VISION

At Prima Stone our vision is to shift the natural stone design market towards sustainable and simple solutions that can help extend the life of a finite resource. Prima Stone focuses on building trusted relationships within the design community and using technology to produce the best results.

Prima Stone is female owned and managed from our head office in Vancouver, BC.

FEATURES + BENEFITS

THIN

Sourced from the mountain ranges of Europe and Asia, Prima Stone is a super format tile created of 100% marble, travertine or onyx. It's 9mm profile weighs only 3 lbs psf. Our in-stock material is cut in sequence and is typically available in book-matched pairs.

STRONG

Prima Stone is cut and then applied to a fibreglass or aluminum composite backing creating a tile with an impact and flexural strength rating that is over 10x greater than slab or porcelain tile. Prima Stone is warrantied against delamination.

SIMPLE

Prima Stone was designed to be cut and installed by a tile setter, reducing installation time and costs. While fabrication is not required, we do work with many fabricators who recognize that Prima Stone is a lightweight and easy to install alternative.
