CHEMETAL®

#315 Canterbury, bar front

LET’S CRANK SOME METAL.

Chemetal offers a massive collection of metal designs and laminates for interior spaces. Our designs are unique works of art, created with a manufacturing consistency. We produce many designs in-house, and also source some of the best metal designs the world over. It adds up to the most expansive collection of metal designs for interiors you’ll find. See them all, learn more and order free samples at chemetal.com.

THE CLASSICS ROCK.

An impressive collection of beautiful, bestselling classic metal designs in HPL, anodized aluminum and more. Classic Metals emulate the look of more expensive metals and are lightweight and easier to fabricate. These materials are design work horses, ideal for panels or inlays, cut to size or panels and anywhere you want the modern, luxurious and energetic look of real metal. Classic Metals are available in three series, each with advantages specific to your use and budget.

MEET THE TOP BRASS.

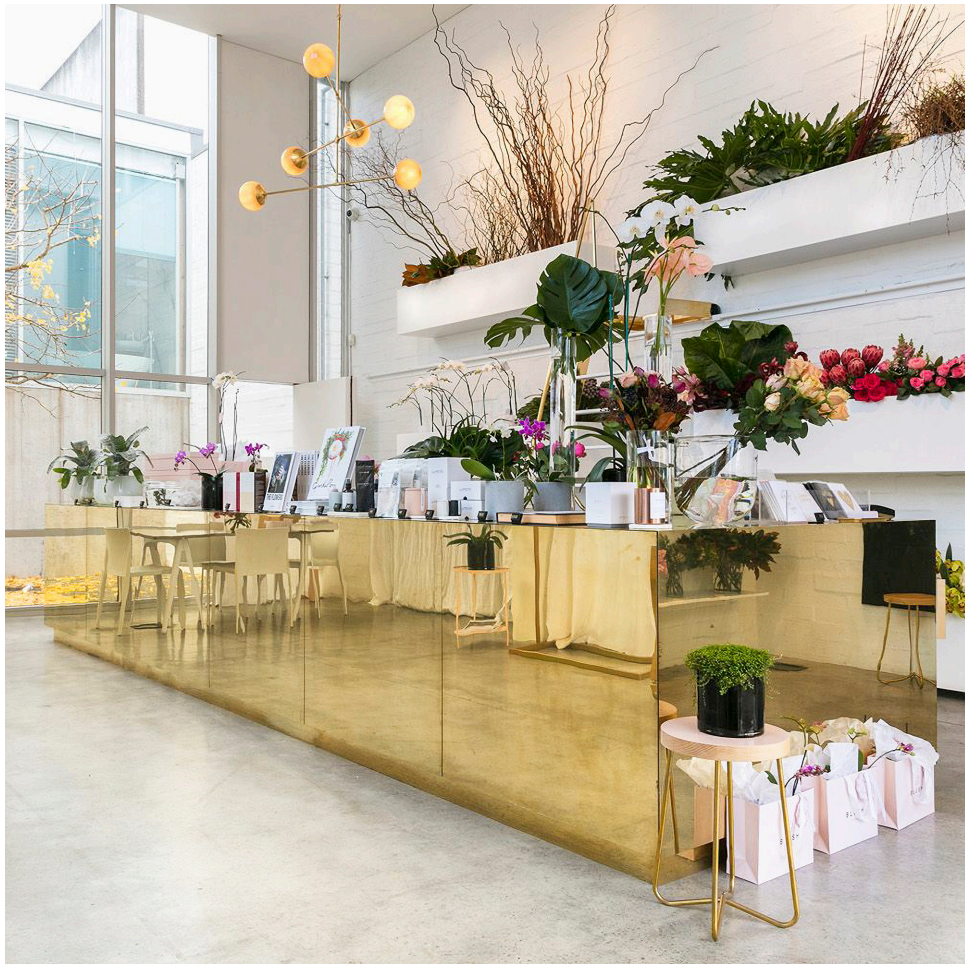

Chemetal offers an impressive collection of real brass and brass look designs. Several popular aged brass designs are created in-house by hand and machine, with a manufacturing consistency. Chemetal also offers real brass designs in 2’ widths, and convincing, lightweight, and economical brass looks on aluminum and HPL in 4’ widths.

#704 Brushed Light Brass Aluminum (HPL), wall covering inlay

BLACK IS THE NEW BLACK.

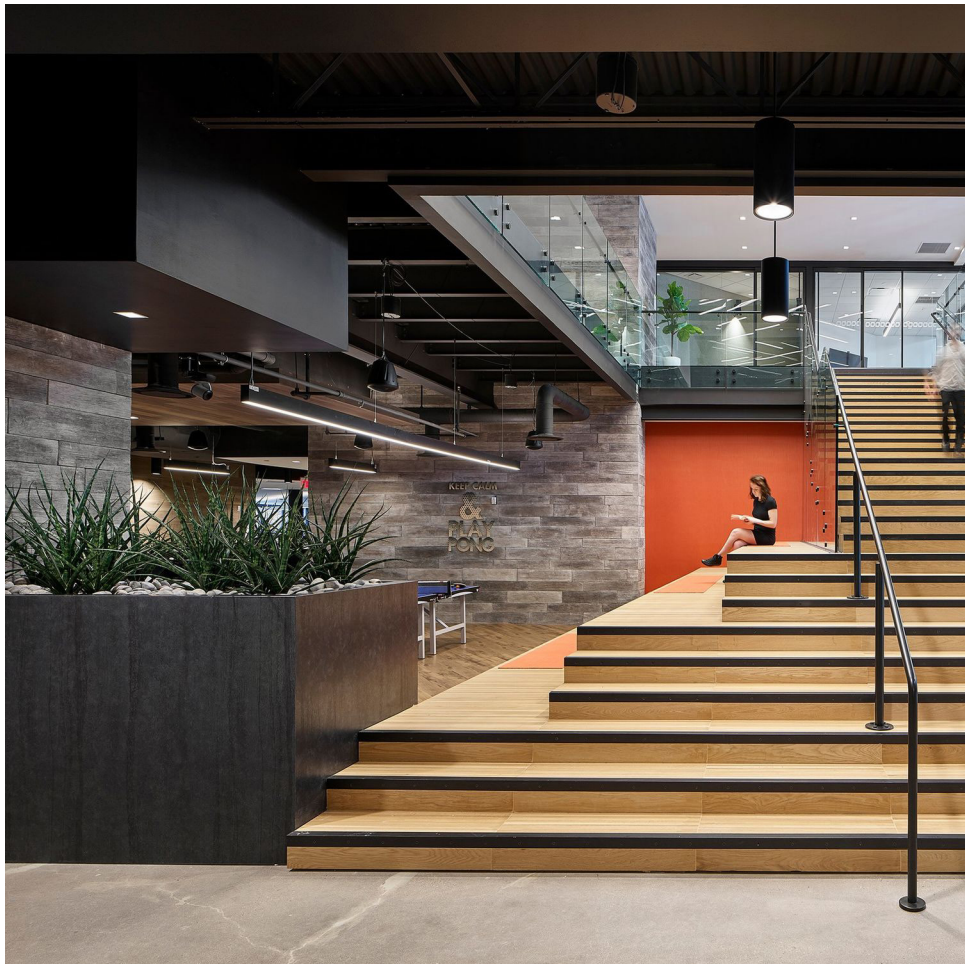

Darkened, aged and black metals in aluminum and HPL available in brushed, satin, aged and patinated designs. Chemetal's ALU designs are aged and darkened in house and emulate blackened steel in light-weight, easily fabricated and economical aluminum. Other black metal designs are available in brushed and satin anodized aluminum, as well as durable patinated surfaces, printed on aluminum.

#354 Alu Dark, custom workstation wraps

THE MANY MOODS OF METAL

These metals breathe history and tradition, with age and patina that is reminiscent of the great metal ages. Yet these are printed metal panels, employing fantastically modern printing technology to create a combination of depth, mood, subtle variation and reflectivity. #600 Series Architectural Metals from Chemetal are a distinctive collection of metal designs featuring sublime beauty, impressive durability and thoughtful sustainability in every aspect of the material.

#608 Gotham Aluminum

#606 Blackened Aluminum, display and counter wraps

Gotham Alum.

#608 Gotham Aluminum, wall covering

#601 Deep Bronze Aluminum, wall covering

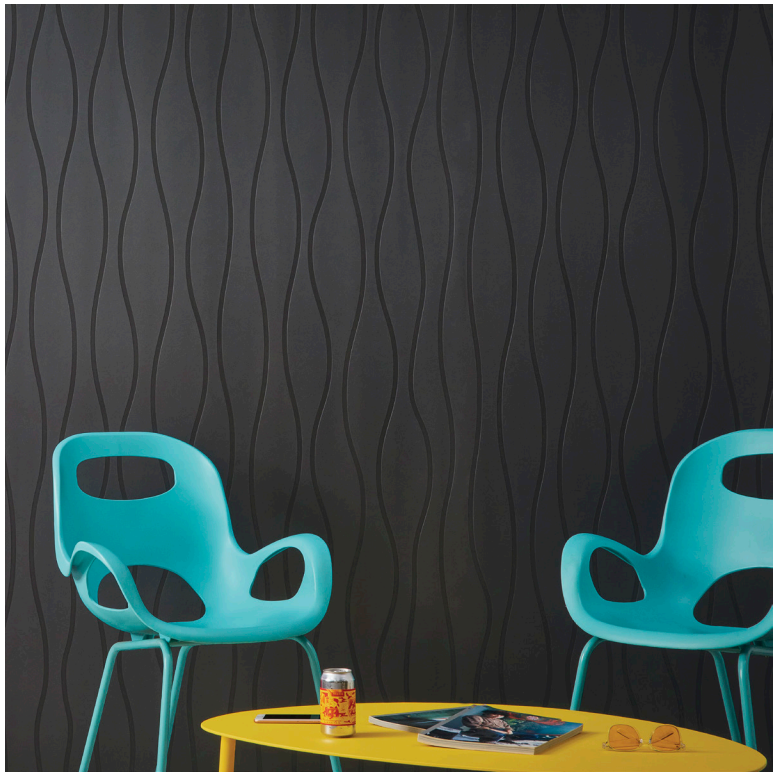

#614 Beowulf Aluminum, staircase

THESE DESIGNS ARE FIRE.

It’s a new way of creating metal designs with Surface Mode, metal designs on thicker aluminum. We started with our already popular ALU metals – aluminums finished with a slightly linear, blackened color variation – and put them on thicker .09” aluminum. Those are the building blocks of the collection. We capped it off with a new matte black powder coated design on the same .09” aluminum.

#555 Sapporo, wall covering

#551 Dawn Patrol

#552 Good Chemistry, wall covering

WATER IN EFFECT.

Presenting Waterworld, expansive new light shifting, embossed water effect designs. These on trend metal textures capture and refract light in a soft, abstract way with stunning effects. Made in house on over 35 solid aluminum designs for a world of options. Lighter and more cost effective than comparable stainless steel designs. A world of options awaits.

#901-W Waterworld

#903-W Waterworld, retail display

BOLD IS BACK.

Introducing Transparency by Chemetal, archetypal laser-cut designs with a pop of color. A new mode of creating metal designs that features nine patterns presented in seven colorways. The standard collection offers a range of patterns, including mid-century design motifs, classic linear shapes, and biophilic curves. These designs are ready to play. Seriously.

#579 Jetson in Sky Powder Coat

#573 Cubed in Saffron Powder Coat

SIZE MATTERS.

Embossed, brushed and deep grind patterns that fill the sheet. Large format designs from Chemetal are big and don't fit on samples but their cool and the variation on the surface plays with light and reflectivity in an energetic way.

SUSTAINABILITY

Chemetal is dedicated to providing designers and architects with sustainable materials to help create greener buildings. Many of its metal products are made entirely of aluminum, the most recycled material on the planet, with some aluminum finishes containing up to 85% recycled content, offering builders and architects LEED credits. Plus, the manufacturing facility at Chemetal uses a rooftop solar array to provide over 50% of the electricity used in the plant.

#901 Polished Aluminum, ‘Lawn’ Installation

ABOUT CHEMETAL

Chemetal is a second-generation family-owned company that has been in business for over 50 years. It’s part of a larger multi-division family business located in Easthampton, Massachusetts. Our materials are sold worldwide through an international distributor network.

Besides Chemetal, we offer two other product lines, Treefrog Veneer, a premium prefinished wood veneer laminate from Italy, and InteriorArts, a design focused HPL laminate. For more information, visit us online or find us on social media.
