

Impress

Garrett

Leather

Impress

Impress is produced using a combination of heat and pressure to emboss patterns on most types of leather. The photographs in this brochure are to show pattern only. After selecting a pattern, **specify the leather and color of your choice.**

All Impress patterns, except Caiman, are sold in half hide increments with a two week lead time. Caiman is sold in both whole and half hides with a five week lead time. A full deposit is required on all Impress orders.

Photo is to show pattern only.
Choose almost any Garrett color.

Vertical Repeat: 6 ¼"
Horizontal Repeat: 13 ⅛"

Pictured: Western Tool embossed on
V312 Vintage Elk.

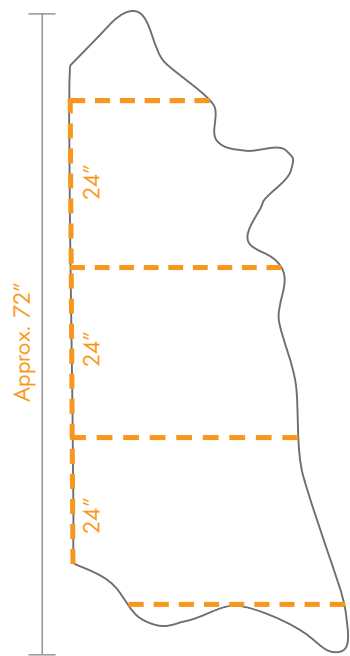

Ordering Information

The photographs in this brochure show each pattern at 100% scale, or actual size. These are to show pattern only. You may specify the color of your choice for each pattern. Separate samples of colors and patterns are available upon request.

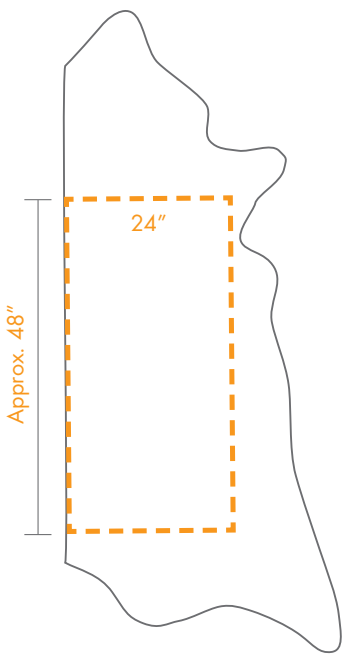

Impress is produced using a combination of heat and pressure to emboss specific patterns on leather. When specifying Impress, there are a number of items to keep in mind:

- Choose almost any Garrett color. Impress is not recommended for Berkshire, Cadence, DiModa Cobra, DiModa Gatora, Mystique, Mystique Croco, and Shagarrett.
- A 10" x 10" sample of a specific Impress pattern on a specified color of Garrett leather is available for a small fee. The fee is reimbursable upon placement of an order. Please allow 2 weeks for all special sample requests.
- All Impress patterns, with the exception of Caiman, are available in ½ hide increments only.
- Embossing plates are laid down the length of the ½ hide as 24" high and 40-54" wide (depending on specific plate size.) There may be some plating marks and/or small overlapping areas of the pattern due to the nature of plate embossing. There will be a slight seam every 24" down the length of the hide.
- Lead-time for most Impress orders is 2 weeks from receipt of confirming purchase order and applicable deposit. Please allow 4-6 weeks for Caiman.

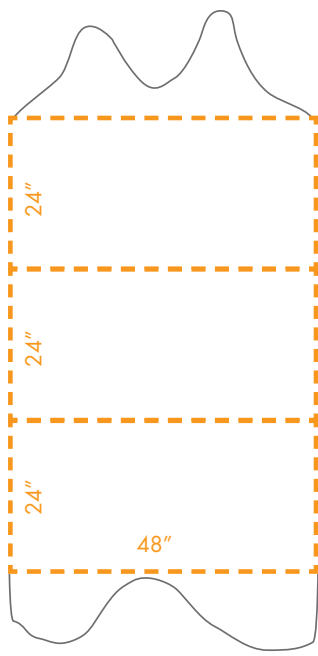

Layout Options

Option 1: Standard option. Embossing plates are placed horizontally.

Option 2: Allows for change in the direction of the pattern on the hide. This option will result in a lower cutting yield.

Option 3: Offers a higher cutting yield. However, the pattern will not reach the edge of the whole hide. Customer must purchase the entire hide. The hide will be trimmed prior to embossing.

Please note: Plate sizes vary. Some pattern plates are up to 54" wide.
