIES

Custom sizes are available for treads as long as they meet OSHA standards.

NOTE: The above dimensions are based on epoxy terrazzo. Cementitious terrazzo options are available - Call us for details.

Sustainability

As the world is becoming more environmentally conscious, we all want to find ways to make a better impact on our planet. By using DTE, you are not only doing that, but also helping to support a new green local business. Dynamic Terrazzo Environments utilizes recycled materials in many of our colors pallets, offering a greener and more sustainable alternative. These materials help architects and designers gain LEED points in their projects, and to be eco-friendly for our environment.
