

Press Release
Introducing SLATPANEL®
Handcrafted acoustic panels for any modern space

New York City, April 2022 – The Wood Veneer Hub has recently launched Slatpanel®, its leading range of handcrafted, acoustic wood and ceiling panelling in the US Market.

The Wood Veneer Hub, known for its high-quality, wooden wall and ceiling panelling for residential and commercial spaces brings its latest range, Slatpanel® to the United States. Made from veneered lamella strips placed on an acoustic felt backing, specifically designed to optimise the acoustic properties of the space it's in while delivering a timeless, modern aesthetic.

Slatpanel® is a versatile product appropriate for a variety of spaces including the bedroom, living room, office or commercial buildings. Built-to-last from sustainably sourced high-grade natural wood and acoustic felt made from recycled plastic bottles, result of a complex research and development process to minimise the impact the product has on the environment.

Laurence Freed, Director at The Wood Veneer Hub said: "The launch of Slatpanel® in the US marks an exciting turning point for the business. Due to our continued success in Europe, we've been able to branch out further afield to the US where impressive demand."

Designed for quick and simple installation, Slatpanel® can be simply screwed into the wall or ceiling joists (if appropriate) with the correct fittings, providing an out-of-box that can be easily installed in domestic spaces when necessary.

"US expansion is a core focus for us over the next few years and the growth in demand in the region indicates that we understand the needs of the US customer. It's not enough to have a strong aesthetic or a good design – consumers are more aware than ever and the desire for responsibly-sourced, natural products in interior spaces will continue to increase as we navigate the impact of the climate crisis. We are looking to increase our presence in the US even further and we look forward to expanding our operations in Europe soon." Said Freed.

ENDS

Slatpanel is available to purchase online and from selected retailers in the US. For more information, please contact Ross Blackwood, ross@thewoodveneerhub.com.

Editors Notes

The Wood Veneer Hub

The Wood Veneer Hub are specialists in high-quality, wooden veneer wall and ceiling panelling for residential and commercial environments.

Their products are appropriate for a variety of spaces within the home and commercial settings. Each product is carefully researched, sustainably sourced, and recycled materials are used when possible, to minimise the impact each product has on the environment.

Over the years, these premium grade veneers have been used by esteemed names in the American automotive, marine, and aviation industries and revered experts in the USA's furniture and interior design sectors.

Our passion for wood is a part of our DNA.
