Welcome to Garrett Leather

At Garrett Leather, we believe in doing everything we can to make purchasing leather easy. We uphold the highest standards in the areas of customer service, consistent quality, and just-in-time availability.

As a privately-owned business, we have helped millions of customers and have grown to be the leading global brand of upholstery leather for luxury interiors.

Garrett
Leather

Garrett Leather is ISO 9001 Certified.

Garrett

Leather

Availability

GUARANTEED
IN STOCK

When you are up against tight deadlines and production schedules, you can depend on Garrett Leather. With our Guaranteed In Stock program, over 250 popular leather colors are always ready to ship within two business days of purchase for quantities up to 1000 square feet of one dyelot. In addition, we maintain an extensive inventory of more than 600 colors, so your leather is available when you need it.

Customization

If you are looking for a specific color or type of finish that is not part of our standard offerings, please contact us. We have an in-house color laboratory where technicians create strike-offs of custom color requests. Upon your approval, these samples are sent to our partner tanneries in Europe for full dyelot production.

Durability

Save on expensive maintenance and frequent replacement costs. Leather is known to outlast faux leather and other fabrics up to ten times longer. The intricate, natural collagen fiber structure of genuine leather provides unmatched durability that cannot be duplicated with man-made materials.

Fiberdye®

FiberDye®

Specify our products with confidence. Our exclusive Fiberdye® is the dyeing process that results in true color permanence. Fiberdye® penetrates all layers of the hide, producing deep, vibrant, durable colors. It conceals none of the natural characteristics or markings.

Handling

When you purchase from Garrett Leather, we take that investment seriously. We uphold precise handling standards to maintain the superior quality of your leather. Dyelots are stored on wooden horses to allow the hides to breathe, relax, and to protect against wrinkles and creases from forming.

LeatherShield™

LeatherShield™

Buy with certainty when choosing LeatherShield products. LeatherShield was developed to help you select the appropriate type of leather for different applications. This special classification is designated to a select group of products that are made to withstand the demands of high traffic areas. These products are treated during the tanning process to provide flame, water, and stain resistance, as well as UV and anti-bacterial protection. All LeatherShield colors are GREENGUARD Certified.

Quality

If exceptional, consistent quality is at the top of your priority list, then look no further. Superior quality is one of our core corporate values that remains the foundation of the company. We strongly believe in the humane and respectful treatment of our planet and its inhabitants. Our leather collections are sourced from the highest quality raw material selections throughout Europe. The European Union leads the world in passing legislation that protects farmed animals from cruel treatment. The use of artificial growth hormones is strictly prohibited. The animals are never transported to feedlots where they are fed corn and artificial hormones. Instead, the animals grow at normal rates and are allowed to graze on natural grass in spacious, open fields. Under these natural conditions, the integrity of the fiber structure is stronger and intact without any damage caused by unnatural growth rates, barbed wires, or brands.

Support

Your complete satisfaction is our ultimate goal. We care about your challenges. To help make leather purchasing easy, we provide global support and professional, personalized service with dedicated sales and customer service teams. You may chat live with our customer service representatives during regular business hours on our website.

Sustainability

We believe that everyone should cherish our planet and practice responsible behavior to protect the earth for future generations. We expect the same from our vendors, so we are very particular about their practices as well. Garrett Leather partners only with tanneries that take this responsibility very seriously. Leather tanning has made tremendous strides in recent decades in the area of environmental responsibility. The European Union leads the world in enforcing strict guidelines to protect the environment. Natural minerals and water-based finishes are used in the production of our leather collections. Water treatment plants in Italy purify water waste to eliminate pollutants. While there are many resources for leather throughout the world, we will not lower our standards.

Value

When you choose Garrett Leather, you receive much more than just beautiful leather products. You receive comfort, knowing that we are here to help you every step of the way during your leather purchasing journey and beyond. You receive peace of mind, assured that your order will arrive on time. You receive confidence, certain that the products will be superior quality. You receive security, knowing that if problems do arise, we'll support you. You receive pride, recognizing that your decision was a responsible one for our planet. You receive success, when your client is overjoyed with all of your hard work and the decisions that you made.

Types of Leather

Enhanced Grain

Enhanced grain leather is made from the desirable uppermost layer of the hide. These products are lightly buffed to improve the surface and create a more uniform appearance. A simulated grain pattern is applied for a natural look with an increased cutting yield.

Full Grain

Full grain products are made from the desirable uppermost layer of the hide and maintain the natural grain pattern. Because these hides do not receive any buffing or other altering processes, they require the highest quality raw materials.

Nubuck

Nubuck is created using the desirable uppermost layer of the hide, unlike suede which is made from the lower, smaller layers or splits of the hide. Nubuck provides superior fiber structure and strength, as well as larger cutting yields. The surface is buffed to create a soft nap.

Pure Aniline

Our pure aniline products are all European tanned, aniline dyed, full grain leather. These products maintain the natural grain and receive all of their color from the aniline dyes only. They do not have any pigmented finishes. Some do have a light wax finish, while others have no finish at all. Pure anilines will show signs of wear and will develop a rich patina over time. Because they age gracefully and highlight the true beauty of genuine leather, these products are recommended for all upholstery applications. Those who fully understand the inherent characteristics of pure anilines recognize the exceptional character of the leather and appreciate the natural splendor. All colors of our pure aniline products are GREENGUARD Certified.

Semi-Aniline

Our semi-aniline products are treated during the tanning process to provide flame, water, and stain resistance, as well as UV and anti-bacterial protection. After undergoing the FiberDye® dyeing process, these hides receive a pigmented finish for color consistency and added protection.

Leather Collections

Allura

Allura is smooth nubuck with a sleek surface that has an elegant look and irresistible silkiness. Changes in the direction of the nap create an illusion of light and dark areas on each hide. Nubuck Care Kits with cleaner and protector are recommended to maintain the leather.

Cadence

Cadence packs in maximum value, particularly when budget constraints are tight. Cadence has a consistent, uniform grain, which allows for superior cutting yields with little waste. The durable, anti-bacterial finish is suitable for all upholstery applications, especially high traffic areas.

Garrett Avion®

All Avion colors are part of our Guaranteed In Stock program, so your leather will ship when you need it. Avion is reliable leather that eliminates the wait for flameproof leather. All colors of Avion are treated during the tanning process to pass strict aviation flammability requirements, so the leather is ready to ship to meet your production deadlines. These Italian enhanced grain hides have a consistent grain and durable, anti-bacterial finish that provides exceptional resistance to wear. As a LeatherShield product, Avion is a perfect option for all upholstery applications, especially for high traffic areas.

Capelli Natural

Capelli Natural represents genuine cowhide in its truest form. These wonderful hair hides are not dyed. Instead, they are the work of Mother Nature. No two hides are exactly the same. Each hide varies in color, texture, and hair length. We provide photographs of each hide in the current dyelot prior to shipping to make the selection process easier. Commonly used as rugs, wall hangings, and for upholstery, Capelli Natural averages 35 square feet and is sold by the whole hide only.

Berkshire

All Berkshire colors are part of our Guaranteed In Stock program, so your leather will ship when you need it. Berkshire is a Garrett Leather original. It is one of the longest running collections still going strong after all these years. If you are looking for minimal natural markings, then this is the leather for you. This Italian leather has a beautiful subtle enhanced grain that provides excellent cutting yields and high value. Berkshire may be used for all upholstery applications, as it offers reliable durability with an anti-bacterial finish.

Capelli Specialty

Capelli Specialty are the masterpieces of the Capelli family. These hair hides feature deep, rich, solid colors, as well as artistic patterns. The creative patterns are designed using unconventional techniques such as laser-cutting and metallic foiling. Some patterns are available in half hides only, while others are available in both half and whole hide sizes.

Leather Collections

Capelli Stenciled

Bring the look of the wild indoors with Capelli Stenciled. These hides have animal patterns printed onto hair cowhide. Patterns include leopard, tiger, and zebra. Capelli Stenciled averages 32 square feet and is sold by the whole hide only.

Caressa®

All Caressa colors are part of our Guaranteed In Stock program, so your leather will ship when you need it. Caressa is one of our oldest and most beloved products. Well-known for its soft hand, Caressa has an irresistible feel and gorgeous satin sheen. The light, anti-bacterial finish accentuates the true beauty of full grain Italian leather. Caressa offers high cutting yields and as a LeatherShield product, it is recommended for any upholstery application.

Garrett Chatham®

All Chatham colors are part of our Guaranteed In Stock program, so your leather will ship when you need it. Chatham is a popular product that remains a long-standing favorite. Chatham is Italian full grain leather with a well-known reputation for quality. The anti-bacterial, durable, yet breathable matte finish provides excellent resistance to wear. Chatham, one of our best-selling products, is recommended for all upholstery applications, especially high traffic areas.

DiModa Cobra

DiModa Cobra offers fashion, flair, and texture. This Italian patent leather has a glamorous reptile pattern and is finished with a high gloss coat. Because some of the fiber areas of the hide are exposed, DiModa Cobra is recommended for moderate to low traffic areas.

DiModa Gatora

DiModa Gatora has a chic alligator pattern and high gloss finish with a gorgeous, subtle pearl appearance. The patent finish is applied with a liquid dispersion method that provides superior durability over conventional laminate finishes. These hides are tumbled for hours to maximize softness and increase pliability for upholstery use. It offers exceptional water resistance and is recommended for all upholstery applications.

Distressed

All Distressed colors are part of our Guaranteed In Stock program, so your leather will ship when you need it. Distressed is easygoing leather that just rolls with the punches. Create the look of comfort and well-worn character with Italian, full grain Distressed. A light wax surface provides anti-bacterial protection. Color variations and natural markings are inherent characteristics of this leather, which will darken with use and develop a rich patina over time. Distressed leather loves life and displays signs of wear with pride. It is always a top-selling collection.

Flight

Flight is cool leather that can withstand the heat. These Italian full grain hides are treated during the tanning process to pass the rigorous FAR 60-second vertical burn test, without requiring any additional treatment. It has a breathable, anti-bacterial finish that provides protection against everyday wear. The natural, smooth grain and matte appearance has an inviting hand and comfortable feel. While Flight was originally developed for aviation, it is a gorgeous option for any upholstery application.

Glam Sheepskin

Take luxury to the next level with Glam Sheepskin. These elegant skins have long, wavy fleece with beautiful highlights. It is so warm and intriguing, once you feel its irresistible softness, you'll want one for yourself. These luxurious skins may be used for furniture upholstery, pillows, and as area rugs. Glam Sheepskin averages 6.5 square feet and is sold by the whole skin.

Leather Collections

Glazed

Glazed is an iconic classic that never goes out of style. Italian Glazed provides excellent durability and resistance to wear. The hand-antiqued surface creates a beautiful mottled appearance with a rich, traditional look. The high sheen, spill-resistant finish makes this leather suitable for even the highest traffic areas. Glazed is recommended for all upholstery applications.

Journey

Journey is an adventure to be experienced firsthand. Each hide of this Italian, full grain, pure aniline leather develops a unique look that evolves as it is handled. Beautiful variations of light and dark areas come to life on the high gloss wax finish. The name pays tribute to the color migration that occurs throughout each hide as it is pulled or stretched. Natural markings and signs of wear will be evident on this authentic leather. Relish Journey as well as its final destination for generations.

Kenya

Kenya is nubuck leather. Its soft nap has an accentuated grain for added texture. While it has light surface protection to provide some water and stain resistance, it is ideal for moderate to low traffic areas. Nubuck Care Kits with cleaner and protector are recommended to maintain the leather.

Luxianna

Luxianna is sophisticated leather with a sleek, elegant look, a smooth tight grain, and a high sheen surface. These large, Italian, full grain bull hides offer superior cutting yields. A light, organic finish will gradually wear into a beautiful, vintage look. Signs of wear will be evident with use.

Mystique

Mystique is a labor of love. It is passionately crafted. Mystique begins with European bull hide, which provides a strong, dense fiber structure. These durable hides are hand-tipped to create a unique, dual-tone texture. A darker color is applied to a lighter tone base to add depth of color. Each hide is a masterpiece with variations in shading from hide to hide and even within a hide. Mystique provides excellent durability and resistance to wear and is recommended for all upholstery applications.

Mystique Croco

The same passion used to make Mystique spills over into the creation of Mystique Croco. Prior to the hand-tipping process, these strong bull hides are embossed with a crocodile pattern. The raised areas of the pattern are then hand-tipped to highlight the beautiful texture. Mystique Croco is available in both whole and half hide sizes and offers excellent durability. It is recommended for all upholstery applications.

Native

Native is adventurous, nature-inspired leather that is reminiscent of the past. These Italian, full grain hides are hand-buffed to create a rugged texture with a mottled appearance and beautiful depth of color. The matte surface of this natural, naked leather is unprotected and will highlight signs of wear with use. Native is recommended for all upholstery applications, as it embraces what life has to offer, improves with age, and develops a rich patina over time.

Newport Club

Newport Club is robust leather with a noticeably heavier feel. This luxurious, Italian, full grain leather has a soft hand and dense fiber structure for superior durability. Newport Club has a beautiful mottled surface with deep, rich colors and a gorgeous sheen. It is recommended for all upholstery applications.

Leather Collections

Pearlescence

Pearlescence is the comeback kid of leather. It was one of our original products and was reintroduced years later by popular demand. Pearlescence is Italian full grain leather with a smooth grain and beautiful pearl finish, giving each hide a refined shimmer. The metallic and pearl appearance is an integral part of the durable finish that will withstand the demands of daily wear. Available in both soft hues and more bold metallic colors, Pearlescence is suitable for all upholstery applications.

Resilience

As the name suggests, Resilience is resilient. It is Italian full grain, pure aniline leather with additional built-in protection. The artful variations in shading give Resilience the look and feel of pure comfort. It has an anti-bacterial, scratch-resistant finish to help guard against daily use and wear. Resilience is made to be cherished for generations, as it will develop a rich patina over time and age to perfection.

Shagarrett

Garrett Leather has reinvented shagreen as Shagarrett. Now you have full hides with no plate lines to use to wrap furniture, clad walls, or for upholstery. This Italian leather features a beautiful two-tone texture with reverse tipping, where the darker color appears in the valleys of the pattern rather than on the tips. Shagarrett has a durable finish and is recommended for all upholstery applications.

Sheepskin

Our genuine, plush Sheepskin provides ultimate seating comfort; warm in the winter and cool in the summer. Sheepskin is used for pilot seats, automotive seats, and as throw rugs in finer residences. The fleece is straight, also called ironed, unclipped, with a length of approximately $\frac{3}{4}$ ". Many colors are available in natural curly fleece as well. Sheepskin averages 9 square feet and is sold by the whole skin.

Sierra

Sierra is the epitome of buttery, soft leather. It is the ultimate Italian full grain, pure aniline with a subtle satin sheen. Sierra has an irresistible hand that provides extreme comfort. It represents leather in its purest form with very little surface protection. Nature's signature is evident on every hide, revealing the true beauty of genuine leather. Over time, Sierra will develop a rich patina and age to perfection.

Torino

Torino has a rich hand and a welcoming texture with a durable, anti-bacterial and waterproof finish. The uniform, pebble grain on this full-bodied Italian leather provides consistency and superior cutting yields with little waste. Torino is recommended for all upholstery applications, especially high traffic areas.

Vintage

Vintage is rich, Italian, full grain leather with beautiful depth of color and subtle mottled appearance. This leather has a timeless look with a gorgeous moderate sheen that is ideal for both traditional and contemporary interiors. Vintage will age beautifully and develop a rich patina. It is a leather to be treasured as it shows signs of love and use with pride, emphasizing nature's splendor.

Garrett Wovens®

Award-winning Garrett Wovens® are an industry leader. Garrett Wovens® begin with 100% vegetable tanned, Italian, full grain leather, which provides a structural integrity that is not possible with standard, soft upholstery leather. Each pattern is backed with cotton fabric for extra stability. All Garrett Wovens® are sold in $\frac{1}{2}$ -yard increments on a 54-inch wide roll, providing for the industry's widest cutting allowance for applications such as wallcoverings.

Wall Applications

Our Wall Panels and Wall Tiles offer a luxurious touch for vertical applications. Enjoy creative freedom with over 600 color options in a variety of finishes, patterns, and textures.

Garrett Leather Wall Panels and Wall Tiles have been specified for corporate offices, executive boardrooms, reception areas, hotel rooms, and for private residences.

Wall Panels

We offer hundreds of wallcovering options with Wall Panels. Any Garrett Leather color, including Capelli hair hides and Sheepskin, may be specified for Wall Panels in a variety of shapes and sizes. Wall Panels are handcrafted on a per order basis at our corporate headquarters. Each panel begins with ½ inch thick routed MDF substrate. Panels may be made flat or padded and are fully wrapped with leather and secured with no seams on the corners or edges. Stitching is optional on flat Wall Panels only.

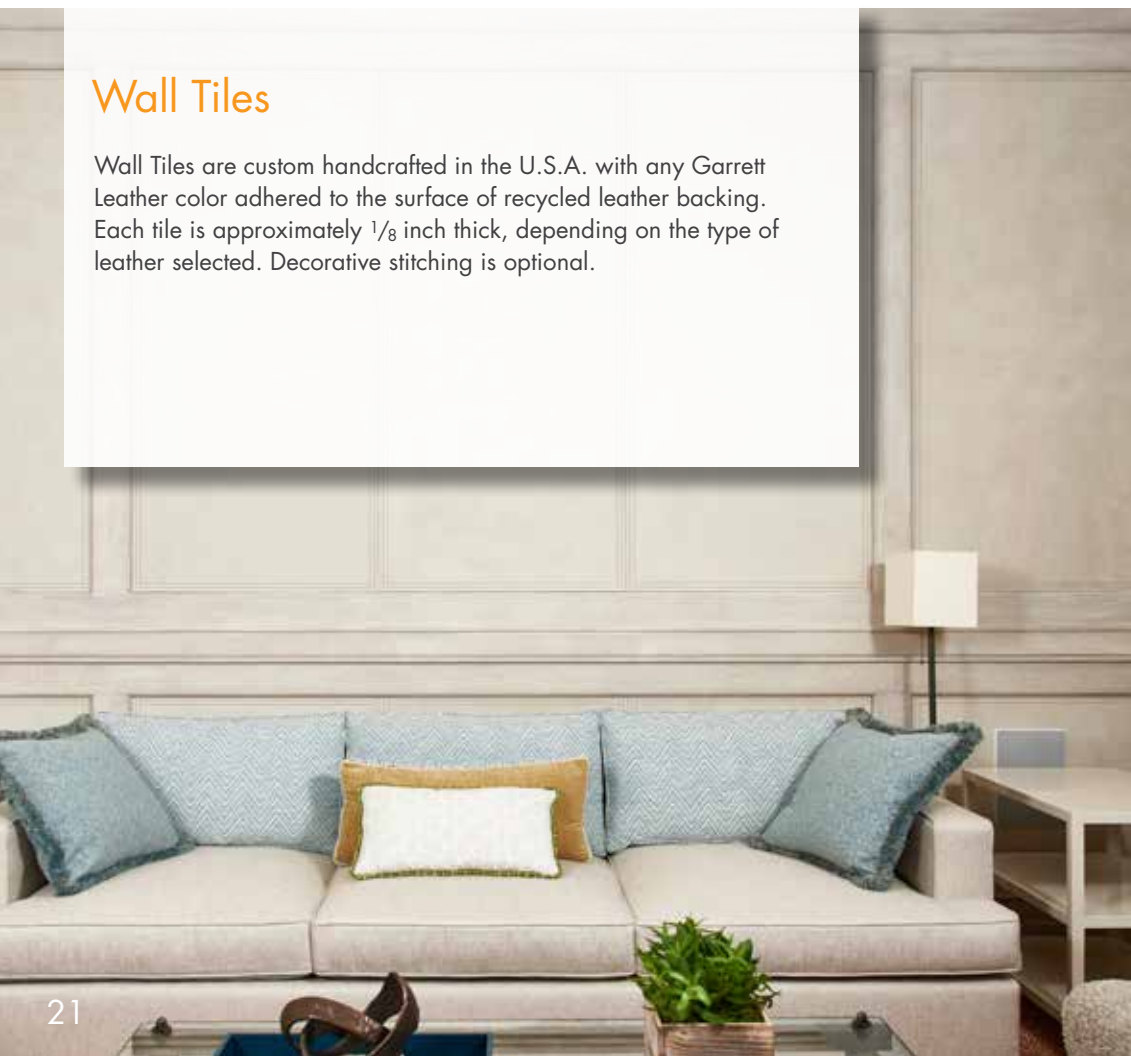

Woven Panels

Woven Panels are made with any pattern of Garrett Wovens®, including all leather or leather and fabric. Garrett Wovens® are fully wrapped and secured around ½ inch thick routed MDF with no seams on the edges or corners. Woven Panels may be made flat or padded in a variety of shapes and sizes. Woven Panels are handcrafted in the U.S.A.

Wall Tiles

Wall Tiles are custom handcrafted in the U.S.A. with any Garrett Leather color adhered to the surface of recycled leather backing. Each tile is approximately 1/8 inch thick, depending on the type of leather selected. Decorative stitching is optional.

Installation Tools

We offer a full range of installation tools for Wall Panels, Wall Tiles, and Woven Panels. Installation tools include Z Track, Z Clips, 3M Dual Lock®, and water-based contact cement. Detailed installation instructions are available upon request.

Garrett Leather partnered with Harcourt London, leather specialists located in the United Kingdom. With innovative vision, design excellence, and meticulous attention to detail, Harcourt London fabricates 3 beautiful styles of wall panels and tiles exclusively for Garrett Leather.

Cast Panels

Inspired by the architecture of the buildings and bridges of Harcourt's home city of London, Cast Panels combine bold lines with shadow play and luxurious leather. Cast Panels highlight beautiful designs on sturdy MDF substrate. All installation tools and detailed instructions are included with each order.

Alpine Tiles

Alpine Tiles are a modern take on the rugged peaks of the Italian Alps. Each tile overlaps for a beautiful 3D pattern. Alpine Tiles consist of Garrett Leather adhered to a fire-rated PVC backer. Bespoke designs are possible with over 600 colors from which to select and optional decorative stitching. All installation tools and detailed instructions are included with each order.

Pitched Panels

Drawing from the design of skyscrapers, Pitched Panels evoke a modern luxury when finished in Italian leather. All Pitched Panels are made with a strong aluminum substrate wrapped in almost any Garrett Leather color. Pitched Panels are lightweight and fireproof to meet industry flammability requirements. All installation tools and detailed instructions are included with each order.

Additional Products

Accessories

We offer Accessories for corporate, residential, and hospitality settings. Each piece is handcrafted in the U.S.A. and wrapped with our leather, giving you hundreds of color options from which to choose. All Accessories are made on a custom order basis. Lead time is 8 to 10 weeks.

Braided Welt

Braided Welt is made from the same full grain, vegetable tanned leather found in Garrett Wovens®. A cotton fabric sewing allowance is intertwined with the leather, providing easy application, superior strength, and durability. Braided Welt is sold by the yard and is available in 7 rich colors.

Care Products

Proper care and cleaning are critical to the longevity of leather. We offer a variety of care products, including Leather Cleaning Kit, Mild Cleanser, Ink Remover, Nubuck Care Kit, and 3-in-1 Leather Wipes to keep your leather looking and feeling as good as new.

Leather Marking Pens

Leather Marking Pens are non-toxic and safe to use on most of our products. Manufacturers and upholsterers use Leather Marking Pens to trace patterns and make other notations on leather before cutting into the hide. All marks are easily removed with a dry cloth.

Tex 70 Thread

Tex 70 bonded nylon thread is made to match almost every Garrett Leather color and is sold in 4-ounce spools. Matching "G" bobbins are sold by the gross (144 bobbins). Tex 70 Thread meets industry standard UV protection of 95 hours.

Tex 210 Thread

Heavier Tex 210 bonded nylon thread is available in 8-ounce spools. Tex 210 Thread meets industry standard UV protection of 95 hours.

Tubular Wovens

Tubular Wovens bestow a sophisticated look with no unsightly seams. This innovative product is fabricated in Italy with full grain, vegetable tanned leather and is made to easily slide over any tubular shaped fixture such as handrailings, door handles, or curtain rods. Choose from 4 colors, 3 sizes, and 2 patterns. All Tubular Wovens are sold by the yard and are exclusive to Garrett Leather.

Welt Cord

Welt may be used as trim around furniture, cushions, pillows, and more. We offer 2 sizes to save time and money. Welt is fabricated at corporate headquarters in any Garrett Leather color. Simply specify the leather and color of choice.

Services

Custom Strike-Offs

We have an in-house color lab where technicians blend dye colors and finishes to create custom samples specifically formulated to match client specifications. Upon approval, strike-offs are sent to the tannery for full dyelot production. Lead times vary, depending on specifications.

Impress

Impress provides the ultimate selection of pattern and color. Impress is produced using a combination of heat and pressure to emboss different types of patterns on most types of leather. Once the pattern is selected, choose a leather color. Create thousands of combinations with a total of 34 patterns and hundreds of colors. All Impress orders are sold in half hide increments with a 2-week lead-time.

Perforating

Perforating may be done on most of our leather collections. After selecting a pattern, simply specify the leather product and color of your choice. All perforating is done in half hide increments with a 2-week lead-time. Cutting your patterns prior to perforating is recommended.

Skiving

Skiving is a method used to reduce the thickness of leather hides. Hides may be skived to any thickness down to 0.7 mm. Most of our products may be skived. All skiving is done in half hide increments with a 2-week lead time.

Flameproofing

Many of our products are treated during the tanning process to meet industry flammability requirements. Products that are not treated during the tanning process may be treated at our corporate headquarters at no additional charge. Certification is available upon request.

Custom Embossing

Have your corporate logo or any custom design embossed on leather. Send your artwork with actual dimensions to us for a price quote. A custom mold will be made and a sample will be provided for a small fee. Orders will be filled upon final approval of sample. Please allow 3 weeks for a sample and another 3 weeks for production.

Laser Embossing

Laser embossing creates beautiful patterns on leather using computerized lasers. Send your artwork with actual dimensions to us for a price quote. Upon request, a sample with your design will be provided for a small fee. Once approved, your order will begin production. Please allow 3 weeks for delivery.

Caiman Embossing

Caiman is an exotic, large scale reptile pattern that is deeply embossed on any Distressed or Vintage color. Caiman hides are embossed in Italy and are available in both whole and half hide sizes. Color variations and natural markings are inherent characteristics of the leather. The hides will darken with use and develop a rich patina over time.

Cut-to-Pattern

We have one of the most technologically advanced, computerized cutting systems in the industry. You receive precise patterns cut to your exact specifications. Contact your sales representative for more details.
